Nature Design And Science The Status Of Design In Natural Science:

Nature, Design, and Science Del Ratzsch, 2001-03-01 Although the scientific illegitimacy of supernatural design is typically asserted with enormous confidence and vigor there has been surprisingly little actual work on such key foundational issues as even what design is and on specific criteria for assessing its legitimacy or lack as a scientific concept However intelligent supernatural design is again surfacing in discussions both of anthropic principles and of certain types of biological complexity This book develops a definition of design explicates the more specific concept of supernatural design defends a general criterion for scientific legitimacy and argues that in some cases the concept of intelligent supernatural design can meet the relevant requirements for scientific legitimacy

Science and Religion Gary B. Ferngren, 2002-08 Written by distinguished historians of science and religion the thirty essays in this volume survey the relationship of Western religious traditions to science from the beginning of the Christian era to the late twentieth century This wide ranging collection also introduces a variety of approaches to understanding their intersection suggesting a model not of inalterable conflict but of complex interaction Tracing the rise of science from its birth in the medieval West through the scientific revolution the contributors describe major shifts that were marked by discoveries such as those of Copernicus Galileo and Isaac Newton and the Catholic and Protestant reactions to them They assess changes in scientific understanding brought about by eighteenth and nineteenth century transformations in geology cosmology and biology together with the responses of both mainstream religious groups and such newer movements as evangelicalism and fundamentalism The book also treats the theological implications of contemporary science and evaluates recent approaches such as environmentalism gender studies social construction and postmodernism which are at the center of current debates in the historiography understanding and application of science Contributors Colin A Russell David B Wilson Edward Grant David C Lindberg Alnoor Dhanani Owen Gingerich Richard J Blackwell Edward B Davis Michael P Winship John Henry Margaret J Osler Richard S Westfall John Hedley Brooke Nicolaas A Rupke Peter M Hess James Moore Peter J Bowler Ronald L Numbers Steven J Harris Mark A Noll Edward J Larson Richard Olson Craig Sean McConnell Robin Collins William A Dembski David N Livingstone Sara Miles and Stephen P Weldon

The Naturalness of Belief Charles Taliaferro, Paul Copan, 2018-11-13 Despite its name naturalism as a world view turns out to be rather unnatural in its strict and more consistent form of materialism and determinism This is why a number of naturalists opt for a broadened version that includes objective moral values intrinsic human dignity consciousness beauty personal agency and the like But in doing so broad naturalism begins to look more like theism As many strict naturalists recognize broad naturalism must borrow from the metaphysical resources of a theistic world view in which such features are very natural common sensical and quite at home in a theistic framework The Naturalness of Belief begins with a naturalistic philosopher's own perspective of naturalism and naturalness The remaining chapters take a multifaceted

approach in showing theism's naturalness and greater explanatory power. They examine not only rational reasons for theism's ability to account for consciousness, intentionality, beauty, human dignity, free will, rationality, and knowledge; they also look at common-sensical, existential, psychological, and cultural reasons in addition to the insights of the cognitive science of religion.

The Creation of Heaven and Earth George H. van Kooten, 2004-12-01 This volume discusses the narrative of the creation of heaven, earth, and light in the first chapter of Genesis and focuses extensively on its later interpretations in different cultural and religious contexts. After an introductory paper on the text of Genesis itself, the authors deal with receptions of this theme in the Prophet Jeremiah, Early Judaism, and the Dead Sea Scrolls. They comment on creation accounts in the Ancient Near East, Ancient Greece, and ancient philosophy, reconstructing the earliest known receptions of Genesis 1 in ancient philosophers like Numenius and Galen. They trace its influence in the Johannine, Petrine, and Pauline traditions of Early Christianity and follow it right through the Middle Ages up till the present-day discussion of design in Nature.

Jewish Faith and Modern Science Norbert M. Samuelson, 2008-10-17 In *Jewish Faith and Modern Science*, renowned Jewish philosopher and rabbi Norbert Samuelson argues that modern Jewish philosophy has died—that it has failed to address the challenges to traditional beliefs posed by scientific advances and is therefore no longer relevant to Jews today. Samuelson confronts these challenges head-on, critically reflecting on how all of the forms of contemporary Judaism, from orthodox to liberal to secular to new age, can address questions raised by the latest scientific advances. Considering questions ranging from the existence of the soul to the relationship between God and particle physics to the debate over when life begins and ends, Samuelson paves the way for a rebirth of Jewish philosophy applicable to life in the modern world.

Where Now, O Biologists, is Your Theory? Andrew P. Porter, 2006-03-31 Intelligent Design creationism faults evolutionary biology for being naturalistic, but ID is in its own strange way just as naturalistic. Like the man who can't find his car keys at night and looks for them under a street light though he last saw the keys someplace else, intelligent design creationism seeks acts of God within the gaps in our scientific knowledge. Creation takes the goodness of this world on faith, but Creationism works to get out of the challenge of the doctrine of creation not to embrace it.

The Legitimacy of Miracle Robert A. Larmer, 2013-11-05 The core contention of The

Legitimacy of Miracle is that a priori philosophical dismissals of the possibility or probability of justified belief in miracles fail. Whether or not it is rational to believe that events best understood as miracles actually occur is not to be decided on the basis of armchair theorizing but rather on the basis of meticulous examination of the evidence. Such examination however needs to be set free from unwarranted assumptions that miracles are impossible, improbable or improper. Philosophical analysis can play an important role in clearing away conceptual underbrush and question begging presuppositions but it cannot take the place of detailed consideration of historical and contemporary evidence. Robert Larmer demonstrates that the proper role of philosophy as regards to the belief in miracles is to provide an in principle rejection of in principle arguments either for or against. The arguments contained in this book will be of particular interest to students and scholars of philosophy, theology, history and religious studies though it is written in a style accessible to anyone interested in a philosophical examination of belief in miracles.

Three Views on Christianity and Science Zondervan, 2021-01-12. When it comes to relating Christianity to modern Western culture perhaps no topic is more controversial than the relationship between Christianity and science. Outside the church the myth of a backwards anti science Christianity is very common in popular culture and can poison the well before a fruitful dialogue can begin. Within the church opposing viewpoints on the relation between Christianity and science often lead to division. *Three Views on Christianity and Science* addresses both types of conflict. Featuring leading evangelical scholars this book presents three primary options for the compatibility of Christianity and science and models constructive dialogue on the surrounding controversial issues. The highlighted contributors and their views are: Michael Ruse representing the Independence View. When functioning correctly science and Christian theology operate independently of each other seeking answers to different questions through different means. Alister McGrath representing the Dialogue View. Though the natural sciences and Christian philosophy and theology function differently they can and should inform each other. Bruce L Gordon representing the Constrained Integration View. Science, philosophy and theology all contribute to our understanding of reality. Their interactions constrain each other and together present an optimally coherent and integrated picture of reality. By engaging with the viewpoints of the contributors readers will come away with a deeper understanding of the compatibility of science and Christianity as well as of the positions of those who disagree with them. Scholars, students, pastors and interested laypeople will be able to make use of this material in research, assignments, sermons and lessons, evangelism and apologetics. The Counterpoints series presents a comparison and critique of scholarly views on topics important to Christians that are both fair minded and respectful of the biblical text. Each volume is a one stop reference that allows readers to evaluate the different positions on a specific issue and form their own educated opinion.
