Maple, Bryan Norton, 2014-05-27 The great apes gorillas chimpanzees bonobos and orangutans are known to be our closest living relatives Chimpanzees in particular share 98 percent of our DNA and scientists widely agree that they exhibit intellectual abilities long thought to be unique to humans such as self awareness and the ability to interpret the moods and identify the needs of others The close relation of apes to humans raises important ethical questions Are they better protected in the wild or in zoos Should they be used in biomedical research Should they be afforded the same legal protections as humans *Great Apes and Humans* is the first book to present a spectrum of viewpoints on human responsibilities toward great apes A variety of field biologists academic scientists zoo professionals psychologists sociologists ethicists and legal scholars consider apes in both the wild and captivity They present sobering statistics on the declining numbers of wild apes specifically discussing the decimation of great ape populations due to wild game consumption They explore the role of apes in the educational missions of zoos as well as the need for sanctuaries for wild ape orphans and former research subjects After examining the social division between apes and humans from historical evolutionary and cognitive perspectives they conclude by reviewing the current moral and legal status of great apes as well as how apes cognitive skills inform these issues Although this provocative book contains many different opinions the uniting concern of the contributors is the safety and well being of great apes Only by continuing the dialogue so clearly presented here can we hope to ensure their future *The Sacred Depths of Nature* Ursula Goodenough, 2023 This eloquent volume reconciles our contemporary scientific understanding of reality with our timeless spiritual yearnings Addressing ideas like evolution emotions sexuality and death *The Sacred Depths of Nature* allows even non scientists to appreciate that the origins of life and the universe are no less meaningful in light of our scientific understanding of them This new edition offers a deepened consideration of emergent properties and emergent dynamics as well as an exploration of their role as the generators of life s complexity Goodenough also expands upon the ethic of ecomorality in a new chapter and incorporates new quotes figures and poems in her analysis *The Riddle of the Universe at the close of the nineteenth century* Ernst Haeckel, 2022-05-28 In *The Riddle of the Universe at the close of the nineteenth century* Ernst Haeckel delves into the mysteries of existence and the universe with a scientific and philosophical lens Published in 1899 the book explores the intersections of science religion and philosophy offering a comprehensive look at the fundamental questions that have puzzled humanity throughout history Haeckel s writing style is both articulate and thought provoking drawing upon his background as a renowned German

Kissing Cousins Frances Bartkowski,2008-09-18 Since DNA has replaced blood as the medium through which we establish kinship how do we determine with whom we are kin Who counts among those we care for The distinction between these categories is constantly in flux How do we come to decide those we may kiss and those we may kill Focusing on narratives of kinship as they are defined in contemporary film literature and news media Frances Bartkowski discusses the impact of stories of origin on our regard for nonhuman species She locates the role of totems and taboos in forming and re forming kinship categories groupings that enable us to tie the personal to the social and explores the bestiary among the oldest of literary forms The bestiary is the realm in which we allegorize the place of humans and other species a menagerie encompassing animals we know as well as human animal chimeras and other beings that challenge the natural order of the world Yet advances in reproductive technologies the mapping of genomes and the study of primates continually destabilize these categories and recast the dynamic between the natural and the cultural Bartkowski highlights the arbitrariness of traditional kinship arrangements and asks us to rethink our notions of empathy and ethics She shows how current dialogues concerning ethics and desire determine contemporary attitudes toward issues of care and suggests a new framework for negotiating connection and conflict
