Nature of the Persian and Hellenistic Periods Jon L. Berquist,Alice Hunt,2012-10-25

This volume makes a positive intervention into maximalist minimalist debates about Israelite historiography by pointing to the events that happened during the Persian and Hellenistic periods During this historical epoch traditions about Israel and Judah s founding became fixed as markers of ethnic identity and much of the canonical Hebrew Bible came into its present form Concentrating on these events a clearer historical picture emerges The entire volume is set within the context of Douglas A Knight s contributions which have encouraged a rigorous social scientific and tradition historical approach to the Hebrew Bible and ancient Israel in general

Ending the War Between Humanity and Nature Patrick C. Lee,2020-08-19

This book offers plausible explanations for people s puzzling unwillingness to address the human nature interactions that have led us to the precipice that is climate change today Humanity and nature are at war the evidence is all around us catastrophic weather events rising sea levels extinction of species famine wildfires melting polar ice millions of environmental refugees and toxic pollution of air water and soil The list goes on and on What is causing this war and how can it be stopped Is this war an unintended consequence of economic and environmental imperatives pulling in opposite directions This book takes the question and its answer to a deeper level It argues that the root cause of our war on nature might be found in the time honored historically deep myths narratives and stories we tell ourselves and have been telling ourselves for centuries about humanity s place in or out of the natural world

Trust, Our Second Nature Thomas O. Buford,2009-01-16

The thesis of this book is that only a social personalism and no form of impersonalism can adequately account for the solidarity and stability of what we individuals share with all other members of our society our second nature In the ancient world the discussion of society at least since Plato and Aristotle began with the social nature of individuals as found in families and proceeded to topics such as the formation and the well ordering of societies according to eternal principles grasped by reason Since the beginning of the modern world at least since Hobbes and Locke the discussion of society began with the relation of persons and society and then moved on to other topics usually political and legal ones The central problem was to find the basis on which individuals formed societies and how they could do so Buford s question is with a more basic issue What do individuals and society share in common or what philosophers since Cicero have called our second nature and how to best understand its unity and stability The crisis of our culture in the erosion of both solidarity and stability pointedly manifests itself in our second nature There the culture in

which we live is felt lived and shared Buford asks how we can lay bare our second nature revealing the extent of the crisis Our second nature is the form of social actions of persons in triadic relations and Buford argues that it is there that we find that trust unifies a society and provides the basis for the institutions that stabilize it

The Hidden Code of God, Nature's Bible of Free Will Matthew McNeil Asher, 2018-09-21 This is a very personal story but it s based on logic rather than emotion It s a story that should help all of us destroy the bad emotions that lurk inside us This is how we will survive One day while mowing the lawn I had an epiphany This flash of truth just came naturally like a flash of light and from that first flash I felt as though I had been given the formula of humanity Starting that night while I tried to sleep something kept pushing at me and waking me up The spirit would not let me sleep It pushed at me over and over again I finally gave in got up and the spirit helped me write out the formula for free will I could never have done this alone I opened up my mind and began to take note of everything Things that made sense things that didn t I then filtered those things down little by little taking out opinion and leaving just what I knew to be true The inner spirit was guiding me on my journey It was attempting to help me clean my own soul after years of neglect I was convinced that this happened because the spirit wanted me to be content with myself It wanted me to seek truth The truth would allow me to grow The truth will allow us to grow After flipping the formula of humanity upside down I then flipped free will upside down When that happened the flood gates of truth from the creator and the destroyer opened up History law the Bible and all that makes up human behavior It all became clear We are human behavior This is somewhat complicated but once we realize these things to be true life becomes more understandable more balanced These formulas can offer us a form of balance a compass to use to keep ourselves structured and aligned with our inner spirit Our inner spirit wants our lives clean and healthy This book can help us do that

God in our Nature Peter Kenneth Stevenson, 2007-09-01 Arguably the leading Scottish theologian of the nineteenth century John McLeod Campbell s theology is much criticized and often misunderstood Previous accounts have tended to overlook both his sermons and his Christology This reassessment of his thought breaks new ground by offering a detailed study of his sermons and by identifying the distinctive Christology which contributes to a clearer understanding of his doctrine of atonement Drawing upon the full range of Campbell s work God in our Nature brings to light a trinitarian theologian whose pilgrimage represents a journey within evangelicalism rather than a departure from the evangelical fold

Embracing Our Priestly Nature at Work Scott Breslin, 2017-09-26 At the core of every follower of Jesus exists a priestly DNA designed by God to be a prominent part of our self identity However like a slow burning ember our priestly nature risks remaining obscure and inconsequential unless fanned to life This book was written to be that fan Similar to H C Andersen s Ugly Duckling many of us have been raised in a barn metaphorically speaking in that our priestly identity has been obscured and

has been rarely if ever acknowledged reinforced or nurtured Many of us readily embrace the temporary role identities bestowed on us by human society like student employee spouse parent etc but hesitate to embrace the priestly role identity bestowed on us by God This should not be Our self identity strongly influences our attitudes behaviors and choices More importantly it needs to change because God had something important in mind when he designed his people to be priests We need to better understand what that means This book was written to help you understand and embrace your priestly identity particularly in the workplace and community It not only helps me understand my identity in Christ in a secular world it also gives me the healthy perspective to declare to proclaim as Scott puts it the praises of God in my everyday existence

Nature and the Bible Franz Heinrich Reusch,1886 **The Nature and Design of Christian Baptism** R. A. Lancaster,1855 *Reconstructing a Christian Theology of Nature* Anna Case-Winters,2016-04-08

In the present ecological crisis it is imperative that human beings reconsider their place within nature and find new more responsible and sustainable ways of living Assumptions about the nature of God the world and the human being shape our thinking and consequently our acting Some have charged that the Christian tradition has been more a hindrance than a help because its theology of nature has unwittingly legitimated the exploitation of nature This book takes the current criticism of Christian tradition to heart and invites a reconsideration of the problematic elements its desacralization of nature its preoccupation with the human being to the neglect of the rest of nature its dualisms and elevation of the spiritual over material reality and its habit of ignoring or resisting scientific understandings of the natural world Anna Case Winters argues that Christian tradition has a more viable theology of nature to offer She

takes a look at some particulars in Christian tradition as a way to illustrate the undeniable problems and to uncover the untapped possibilities In the process she engages conversation partners that have been sharply critical and particularly insightful feminist theology process thought and the religion and science dialogue The criticisms and insights of these partners help to shape a proposal for a reconstructed theology of nature that can more effectively fund our struggle for the fate of the earth
