The Snowy Torrents Nick Logan, Dale Atkins, 1996 **Bulletin - Colorado Geological Survey** Colorado Geological Survey, 1981 *Geologic Hazards of Moab-Spanish Valley, Grand County, Utah* Michael D. Hylland, William Mulvey, 2003
Moab Valley and the contiguous Spanish Valley comprise a popular residential and recreational area in east central Utah

Geologic processes that created the rugged and scenic landscape of Moab Spanish Valley are still active today and can be hazardous to property and life To address development in areas with geologic hazards the Utah Geological Survey UGS conducted a geologic hazards investigation to provide information to Moab City and Grand County to help guide development and reduce losses from geologic hazards This report includes maps of Moab Valley and the northern and central parts of Spanish Valley that provide information on geologic hazards to assist homeowners planners and developers in making informed decisions The maps show areas where hazards may exist and where site specific studies are advisable prior to development The maps are for planning purposes only and do not preclude the necessity for site investigations Site specific studies by qualified professionals engineering geologists geotechnical engineers hydrologists should evaluate hazards and if necessary recommend hazard reduction measures Because of the small scale of the maps some hazard areas are not shown hazard studies are therefore recommended for all critical facilities for example hospitals schools fire stations including those outside the mapped hazard areas
