alive and relevant The Nature of Capital and Income Irving Fisher, James Tobin, Thorstein Veblen, Edwin
Wilson, 2011-09-05 The Nature of Capital and Income was regarded by Schumpeter as one of three of Fisher's 1906 major
contributions of first class importance and originality The other two were Fisher's Mathematical Investigations 1892 and his
statistical method for measuring the marginal utility of income 1927 Fisher admitted that he had not appreciated the element
of time when he was writing his doctoral thesis 1892 and accordingly he had not understood the importance of distinguishing
between capital and income Just as accountants distinguish sharply between capital accounts or balance sheets relating to a
point in time and income accounts relating to a period of time Fisher came to realize that the theory of capital and income

should be built along similar lines Fisher's basic concept of capital is simple and comprehensive Capital embraces all stocks of material objects that yield services that human beings like Thus Fisher would include land and other natural resources as well as reproducible goods objects owned by households and governments as well as by businesses houses and other consumer durable goods as well as producers durables objects whose yields are always in kind like houses occupied by their owners as well as those whose yields are marketed for cash the bodies of human beings perhaps their minds too as well as nonhuman objects Contemporaries schooled in the classical trilogy of land labor capital found Fisher's comprehensive view hard to take The Concept of Income Fisher's nature of capital was controversial at the time but it is much less so now His nature of income defined as consumption was even more controversial then and it remains controversial to this day The Rate of Interest published the following year deserves Samuelson's judgment as the greater of the two books Most important is the idea that the value of an asset is the capitalization of the stream of future services expected to be thrown off by the asset James Tobin 1918-2002 recipient of the Nobel Memorial Prize in Economics in 1981 The book includes additional content A commentary adapted by James Tobin 1991 a review by Thorstein Veblen 1908 and another review by Edwin Bidwell Wilson 1908 of MIT [The Works of Irving Fisher](#) Irving Fisher,1997 [The Nature of Capital and Income \(Classic Reprint\)](#) Irving Fisher,2017-10-16 Excerpt from The Nature of Capital and Income A guide for finding wealth underlying given property rights A second guide One property right overlaid by another About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The Rate of Interest: Its Nature, Determination and Relation to Economic Phenomena** Irving Fisher,1907
