Nature Incorporated Industrialization And The Waters Of New England:

Nature Incorporated Theodore Steinberg, 1994 A great deal of arrogance surrounds this late twentieth century attitude toward the environment and a great deal of history as well What started as a research paper at Brandeis University expanded into a book that explores the role of the Industrial Revolution in this aggressive stance toward the natural world The transformation of nature is at least as old as our presence as a species on this planet But the advent of the industrial age marked a shift in humankind's relations with the earth Steinberg concerns himself mainly with describing this shift as it was felt in New England to journey back to a time when the task of subduing nature was full of hard fought battles and much less arrogance *Nature Incorporated* Theodore Steinberg, 1991

New England and the Maritime Provinces Stephen J. Hornsby, John G. Reid, 2005-09-19 A significant addition to the growing field of transnational studies New England and the Maritime Provinces reveals a relationship that although sometimes troubled retains its importance in the current era of globalization

Sum of the Parts Kent C Ryden, 2011-04-01 Proponents of the new regional history understand that regional identities are constructed and contested multifarious and not monolithic that they involve questions of dominance and power and that their nature is inherently political In this lively new book writing in the spirit of these understandings Kent Ryden engagingly examines works of American regional writing to show us how literary partisans of place create and recreate attack and defend argue over and dramatize the meaning and identity of their regions in the pages of their books Cleverly drawing upon mathematical models that complement his ideas and focusing on both classic and contemporary literary regionalists Ryden demonstrates that regionalism in the cultural sense retains a great deal of power as a framework for literary interpretation For New England he examines such writers as Robert Frost and Hayden Carruth Mary E Wilkins Freeman and Edith Wharton and Carolyn Chute and Russell Banks to demonstrate that today's regionalists inspire closer more democratic readings of life and landscape For the West and South he describes Wallace Stegner's and William Faulkner's use of region to respectively exclude and evade or confront and indict For the Midwest he focuses on C J Hribal William Least Heat Moon Paul Gruchow and others to demonstrate that midwesterners continually construct the past anew from the materials at hand filling the seemingly empty midlands with history and significance Ryden reveals that there are many Wests many New Englands many Souths and many Midwesterns all raising similar issues about the cultural politics of region and place Writing with appealing freshness and a sense of adventure he shows us that place and the stories that emerge from and define place can be a source of subversive energy that blunts the homogenizing force of region inscribing marginal places and people back onto the imaginative surface of the landscape when we read it on a place by place landscape by landscape book by book basis

A Companion to Global Environmental History J. R. McNeill, Erin Stewart Mauldin, 2025-02-06 A COMPANION TO GLOBAL ENVIRONMENTAL HISTORY Equips both specialists and newcomers with the historical intellectual and political context for engagement with the environment Providing multiple points of entry into a

dynamic fast growing field A Companion to Global Environmental History explores the many contours of the relationship between human societies and the natural world on which they depend Bringing together essays by an international roster of both established experts and emerging scholars this volume covers a uniquely broad range of temporal geographic thematic and contextual approaches to the practice of global environmental history Thirty three detailed chapters describe how the relationship between society and nature has changed over time examine the various drivers of change and environmental transformations survey different types of environmental thought and action around the world and more Now in its second edition the Companion is fully revised to reflect major research developments and new trajectories within the field Updated chapters that present new evidence for longstanding debates and innovative applications of environmental history are accompanied by six entirely new chapters on India China Africa early modern cities global environmental governance and European environmentalism Offering fresh insights into environmental thought culture policy and politics A Companion to Global Environmental History Second Edition is an ideal textbook for undergraduate and graduate students and an invaluable reference for scholars researchers and environmental historians Mill Power Paul Marion,2014-09-08

Mill Power documents the making of a national park that changed the concept of what a national historical park could be For a time in the 1800s Lowell was Massachusetts s cosmopolitan must see second city The city s industrial model was as high tech then as Silicon Valley is today It drew the attention of luminaries like Charles Dickens Congressmen Davy Crockett and Abraham Lincoln feminist sociologist Harriet Martineau and abolitionist Frederick Douglass This insider s account of the creative bold community driven process to establish the park explains why today Lowell National Historical Park is renowned as the partnership park The park s establishment was an integral piece of an urban revival strategy that has made Lowell the subject of scores of newspaper articles magazine profiles TV and radio reports scholarly papers and book chapters Historic Preservation magazine has hailed the park as the premier rehabilitation model for gritty cities worldwide The Lowell story has much to teach the mid sized cities of the nation and the world Mill Power frames the Lowell comeback in its historical context and brings together the people who dreamed wrote designed pushed and cheered a new national park into existence along with those who came after with the charges of shaping the ideas into material form The volume features 100 photos many of them showing the before and after story of this revitalization Deep Travel David K. Leff,2009-04 In the hot summer of 2004 David Leff floated away from the routine of daily life just as Henry David Thoreau and his brother had done in their own small boat in 1839 Fortified with Thoreau s observations as revealed in A Week on the Concord and Merrimack Rivers Leff brought his own concept of mindful deep travel to these same New England waterways His first person narrative uses his ecological way of looking of going deep rather than far to show that our outward journeys are inseparable from our inward ones How we see depends on where we are in our lives and with whom we travel Leff chose his companions wisely In consecutive journeys his neighbor and friend Alan a veteran city planner his son Josh an energetic eleven year old and his

sweetheart Pamela a compassionate professional caregiver added their perspectives to Leff's own experiences as a government official in natural resources policy Not so much sight seeing as sight seeking together they explored a geography of the imagination as well as the rich natural and human histories of the rivers and their communities The heightened awareness of deep travel demands that we immerse ourselves fully in places and realize that they exist in time as well as space Its mindfulness enriches the experience and makes the voyager worthy of the journey Leff's intriguing contemplative deep travel along these historic rivers presents a methodology for exploration that will enrich any trip

Barry Goldwater and the Remaking of the American Political Landscape Elizabeth Tandy Shermer, 2013-02-28 Nearly four million Americans worked on Barry Goldwater's behalf in the presidential election of 1964 These citizens were as dedicated to their cause as those who fought for civil rights and against the Vietnam War Arguably the conservative agenda that began with Goldwater has had effects on American politics and society as profound and far reaching as the liberalism of the 1960s According to the essays in this volume it's high time for a reconsideration of Barry Goldwater's legacy Since Goldwater's death in 1998 politicians pundits and academics have been assessing his achievements and his shortcomings The twelve essays in this volume thoroughly examine the life times and impact of Mr Conservative Scrutinizing the transformation of a Phoenix department store owner into a politician de facto political philosopher and five time US senator contributors highlight the importance of power showcasing the relationship between the nascent conservative movement's cadre of elite businessmen newsmen and intellectuals and their followers at the grassroots or sagebrush level Goldwater who was born in the Arizona Territory in 1909 was deeply influenced by his Western upbringing With his appearance on the national stage in 1964 he not only articulated a new brand of conservatism but gave a voice to many Americans who were not enamored with the social and political changes of the era He may have lost the battle for the presidency but he energized a coalition of journalists publishers women's groups and Southerners to band together in a movement that reshaped the nation

Down to Earth Ted Steinberg, 2002-05-09 In this ambitious and provocative text environmental historian Ted Steinberg offers a sweeping history of our nation a history that for the first time places the environment at the very center of our story Written with exceptional clarity Down to Earth re envisions the story of America from the ground up It reveals how focusing on plants animals climate and other ecological factors can radically change the way that we think about the past Examining such familiar topics as colonization the industrial revolution slavery the Civil War and the emergence of modern day consumer culture Steinberg recounts how the natural world influenced the course of human history From the colonists attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good the author reminds readers that many critical episodes in our history were in fact environmental events He highlights the ways in which we have attempted to reshape and control nature from Thomas Jefferson's surveying plan which divided the national landscape into a grid to the transformation of animals crops and even water into commodities The text is ideal for courses in environmental history

environmental studies urban studies economic history and American history Passionately argued and thought provoking Down to Earth retells our nation s history with nature in the foreground a perspective that will challenge our view of everything from Jamestown to Disney World **Guide to U.S. Environmental Policy** Sally K. Packing Them In Sylvia Hood Washington, 2017-06-23 Sylvia Hood Washington's Packing Them In provides strong and often startling evidence of the depths and complexities of environmental racism in Chicago and offers an innovative historical explanation for how this social ill developed in nineteenth and twentieth century America Drawing from Michel Foucault's concept of power knowledge and from theories of racial formation Washington also demonstrates how the process through which some European immigrant groups were reclassified from non white to white over time allowed them to move out of spaces where they faced environmental injustice into spaces of environmental privilege This argument represents a significant contribution to environmental justice studies and suggests a comparative and relational ethnic studies approach to future treatments of the subject Packing Them In is a path breaking book and a welcome addition to the fields of environmental history and environmental justice studies David Naguib Pellow Dehlsen professor of Environmental Studies University of California Santa Barbara and author of Garbage Wars The Struggle for Environmental Justice in Chicago A pathbreaking book Sylvia Hood Washington uses Chicago as a case study of how human health inequalities in urban environments change over time In showing the ways white identity shaped exposure to environmental pollutants in the nineteenth and early twentieth centuries she provides historical context to the environmental racism identified in the United States in the late twentieth century Packing Them In is instructive for those seeking to understand the structural origins of the present struggle for environmental justice and a model for undertaking studies of urban environmental history that address the struggle This model remains as important today as it was when Packing Them In was first published Carl Zimring associate professor and coordinator of the Sustainability Studies Pratt Institute and author of Clean and White A History of Environmental Racism Packing Them In is a path breaking book that is a must read for anyone interested in understanding how the social political and economic dimensions of urban environmental issues evolve over time Packing Them In makes a significant contribution to the environmental justice literature as it challenges the notion that racism and inequalities arise solely from black white dynamics By using history to understand the evolution of racial and spatial dynamics and by embedding the work in Michel Foucault's theoretical framework of power and knowledge Washington demonstrates the importance of expanding traditional environmental justice frameworks in the analysis of case studies such as these Dorceta E Taylor James E Crowfoot collegiate professor of the University of Michigan School of Natural Resources and Environment

The Illusory Boundary Martin Reuss, Stephen H. Cutcliffe, 2010-09-20 The view of nature and technology inhabiting totally different even opposite spheres persists across time and cultures Most people would consider an English countryside or a Louisiana bayou to be natural though each is to an extent the product of technology Pollution widely thought to be a purely man made phenomenon results partly from natural processes All around us things from the natural world are brought into the human world At what point do

we consider them part of culture rather than nature And does such a distinction illuminate our world or obscure its workings This compelling new book challenges the view that a clear and unwavering boundary exists between nature and technology Rejecting this dichotomy the contributors show how the history of each can be united in a constantly shifting panorama where definitions of nature and technology alter and overlap In addition to recognizing the artificial divide between these two concepts the essays in this book demonstrate how such thinking may affect societies ability to survive and prosper The answers and ideas are as numerous as the landscapes they consider for there is no single path toward a more harmonious vision of technology and nature Technologies that work in one place may not in another Nature that is preserved in one community might become the raw material of technological progress somewhere else Add to this the fact that the natural world and technology are not passive players but are profoundly involved in cultural construction Understanding such dynamics not only reveals a new historical complexity it prepares us for coping with many of the most difficult and pressing social issues facing us today Contributors Peter Coates Craig E Colten Stephen H Cutcliffe Hugh S Gorman Betsy Mendelsohn Joy Parr Peter C Perdue Sara B Pritchard Martin Reuss William D Rowley Edmund Russell Joel A Tarr Ann Vileisis James C Williams Thomas Zeller

The Amoskeag Manufacturing Company Aurore Eaton ,2015-07-27 This book tells the story of the Amoskeag Manufacturing Company a corporation that played a major role in the history of the textile industry The story takes us from the Amoskeag s early origins as a small spinning mill at Amoskeag Falls on the Merrimack River in the early nineteenth century to its closing in the midst of the Great Depression From its incorporation as a stock corporation in 1831 through its bankruptcy in 1936 the company exerted tremendous influence over the landscape and the people of Manchester New Hampshire From preface

The Culture of Flushing Jamie Benidickson,2011-11-01 To most the flush of a toilet is routine the way we banish waste and ensure cleanliness It is safe efficient necessary nonpolitical and utterly unremarkable Yet Jamie Benidickson s examination of the social and legal history of sewage in Canada the United States and the United Kingdom demonstrates that the uncontroversial reputation of flushing is deceptive The Culture of Flushing is particularly relevant in a time when community water quality can no longer be taken for granted as it investigates and clarifies the murky evolution of waste treatment The Culture of Flushing is essential reading for specialists in environmental history environmental law public health engineering and public policy Those concerned with protecting water quality and the environment will also find it unique comprehensive and accessible

[The Place with No Edge](#) Adam Mandelman,2020-04-08 In *The Place with No Edge* Adam Mandelman follows three centuries of human efforts to inhabit and control the lower Mississippi River delta the vast watery flatlands spreading across much of southern Louisiana He finds that people s use of technology to tame unruly nature in the region has produced interdependence with rather than independence from the environment Created

over millennia by deposits of silt and sand the Mississippi River delta is one of the most dynamic landscapes in North America From the eighteenth century establishment of the first French fort below New Orleans to the creation of Louisiana s Coastal Master Plan in the 2000s people have attempted to harness and master this landscape through technology Mandelman examines six specific interventions employed in the delta over time levees rice flumes pullboats geophysical surveys dredgers and petroleum cracking He demonstrates that even as people seemed to gain control over the environment they grew more deeply intertwined with and vulnerable to it The greatest folly Mandelman argues is to believe that technology affords mastery Environmental catastrophes of coastal land loss and petrochemical pollution may appear to be disconnected but both emerged from the same fantasy of harnessing nature to technology Similarly the levee system s failures and the subsequent deluge after Hurricane Katrina owe as much to centuries of human entanglement with the delta as to global warming s rising seas and strengthening storms The Place with No Edge advocates for a deeper understanding of humans relationship with nature It provides compelling evidence that altering the environment whether to make it habitable profitable or navigable inevitably brings a response sometimes with unanticipated consequences Mandelman encourages a mindfulness of the ways that our inventions engage with nature and a willingness to intervene in responsible respectful ways

In a New Light Abigail Harrison Moore,R.W. Sandwell,2021-07-15 In the early 1970s a German study estimated that women expended as many calories cleaning their coal mining husbands work clothes as their husbands did working below ground arguably making the home as much a site of industrialized work as factories and mines But while energy studies are beginning to acknowledge the importance of social and historical contexts and to produce more inclusive histories of the unprecedented energy transitions that powered industrialization women have remained notably absent from these accounts In a New Light explores the vital place of women in the shift to fossil fuels that spurred the Industrial Revolution illuminating the variety of ways in which gender and energy intersected in women s lives in nineteenth and twentieth century Europe and North America From their labour in the home where they managed the adoption of new energy sources to their work as educators in electrical housecraft and their protests against the effects of industrialization women took on active roles to influence energy decisions Together these essays deepen our understanding of the significance of gender in the history of energy and of energy transitions in the history of women and gender By foregrounding women s energetic labours and concerns the authors shed new light on energy use in the past and provide important insights as societies move towards a carbon neutral future

Evolutionary History Edmund Russell,2011-04-11 We tend to see history and evolution springing from separate roots one grounded in the human world and the other in the natural world Human beings have however become probably the most powerful species shaping evolution today and human caused evolution in other species has probably been the most important force shaping human history This book introduces readers to evolutionary history a new field that unites history and biology to create a fuller understanding of the past than either can produce on its own

Evolutionary history can stimulate surprising new hypotheses for any field of history and evolutionary biology How many art historians would have guessed that sculpture encouraged the evolution of tuskless elephants How many biologists would have predicted that human poverty would accelerate animal evolution How many military historians would have suspected that plant evolution would convert a counter insurgency strategy into a rebel subsidy With examples from around the globe this book will help readers see the broadest patterns of history and the details of their own life in a new light
