Thomistic Metaphysics Charles A. Hart,2023-02-15 One of the major objectives of this book is to make Thomistic metaphysics an inquiry into the act of existing the act of to be exercised by all beings to some degree more understandable to the man of ordinary intellectual training Therefore the various problems of metaphysics and their solutions are presented in the simplest terms possible with special emphasis on their significance for the contemporary mind *Hegel and Heidegger on Nature and World* Raoni Padui,2023-04-24 The philosophical concepts of nature and world have overlapped one another in a myriad of ways throughout the history of Western philosophy Nevertheless modernity has constructed a decisive philosophical dichotomy between the domain of nature and the domain of the human world as a response to the revolutions of the natural sciences in the seventeenth century In *Hegel and Heidegger on Nature and World* Raoni Padui investigates the responses to this distinction between nature and world in the works of Hegel and Heidegger Both philosophers attempt to heal the wounds of modernity and to reconcile the human historical world to the domain of nature and both refuse to accept the dichotomy between nature and world seeking to offer a way in which humans can inhabit a meaningful world without being alienated from the nature that conditions it However the difference in their modes of reconciliation illustrates the options opened up by modern philosophy either a Hegelian path of self determination that traces our historical emancipation from the natural domain or a Heideggerian rethinking of nature that seeks a renewed proximity to the domain of things

Nietzsche on Mind and Nature Manuel Dries,P. J. E. Kail,2015-07-09 This volume presents new essays exploring important aspects of Nietzsche s philosophy in connection with two major themes mind and nature A team of leading experts address questions including What is Nietzsche s conception of mind How does mind relate with the rest of nature And what is Nietzsche s conception of nature They all express the thought that Nietzsche s views on these matters are of great philosophical value either because those views are consonant with contemporary thinking to a greater or lesser extent or because they represent a rich alternative to contemporary attitudes The essays engage with Nietzsche s metaphysics his philosophy of mind in light of contemporary views the question of panpsychism in *Beyond Good and Evil* 36 the rejection of dualism in favour of monism in particular a monism of value Nietzsche s positions on consciousness and embodied cognition in light of recent cognitive science a conception of freedom and agency based on an intrinsically motivating embodied sense of self efficacy a Nietzschean account of valuing understood as drive induced affective orientations of which an agent approves the idea of resentment conceived as a process of intentional not reflectively strategic self deception about one s

own conscious mental states and a defence of a Nietzschean naturalism *The Classic and Creativity* Jiang Zhuyu, 2025-09-04 This book explores the complex dialectical interplay between the classic and creativity through a unique comparative lens that bridges Chinese and Western literary traditions The interplay between the classic and creativity has been a fundamental question in literary criticism although readers may be more familiar with discussions from the Western literary tradition such as T S Eliot s seminal essay Tradition and the Individual Talent In this comparative study the author examines the parallel discussions in both Chinese and Western literary traditions highlighting the inherently dialectical relationship between classics and creativity She introduces the rich traditions of poetry and poetics from ancient China to modern times equally illuminating is her commentary on Western literary critics such as Alexander Pope William Wordsworth T S Eliot and Oscar Wilde Her engagement with literary works such as Shakespeare s *The Tempest* and the *Book of Poetry* and with literary practices such as adaptation and commentary is also remarkable as she addresses the contemporary challenges of studying the classics in an age of world literature Clear and accessible this work in East West comparative poetics will be valuable to scholars and students of literary theory comparative literature and world literature *Narrating Nature: Zapatista Encounters and the Remaking of Human-Environmental Relations* Beatriz Lopes Cerqueira, 2024-11-17 This book focuses on the stories of Zapatistas as new ecological subjects The Zapatistas have been extensively studied as a movement with a specific political consciousness derived from historical marginalizing land policies in Mexico that propelled the creation and rise of the movement and later their autonomy project However these factors have also been involved in the formation of their particular ecological consciousness By focusing on the Zapatista case specifically on the stories of the Tzotzil people of Chiapas this book contributes to a deeper understanding of the existence and importance of alternative and more caring ways of thinking of and relating to nature This teaches us the possibility of human nature relations that defy the dominant logic based on the capitalist exploitative discourse that continues to promote the destruction of the planet and its peoples In the light of increasing environmental degradation and the climate crisis among others and the intertwined augmented pressures on the global population s well being human Nature relationships have become a topical issue These relationships are intrinsically politico ecological currently shaped by capitalist modernity that functions based on extractivism Therefore it is imperative to shift towards more caring human Nature relationships which are being developed in and through political counter movements Taking the Zapatista movement as an example this book explores other ways of thinking and acting towards Nature that allows for the development of non exploitative human Nature relationships It follows the argument that the Zapatista fight is a politico ecological one in which the movement s political aims and decisions are grounded in a Mayan derived indigenous worldview of Nature and in their influence in defining more caring human Nature relationships and that therefore their fight is also expressed through the ways they put these relationships in practice particularly in their ways of doing agriculture through agroecology based on values such as care respect and democracy In

turn these help to guarantee not only their resistance to the dominant extractivist system but also their autonomy the main aim of the civil part of the Zapatista movement
