Empire's Nature Amy R. W. Meyers, Margaret Beck Pritchard, 2012-12-01 Completed in 1747 Mark Catesby's Natural History of Carolina, Florida and the Bahama Islands was the first major illustrated publication on the flora and fauna of Britain's American colonies. Together with his Hortus Britannico Americanus 1763 which detailed plant species that might be transplanted successfully to British soil, Catesby's Natural History exerted an important though often overlooked influence on the development of art, natural history and scientific observation in the eighteenth century. Inspired by a major traveling exhibition of Catesby's watercolor drawings from the Royal Library Windsor Castle, this collection of interdisciplinary essays considers Catesby's endeavors as a naturalist, artist, scientific explorer, experimental horticulturist, ornamental gardener and early environmental thinker in terms of the interests held by the various overlapping communities in which he functioned, particularly as those interests related to the British colonial enterprise. The contributors are David R. Brigham, Joyce E. Chaplin, Mark Laird, Amy R. W. Meyers, Therese O. Malley and Margaret Beck Pritchard. Originally written in 1911 and later revised by a group of naturalists in 1939, this classic work remains as valid and helpful today as it was back then. Anna Botsford Comstock crafted this handbook primarily for elementary school teachers who had limited knowledge of common plants, animals and the natural environment. Whether you're in an urban setting or the rural outback, this treasure trove of information provides insights into the living and nonliving things that surround us.
