Nature Thoughts A Selection:

Thoughts selected from the Writings of H. M. Horace MANN (Secretary to the Board of Education of the State of Massachusetts.), 1867 *Our reasonable service, spiritual thoughts, selected and arranged by J.H. Burn* William John Knox-Little, 1901 Thoughts: God, Science, and Human Nature Abdul Q. K. Kundi, 2023-11-05 Religion philosophy and science sometimes appear to contradict each other The deeper reality is that these operate in tandem to provide a holistic appreciation of life Natural disasters as well as human failings like war and border walls create an emotional crisis individually and collectively Humanity is going through one of these hysterical phases at the advent of the 21st century We are experiencing terrorism global conflict climate change economic meltdown and breakdown of old liberal political order The emergence of a COVID 19 pandemic has contributed to accelerating the crisis Social distancing has isolated us in bubbles that seem to be on the verge of bursting There are growing signs of the psychological social and emotional breakdown faced by the communities These tough times invoke questions about the purpose of life humanity and our place in the universe We need to reconnect with our soul and be comfortable with the nature of things This book is an effort to help make sense of life and our place in it **Ecological Footprints in Literature: An Excursion into Selected Nature Writings and Nature Novels** Dr. Archana R. Kadiyan, 2022-08-22 The book provides a comprehensive view of the environmental discourses that are found in the literary representations of the natural world The book presents an in depth analysis of the symbolic manifestations of the outer world in various genres of literature such as nature novels and nature or ecological writings It deeply captures the mutual interactions that occur between the human and the non human world that tend to influence each other s actions and processes By exploring the ecocritical leanings and tracing all the phases of Anthropocene the book takes its readers for a deep excursion into the beauteous dynamic natural and overtly spiritual world of Nature as exhibited in the writings such as Thoreau s *Walden* Khushwant Singh s *Nature Watch* and *Starhawk s The Earth Path* which is contrasted against the eco catastrophic world of Rachel Carson s *Silent Spring* An insightful and analytical journey into the world of more unique portrayals of the ecological world that tend to strike a balance between two distinct worlds the real and the imaginative the spiritual and the material as well as the natural and the man made as reflected in the nature novels George Eliot s *Mill on the Floss* Khushwant Singh s *I Shall not Hear the Nightingale* *Starhawk s Fifth Sacred Thing* and Ernest Callenbach s *Ecotopia A Novel* The book thus with its underpinning wisdom will be an interesting and more enlightening read for the critics academicians and researchers *Selected Work of Ralph Waldo Emerson (Set of 3 Books) (Essays/ Nature/ Society and Solitude: Twelve Chapters) Vol-1* Ralph Waldo Emerson, 2022-05-30 *Selected Work of Ralph Waldo Emerson Set of 3 Books Essays Nature Society and Solitude Twelve Chapters Vol 1* by Ralph Waldo Emerson Essays This book comprises a collection of Ralph Waldo Emerson s essays covering a wide range of topics such as self reliance nature friendship and the human experience Emerson s essays are known for their profound insights and philosophical

Selected Writings Karl Marx, Lawrence H. Images of the Economy of Nature, 1650-1930 Antonello La Vergata, 2023-10-05 The book discusses ideas concerning the order and balance of nature or economy of nature from the late 17th century to the early 20th century The perspective taken is broad longue dur e and interdisciplinary and reveals the interplay of scientific philosophical moral and social ideas The story begins with natural theology dating roughly to the onset of the so called Newtonian Revolution and ends with the First World War The cut off date has been chosen for the following reasons the war changed the state of things affecting man s way of looking at and relating to nature both directly and indirectly indeed it put an end to most applications of Darwinism to society and history including interpretations of war as a form of the struggle for existence The author presents an overview of the different images of nature that were involved in these debates especially in the late 19th century when a large part of the scientific community paid lip service to Darwinism while practically each expert felt free to interpret it in his own distinct way The book also touches on the so called social Darwinism which was neither a real theory nor a common body of ideas and its various views of society and nature s economy Part of this book deals with the persistence of moralizing images of nature in the work of many authors One of the main features of the book is its wealth of detailed quotations In this way the author gives the reader the opportunity to see the original statements on which the author bases his discussion The author privileges the analysis of different positions over a historiography offering a merely linear narrative based on general implications of ideas and theories To revisit the concept of the so called Darwinian Revolution we need to examine the various perspectives of scientists and others their language and so to speak the lenses they used when reading facts and theories The book ends with some general reflections on Darwin and Darwinisms the plural is important as a case study on the relationship between intellectual history the history of science and contextual history Written by a historian this book really gives new multidisciplinary perspectives on the Darwinian Revolution
