Sociology and the Environment Alan Irwin, 2013-04-25 Can sociology help us to tackle environmental problems What can sociology tell us

about the nature of the environment and about the origins and consequences of environmental risks hazards and change In this important new book Alan Irwin maps out this emerging field of knowledge teaching and research He reviews the key sociological debates in the field and sets out a new framework for analysis and practice Among the themes examined are constructivism and realism sustainable development and theories of the risk society Readers are also introduced to communities at risk institutional regulation and the environmental consequences of technology Particular topics for discussion include genetically modified organisms nuclear power pesticide safety and the local hazards of the chemical industry Rather than maintaining a fixed boundary between nature and society Irwin highlights the hybrid character of environmental issues and emphasizes the role of social and cultural factors within environmental policy Combining theoretical discussion and case studies with a sensitivity to the concerns of environmental policy and practice *Sociology and the Environment* provides an excellent introduction to an expanding and immensely important field It will be a valuable text for students and scholars in sociology geography environmental studies and related disciplines [Sharing Nature's Interest](#)

Nicky Chambers,Craig Simmons,Mathis Wackernagel,2014-01-14 Ecological footprinting is rapidly being adopted as an effective and practical way to measure our impact on the environment in both large and small scale planning and development This is an introduction to ecological footprint analysis showing how it can be done and how to measure the footprints of activities lifestyles organizations and regions Case studies illustrate its effectiveness at national organizational individual and product levels *An Introduction to Environment, Society and Sustainability* Helen Hazen,Paul Sutton,2024-10-07 This timely and innovative book delves into the complex interplay of human activities and natural limits in generating today s sustainability challenges By contrasting the pressures of growing populations with ecological footprints associated with consumption the volume navigates the contested terrain where human societies generate environmental impacts Adorned with illustrative figures examples and case studies throughout this book presents insightful analysis of ecological economic technological and social justice responses to the challenges faced by human civilization including land degradation climate change pollution and overexploitation of natural resources Many of these issues are wicked problems characterized by incomplete information multiple stakeholders and contested approaches to addressing them In simple terms sustainability issues are an interplay between population growth and rising consumption which are placing impossible demands on finite resources Potential solutions to the crisis are split between green growth approaches that emphasize technology and institutional capacity to guide economic growth in more sustainable ways and degrowth approaches that call for a fundamental rethinking of the way we structure society and generate value This book emerged from a student seminar where undergraduate and graduate students highlighted sustainability topics of concern helped consider their framing and then assisted with co writing several of the chapters The volume encourages readers to consider structural questions that underpin sustainability dilemmas and begins with four theoretical frameworks for understanding sustainability issues ideas

from the natural sciences the population consumption debate economic frameworks and ethical approaches It then uses a systems approach to apply these theoretical ideas to complex global systems such as the atmosphere oceans and agriculture This volume will be of pivotal interest to students scholars and academics in the fields of environmental studies environment and society human geography and environmental geography as well as those with an interest in these areas more generally

Indian Directory of Environmental Organisations Vandana S.,1997 **Nature** Noel Castree,2005 Exploring the shifting ways in which geographers have studied nature this book emphasizes the relationships and differences between human geography physical geography and resource and hazards geography The first to consider the topic of nature in modern geography as a whole this distinctive text looks at all its major meanings from the human body and psyche through to the non human world and develops the argument that student readers should abandon the idea of knowing what nature is in favour of a close scrutiny of what agendas lie behind competing conceptions of it It deals with amongst others the following areas the idea of nature the nature of geography de naturalization and re naturalization after nature As everything from global warming to GM foods becomes headline news the use and abuse of nature is on the agenda as never before Synthesizing a wealth of diverse and complex information this text makes the significant theories debates and information on nature accessible to students of geography environmental studies sociology and cultural studies Functional Literacy Ludo Th Verhoeven,1994-01-01 The purpose of the volume is to open up new perspectives in the study of literacy by bringing together current research findings from linguistics psychology sociology and anthropology The book divides into five parts The first part deals with theoretical questions related to the definition and the modeling of the construct of functional literacy The second part goes into the notion of literacy development Both societal and individual aspects of literacy development are taken into account In the next two parts the actual achievement of literacy in various regions of the world is dealt with In part 3 the focus is on attaining literacy in developing societies and in part 4 on attaining literacy in industrialized societies In the final part the question is raised how functional literacy can be promoted through education Starting from a cross cultural perspective the central issue is how standards of functional literacy can be established throughout the world **Yearbook of Sustainable Smart Mining and Energy 2022** Walter Frenz,Axel Preuße,2023-11-30 This book covers several aspects of the application of Sustainable Development Goals to mining related subjects The included works range from methods to assess and implement sustainability to discussions of legal impacts and relations as well as technological developments and outlooks First the challenges and opportunities of clean energy transition in the African mining sector are described With regard to the assessment of sustainable developments this book includes the applications of the sieving method the concept of thermodynamics and the United Nations Framework Classification to mining projects and case studies The implementation of Sustainable Development Goals into academic project work and education of geo engineers is covered as well The legal topics contain discussions of corporate climate liabilities and extraterritorial legal responsibilities as well as an analysis of

The Sustainable Smart Mining and Energy Yearbook is not only aimed at researchers and professionals but at all who want to get an overview of current important technical and legal topics in this field.

Environment, Society, and The Compleat Angler Marjorie Swann, 2023-08-31. First published in 1653, *The Compleat Angler* is one of the most influential environmental texts ever written. Addressing a politically and religiously polarized nation devastated by warfare, disease, ecological degradation, and climate change, Izaak Walton's famous fishing treatise stages a radical thought experiment: how might humanity's enhanced relationship with the natural world generate a new kind of sustaining and sustainable social order beyond the traditional boundaries of the church, the state, and the biological family? Challenging the current scholarly consensus that reads Walton's *how to manual* as a conservative polemic camouflaged by fishlore, Marjorie Swann examines this richly complicated portrayal of the natural world through an ecocritical lens and explores other neglected aspects of Walton's writings, including his depictions of social hierarchy, gender, and sexuality. In the process, Swann analyzes a host of noncanonical environmental texts and provides a groundbreaking reappraisal of Charles Cotton's Part II of *The Compleat Angler*. This study extends the hydrological turn in early modern ecocriticism and demonstrates how, as a genre, angling manuals provide new insights into the environmental, cultural, social, and literary history of early modern England. Taking its place alongside landmark works of ecocriticism such as *Green Shakespeare* and *Milton and Ecology*, this fresh and timely reassessment of *The Compleat Angler* rightly ranks Izaak Walton among the most important environmental writers of the early modern era.
