Naturalization Of The Soul Self And Personal Identity In The Birth Of Modern Psychology:

Naturalization of the Soul John Barresi, Raymond Martin, 2012-10-12 *Naturalization of the Soul* charts the development of the concepts of soul and self in Western thought from Plato to the present. It fills an important gap in intellectual history by being the first book to emphasize the enormous intellectual transformation in the eighteenth century when the religious soul was replaced first by a philosophical self and then by a scientific mind. The authors show that many supposedly contemporary theories of the self were actually discussed in the eighteenth century and recognize the status of William Hazlitt as one of the most important Personal Identity theorists of the British Enlightenment for his direct relevance to contemporary thinking. Now available in paperback *Naturalization of the Soul* is essential reading for anyone interested in the issues at the core of the Western philosophical tradition.

Constructing the Self Valerie Gray Hardcastle, 2008 *Constructing the Self* analyzes the narrative conception of self, filling a serious gap in philosophy and grounding discussion in other disciplines. It answers the questions: What are the connections between our interpretations, selfhood, and conscious phenomenal experience? Why do we believe that our interpretations of our life-defining events are narrative in nature? From the myriad of thoughts, actions, and emotions which constitute our experiences, how do we choose what is interpretively important, the tiny subset that composes the self? By synthesizing the different approaches to understanding the self from philosophy of mind, developmental psychology, psychopathology, and cognitive science, this monograph gives us deeper insight into what being minded, being a person, and having a self are, as well as clarifies the difference and relation between conscious and unconscious mental states and normal and abnormal minds. The explication also affords new perspectives on human development and human emotion.

Series A **The Rise and Fall of Soul and Self** Raymond Martin, John Barresi, 2006 This book traces the development of theories of the self and personal identity from the ancient Greeks to the present day. From Plato and Aristotle to Freud and Foucault, Raymond Martin and John Barresi explore the works of a wide range of thinkers and reveal the larger intellectual trends, controversies, and ideas that have revolutionized the way we think about ourselves. The authors open with ancient Greece where the ideas of Plato, Aristotle, and the materialistic atomists laid the groundwork for future theories. They then discuss the ideas of the church fathers and medieval and Renaissance philosophers, including St. Paul, Philo, Augustine, Aquinas, and Montaigne. In their coverage of the emergence of a new mechanistic conception of nature in the seventeenth century, Martin and Barresi note a shift away from religious and purely philosophical notions of self and personal identity to more scientific and social conceptions, a trend that has continued to the present day. They explore modern philosophy and psychology, including the origins of different traditions within each discipline, and explain both the theoretical relevance of feminism and gender and ethnic studies, and also the ways that Derrida and other recent thinkers have challenged the very idea that a unified self or personal identity even exists. Martin and Barresi cover a number of issues broached by philosophers and psychologists, such as the existence of a fixed and unchanging self, and whether the concept of the soul has a use outside

of religious contexts They address the question of whether notions of the soul and the self are still viable in today's world Together they reveal the fascinating ways in which great thinkers have grappled with these and other questions and the astounding impact their ideas have had on the development of self understanding in the west Naturalization of the Soul Raymond Martin, John Barresi, 2004 Annotation This book makes a major contribution to our understanding of one of the most radical transformations in the history of intellectual thinking **Living Authentically: Daoist Contributions to Modern Psychology** Livia Kohn, 2011 Living Authentically brings together classical scholars of Daoism professors of psychology practicing psychologists medical doctors and alternative practitioners to explore different Daoist concepts of the mind and its transformations in relation to various schools of modern psychology The book explores how Daoism can help us live in the world sustaining relationships and educating children in a stress free truly authentic way Book jacket **The Routledge Companion to Philosophy of Psychology** Sarah Robins, John Symons, Paco Calvo, 2009-09-11 The Routledge Companion to Philosophy of Psychology is an invaluable guide and major reference source to the major topics problems concepts and debates in philosophy of psychology and is the first companion of its kind A team of renowned international contributors provide forty two chapters organised into six clear parts I Historical background to the philosophy of psychology II Psychological explanation III Cognition and representation IV The biological basis of psychology V Perceptual experience VI Personhood The Companion covers key topics such as the origins of experimental psychology folk psychology behaviorism and functionalism philosophy psychology and neuroscience the language of thought modularity nativism and representational theories of mind consciousness and the senses personal identity the philosophy of psychopathology and dreams emotion and temporality Essential reading for all students of philosophy of mind science and psychology The Routledge Companion to Philosophy of Psychology will also be of interest to anyone studying psychology and its related disciplines Virtual Selves, Real Persons Richard S.
