Nature and Narrative Markku Lehtimäki, 2025-05-23 The book explores environmental issues in twenty first century Anglophone fiction and how those issues are dealt with by specific literary means It proposes a reciprocal relationship between nature and narrative the idea according to which nature both informs and inspires artistic creations while literary designs and rhetoric also shape our ideas and perceptions of the natural environment It is argued that in order to address design and rhetoric in environmental texts we need a close analysis of those world shaping functions of literary narratives that unite ecocritical and narratological interests The author presents readings of contemporary novels and their varying ways of seeing nature through narrative devices and fictional minds The novels discussed in the book are Hilary Mantel's *Wolf Hall* Toni Morrison's *A Mercy* Ian McGuire's *The North Water* Barbara Kingsolver's *The Lacuna* Paul Harding's *Tinkers* and Enon J M Coetzee's *Elizabeth Costello* Ian McEwan's *Solar* and Jenny Offill's *Weather*

Prohens-Tomás,Fernando Nuez,2007-12-06 The production and consumption of vegetables has expanded dramatically in the last years with a global growth in the production of more than 50% in the last decade a rate of increase that is much higher than for other plant commodities Vegetables constitute an important part of a varied and healthy diet and provide significant amounts of vitamins antioxidants and other substances that prevent diseases and contribute to an improvement in the quality of life In consequence it is expected that in the coming years vegetable crops production will continue its expansion Improved varieties have had a main role in the increases in yield and quality of vegetable crops In this respect the vegetables seed market is very dynamic and competitive and predominant varieties are quickly replaced by new varieties Therefore updated information on the state of the art of the genetic improvement of specific crops is of interest to vegetable crops breeders researchers and scholars During the last years an immense quantity of new knowledge on the genetic diversity of vegetables and the utilization of genetic resources breeding methods and techniques and on the development and utilization of modern biotechnologies in vegetables crop breeding has accumulated and there is a need of a major reference work that synthesizes this information This is our objective

Jonah Amy Erickson,2021-05-18 The dominant reading of the book of Jonah that the hapless prophet Jonah is a lesson in not trying to run away from God oversimplifies a profoundly literary biblical text argues Amy Erickson Likewise the more recent understanding of Jonah as satire is problematic in its own right laden as it is with anti Jewish undertones and the superimposition of a Christian worldview onto a Jewish text How can we move away from these stale interpretations to recover the richness of meaning that belongs to this short but noteworthy book of the Bible This Illuminations commentary delves into Jonah s reception history in Christian Jewish and Islamic contexts while also exploring its representations in visual arts music literature and pop culture After this thorough contextualization Erickson provides a fresh translation and exegesis paving the way for pastors and scholars to read and utilize the book of Jonah as the provocative richly allusive and theologically robust text that it is

*Ancient Roman Literary Gardens* K. Sara Myers,2024 Beginning with Cicero and Varro and ending with Statius and Pliny the Younger this chapter offers a chronological investigation of the ways in which real and literary gardens developed from the first century BCE to

the first century CE as a means of elite masculine self representation and the reactions of elite Roman men to the increased social and cultural power of villa and horti estates and their grounds Gardens served as powerful symbols of wealth and as creative displays of the cultural aspirations of their owners in ways that challenged traditional definitions of gardens and of Roman manliness Since these large scale gardens are primarily associated with leisure otium authors are concerned with describing and justifying their activities in these sites as befitting Roman masculine ideals We can trace a change in attitude towards leisure and the private display of wealth and consequently gardens largely attributed to changes in the socio political circumstances of the Roman elite in the works of Statius and his contemporary Pliny the Younger who use laudatory descriptions of extensive villas and grounds as a means of expressing social and literary power **The Motivated Sign**

Olga Fischer, Max Nänny, 2001-01-01 This volume a sequel to Form Miming Meaning 1999 offers a selection of papers given at the second international symposium on iconicity Amsterdam 1999 In the light of semiotic linguistic and literary theory the studies gathered here investigate how iconicity works on all levels of language in literary texts and other forms of verbal discourse They investigate among other subjects the semiotic foundations of iconicity the role played by iconicity in language evolution and in the way words are positioned syntactically Special consideration is given to the iconic nature of metaphor and the mise en abyme to iconically motivated punctuation and other typographic matters such as the manipulation of colour fonts and spacing in advertising and in poetry Other studies show how iconicity influences Shakespeare s rhetoric the structural design of Margaret Atwood s writings and the changing fashions in fictional landscape description Thus these analyses of the motivated sign represent yet another strong challenge to Saussure s dogma of arbitrariness Jakobson

Myth and Meaning in Early Taoism N. J. Girardot, 1988 Myth and Meaning in Early Daoism examines some of the earliest texts associated with the Daoist tradition primarily the Daode jing Zhuangzi and Huainanzi from the outlook of the comparative history of religions and finds a kind of thematic and soteriological unity rooted in the mythological symbolism of hundun the primal chaos being and principle that is foundational for the philosophy and practice of the Dao as creatio continua in cosmic social and individual life Dedicated to the proposition that ancient Chinese texts and traditions are often best understood from a broad interdisciplinary and interpretive perspective this work when it was written challenged many prevailing conceptions of the Daode jing and Zhuangzi as primarily philosophical texts without any religious significance or affinity with the later sectarian traditions While controversial and at times playfully provocative the methodology and findings of this book are still important for the ongoing scholarship about Daoism in China and the world *Preromanticism* Marshall Brown, 1991 Using an outmoded term in an entirely new way Preromanticism seeks the common ground of British literature from 1740 to 1798 not in foreshadowings of Romanticism but in incomplete discoveries and in impediments to expression that Romanticism was to lift Featuring readings of masterpieces in all genres that draw widely on recent innovations in literary theory it highlights the variety of experimentation in a transitional epoch **Science and Literature**

**in Cormac McCarthy's Expanding Worlds** Bryan Giemza,2023-05-04 Bryan Giemza challenges the myth of the solitary genius both in scientific and humanistic endeavors and demonstrates how Cormac McCarthy is the exceptional figure whose work allows and encourages us to interrogate the marriage of the sciences and humanities Drawing from previously unsurfaced archival connections as well as a range of primary sources and interview subjects including those close to McCarthy Giemza places McCarthy s work within contemporary scientific discourse and literary criticism Timely and innovative in both content and structure the volume includes a biographical examination of the writer s love of science and the path that led him to the Santa Fe Institute and offers a rare look behind its closed doors The book probes the STEM subjects with chapters focused on technology engineering and math within and throughout McCarthy s fictional universe and biography The final chapter explores McCarthy s friendship with Guy Davenport and their shared interest in creating a unified aesthetic theory alongside McCarthy s essays and most recent literary projects The Passenger and Stella Maris In arguing that science and art are connected by aesthetics Giemza confirms the profound truth of McCarthy s unwavering belief that There s a beauty to science and a language of human understanding that transcends words     **Near**

**Loaded Table : Representations of Food in Roman Literature** Emily Gowers,1993-01-21 This book offers a novel and unconventional approach to Roman culture through food or rather food as it is represented in literature Food is not generally thought of as the noblest of literary subjects and this view is a legacy from the Romans so it is curious that Roman writers chose so persistently to depict their society at the dinner table Why this was so and what effect the inclusion of food had on the status of the literary texts that described it are among the questions discussed here The book also addresses problems that arise when a material subject is translated into words and contains fresh interpretations of Latin texts that have been unjustly undervalued comedy satire epigrams letters and iambics While often regarded as something trivial and gross food was in fact one of the most suggestive images for Roman civilization
