Nature Against Us The United States And The World Population Crisis 1965 198:

The Crowded Greenhouse John Firor, Judith E. Jacobsen, 2008-10-01 This book focuses on two critical global issues rapid population growth and a human induced climate change John Firor and Judith Jacobsen summarize the current status of these two issues show how they are related to one another and prescribe steps that governments economies societies and individuals can adopt to stabilize both population and climate Firor and Jacobsen argue that two revolutions are necessary to achieve a stable population and freedom from human induced climate change a social revolution that improves equity particularly the status of women and a technical revolution that yields vastly greater efficiency in energy and materials use than we have today They offer a vision that incorporates these changes and they urge professionals and activists to work to achieve them even in the face of great odds

The Sterilization Movement and Global Fertility in the Twentieth Century Ian Robert Dowbiggin, 2008 Many would be surprised to learn that the preferred method of birth control in the United States today is actually surgical sterilization This book takes an historical look at the sterilization movement in post World War II America a revolution in modern contraceptive behavior Focusing on leaders of the sterilization movement from the 1930 s through the turn of the century this book explores the historic linkages between environment civil liberties eugenics population control sex education marriage counseling and birth control movements in the 20th century United States Sterilization has been variously advocated as a medical procedure for defusing the population bomb expanding individual rights liberating women from the fear of pregnancy strengthening marriage improving the quality of life of the mentally disabled or reducing the incidence of hereditary disorders From an historical standpoint support for free and unfettered access to sterilization services has aroused opposition in some circles and was considered a liberal cause in post World War II America This story demonstrates how a small group of reformers helped to alter traditional notions of gender and sexuality

A History of Global Health Randall M. Packard, 2016-09-15 A sweeping history explores why people living in resource poor areas lack access to basic health care after billions of dollars have been invested in international health assistance Over the past century hundreds of billions of dollars have been invested in programs aimed at improving health on a global scale Given the enormous scale and complexity of these lifesaving operations why do millions of people in low income countries continue to live without access to basic health services sanitation or clean water And why are deadly diseases like Ebola able to spread so quickly among populations In A History of Global Health Randall M Packard argues that global health initiatives have saved millions of lives but have had limited impact on the overall health of people living in underdeveloped areas where health care workers are poorly paid infrastructure and basic supplies such as disposable gloves syringes and bandages are lacking and little effort has been made to address the underlying social and economic determinants of ill health Global health campaigns have relied on the application of biomedical technologies vaccines insecticide treated nets vitamin A capsules to attack specific health problems but have failed to invest in building lasting infrastructure for managing the ongoing health

problems of local populations. Designed to be read and taught, the book offers a critical historical view providing historians, policy makers, researchers, program managers, and students with an essential new perspective on the formation and implementation of global health policies and practices.

Marriage at the Crossroads Marsha Garrison, Elizabeth S. Scott, 2012-10-15

The institution of marriage is at a crossroads. Across most of the industrialized world, unmarried cohabitation and nonmarital births have skyrocketed while marriage rates are at record lows. These trends mask a new idealized vision of marriage as a marker of success, as well as a growing class divide in childbearing behavior: the children of better educated, wealthier individuals continue to be born into relatively stable marital unions, while the children of less educated, poorer individuals are increasingly born and raised in more fragile nonmarital households. The interdisciplinary approach offered by this edited volume provides tools to inform the debate and to assist policy makers in resolving questions about marriage at a critical juncture. Drawing on the expertise of social scientists and legal scholars, the book will be a key text for anyone who seeks to understand marriage as a social institution and to evaluate proposals for marriage reform.

Nature Against Us Peter J. Donaldson, 1990 *Nature Against Us* The United States and the World Population Crisis 1965 1980 *The Earth as Transformed by Human Action* B. L. Turner, William C. Clark, Robert W. Kates, John F. Richards, Jessica T. Mathews, William B. Meyer, 1993-01-29 *The Earth as Transformed by Human Action* is the culmination of a mammoth undertaking involving the examination of the toll our continual strides forward technical and social take on our world The purpose of such a study is to document the changes in the biosphere that have taken place over the last 300 years to contrast global patterns of change to those appearing on a regional level and to explain the major human forces that have driven these changes The first section deals strictly with the major human forces of the past 300 years and the second is a detailed account of the transformations of the global environment wrought by human action The final section examines a range of perspectives and theories that purport to explain human actions with regard to the biosphere **Bibliography of the History of Medicine** , Population Index Bibliography: 1954-1968: North America-Europe (France) Princeton University. Office of Population Research, 1971 **Congressional Record** United States. Congress, 1972 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 *Cumulated Index Medicus* , 1967 Physiological Plant Pathology R. Heitefuß, P.H. Williams, 2012-12-06 Plant pathology embraces all aspects of biological and scientific activity which are concerned with

understanding the complex phenomena of diseases in plants Physiological plant pathology represents those specialities within plant pathology which focus on the physiological and biochemical activities of pathogens and on the response of host plant tissues Today there is an increasing recognition on the part of the scientific agricultural community that only through a deeper and more fundamental understanding of all the interacting components of the agricultural biota can we expect to improve our capabilities of feeding an expanding world population It is in this context that physiological plant pathology has assumed new significance within the broader field of plant pathology No longer are studies on the biochemistry and physiology of pathogens and pathogenesis merely isolated academic exercises rather a substantial coherent body of knowledge is accumulating upon which our understanding of the process of disease development and host resistance is being founded It is from these foundations of knowledge that ultimately new insights into the control of plant diseases may be expected to grow It seems appropriate therefore that at regular intervals those involved in the various subspecialities encompassing the broadest aspects of physiological plant pathology reassess the contributions within the particular specialities in the light of new knowledge and technologies for the purpose of articulating new and productive directions for the future
