Nature In The Global South Environmental Projects In South And Southeast Asia:

Nature in the Global South Paul Greenough, Anna Lowenhaupt Tsing, 2003-08-29 DIVER Alternative cultural forms of environmentalism in South and Southeast Asia div **Nature in the Global South** Paul Greenough, Anna Lowenhaupt Tsing, 2009 DIVER Alternative cultural forms of environmentalism in South and Southeast Asia div **The Global South and Literature** Russell West-Pavlov, 2018-03-08 The Global South has largely supplanted the Third World in discussions of development studies postcolonial studies world literature and comparative literature respectively The concept registers a new set of relationships between nations of the once colonized world as their connections to nations of the North diminish in significance Such relationships register particularly clearly in contemporary cultural theory and literary production The Global South and Literature explores the historical cultural and literary applications of the term for twenty first century flows of transnational cultural influence tracing their manifestations across the Global Southern traditions of Africa Asia and Latin America This collection of interdisciplinary contributions examines the origins development and applications of this emergent term employed at the nexus of the critical social sciences and developments in literary humanities and cultural studies This book will be a key resource for students graduates and researchers working in the field of postcolonial studies and world literature **Governing Climate Change in Southeast Asia** Jens Marquardt, Laurence L. Delina, Mattijs Smits, 2021-12-07 This volume showcases the diversity of the politics and practices of climate change governance across Southeast Asia Through a series of country level case studies and regional perspectives the authors in this volume explore the complexities and contested nature of climate governance in what can be considered as one of the most dynamic and multi faceted regions of the world They reflect upon the tensions between authoritarian and democratic climate change governance the multiple roles of civil society and non state interventions and the conflicts between state planning and market driven climate change governance Shedding light on climate change mitigation and adaptation efforts in Southeast Asia this book presents the various formal and informal institutions of climate change governance their relevant actors procedures and policies Empirical findings from a diverse set of environments are merged into a cross country comparison that allows for elaborating on similar patterns whilst at the same time highlighting the distinct features of climate change governance in Southeast Asia Drawing on case studies from all Southeast Asian countries namely Brunei Darussalam Cambodia Indonesia Laos Malaysia Myanmar the Philippines Singapore Thailand Timor Leste and Viet Nam this book will be of great interest to students scholars and practitioners dealing with climate change and environmental governance **A Companion to American Environmental History** Douglas Cazaux Sackman, 2010-02-12 A Companion to American Environmental History gathers together a comprehensive collection of over 30 essays that examine the evolving and diverse field of American environmental history Provides a complete historiography of American environmental history Brings the field up to date to reflect the latest trends and encourages new directions for the field Includes the work of path breaking environmental historians from the founders of

the field to contributions from innovative young scholars Takes stock of the discipline through five topically themed parts with essays ranging from American Indian Environmental Relations to Cities and Suburbs **Anthropology and Nature** Kirsten Hastrup, 2013-08-15 On the basis of empirical studies this book explores nature as an integral part of the social worlds conventionally studied by anthropologists The book may be read as a form of scholarly edgework resisting institutional divisions and conceptual routines in the interest of exploring new modalities of anthropological knowledge making The present interest in the natural world is partly a response to large scale natural disasters and global climate change and to a keen sense that nature matters matters to society at many levels ranging from the microbiological and genetic framing of reproduction over co species development to macro ecological changes of weather and climate Given that the human footprint is now conspicuous across the entire globe in the oceans as well as in the atmosphere it is difficult to claim that nature is what is given and permanent while people and societies are ephemeral and simply derivative features This implies that society matters to nature and some natural scientists look towards the social sciences for an understanding of how people think and how societies work The book thus opens up a space for new forms of reflection on how nature and societies are generated **Environmental Sociology** John Hannigan, 2022-09-09 John Hannigan's definitive textbook offers a distinctive balanced coverage of environmental issues policies and action This revised fourth edition has been expanded and fully updated to explore contemporary developments and issues within global environmental sociology Environmental Sociology reconciles Hannigan's widely cited model of the social construction of environmental problems and controversies which states that incipient environmental issues must be identified researched promoted and persuasively argued in the form of claims with an environmental justice perspective that stresses inequality and threats to local communities For example this new edition explores the interconnections between indigenous communities and environmental activists via a study of the difficult relationship between Aboriginal people and environmentalists in Australia The updated fourth edition also discusses new direct action protest groups such as Extinction Rebellion who have reframed the discourse around the climate emergency using apocalyptic language and imagery Environmental Sociology also signposts exciting new directions for future research The fourth edition re-interrogates the classical roots of environmental theory with a focus on the work of Alexander von Humboldt Hannigan also asserts the need for environmental sociologists to turn their attention to The Forgotten Ocean arguing that the discipline should incorporate cutting edge concepts such as marine justice striated space and volumetrics Environmental Sociology is a key text for students and researchers in environmental studies political ecology social geography and environmental sociology **Community, Environment and Local Governance in Indonesia** Carol Warren, John F. McCarthy, 2012-09-10 This book explores the forces reconfiguring local resource governance in Indonesia since 1998 drawing together original field research undertaken in a decade of dramatic political change Case studies from across Indonesia's diverse cultural and ecological landscapes focus on the most significant resource sectors agriculture

fisheries forestry mining and tourism providing a rare in depth view of the dynamics shaping social and environmental outcomes in these varied contexts Debates surrounding the tragedy of the commons and environmental governance have focused on institutional considerations of how to craft resource management arrangements in order to further the policy objectives of economic efficiency social equity and environmental sustainability The studies in this volume reveal the complexity of resource security issues affecting local communities and user groups in Indonesia as they engage with wider institutional frameworks in a context driven simultaneously by decentralizing and globalizing forces Through ground up investigations of how local groups with different cultural backgrounds and resource bases are responding to the greater autonomy afforded by Indonesia s new political constellation the authors appraise the prospects for rearticulating governance regimes toward a more equitable and sustainable commonweal This volume offers valuable insights into questions of import to scholars as well as policy makers concerned with decentralized governance and sustainable resource management

The Oxford Handbook of Environmental History Andrew C. Isenberg, 2017 The Oxford Handbook of Environmental History draws on a wealth of new scholarship to offer diverse perspectives on the state of the field

Planning for the Planet Simone Schleper, 2019-07-12 During the 1960s and 1970s rapidly growing environmental awareness and concern created unprecedented demand for ecological expertise and novel challenges for ecological advocacy groups such as the International Union for Conservation of Nature and Natural Resources IUCN This book reveals how despite their vast scientific knowledge and their attempts to incorporate socially relevant themes IUCN experts inevitably struggled to make global schemes for nature conservation a central concern for UNESCO UNEP and other intergovernmental organizations
