Nature Of Botswana:

The Nature of Botswana Alec C. Campbell, International Union for Conservation of Nature and Natural Resources. Field Operations Division, 1990 *The Nature of Botswana : a Guide to Conservation and Development* ,1990 *The Nature of Politics* Annette A. LaRocco, 2024-04-16 This case study of Botswana focuses on the state building qualities of biodiversity conservation in southern Africa Drawing on extensive fieldwork Annette A LaRocco argues that discourses and practices related to biodiversity conservation are essential to state building in the postcolonial era These discourses and practices invoke the ways the state exerts authority over people places and resources enacts and remakes territorial control crafts notions of ideal citizenship and identity and structures economic relationships at the local national and global levels The book s key innovation is its conceptualization of the conservation estate a term most often used as an apolitical descriptor denoting land set aside for the purpose of conservation LaRocco argues that this description is inadequate and proposes a novel and much needed alternative definition that is tied to its political elements The components of conservation control over land policing of human behavior and structuring of the authority that allows or disallows certain subjectivities render conservation a political phenomenon that can be analyzed separately from considerations of nature or wildlife In doing so it addresses a gap in the scholarship of rural African politics which focuses overwhelmingly on productive agrarian dynamics and often fails to recognize that land nonuse can be as politically significant and wide reaching as land use Botswana is an ideal empirical case study upon which to base these theoretical claims With 39 percent of its land set aside for conservation Botswana is home to large populations of wildlife particularly charismatic megafauna such as the largest herd of elephants on the continent Utilizing more than two hundred interviews participant observation and document analysis this book examines a series of conservation policies and their reception by people living on the conservation estate These phenomena include securitized antipoaching enforcement a national hunting ban 2014 19 restrictions on using wildlife products forced evictions from conservation areas limitations on mobility and freedom of movement the political economy of Botswana s wildlife tourism industry and the conservation of globally important charismatic megafauna species **Assessment of the Status of Transboundary Natural Resources Management Activities in Botswana** Zuma Chengeta, 2003 **The complete travel guide for Botswana** , At YouGuide we are dedicated to bringing you the finest travel guides on the market meticulously crafted for every type of traveler Our guides serve as your ultimate companions helping you make the most of your journeys around the world Our team of dedicated experts works tirelessly to create comprehensive up to date and captivating travel guides Each guide is a treasure trove of essential information insider insights and captivating visuals We go beyond the tourist trail uncovering hidden treasures and sharing local wisdom that transforms your travels into extraordinary adventures Countries change and so do our guides We take pride in delivering the most current information ensuring your journey is a success Whether you re an intrepid solo traveler an adventurous couple or a family eager for new

Miescher, 2016-08-12 This book brings together recent and ongoing empirical studies to examine two relational kinds of politics namely the politics of nature i.e. how nature conservation projects are sites on which power relations play out and the politics of the scientific study of nature These are discussed in their historical and present contexts and at specific sites on which particular human environment relations are forged or contested This spatio temporal juxtaposition is lacking in current research on political ecology while the politics of science appears marginal to critical scholarship on social nature Specifically the book examines power relations in nature related activities demonstrates conditions under which nature and science are politicised and also accounts for political interests and struggles over nature in its various forms The ecological socio political and economic dimensions of nature cannot be ignored when dealing with present day environmental issues Nature conservation regulations are concerned with the management of flora and fauna as much as with humans Various chapters in the book pay attention to the ways in which nature science and politics are interrelated and also co constitutive of each other They highlight that power relations are naturalised through science and science related institutions and projects such as museums botanical gardens wetlands parks and nature reserves **The regional travel guide for Lobatse**
