The Habitats Directive in its EU Environmental Law Context Charles-Hubert Born, An Cliquet, Hendrik Schoukens, Delphine Misonne, Geert Van Hoorick, 2014-11-27 This book analyses the Habitats Directive one of the most prominent piece of EU environmental legislation of the past decades Seen by some as the cornerstone of Europe s nature conservation policy among other measures the Directive established the so called Natura 2000 ecological network which covers more than 18% of the surface of the EU However despite the fact the Directive was adopted over twenty years ago only 17% of the protected habitats and species in Europe are being adequately protected while 10 60 % of animal species remain under threat In light of the limited success and the contested nature of the Habitats Directive so far this book examines the successes and failures of the Habitats Directive from a legal and political angle The book brings together international experts to consider the application implementation and future of the Habitats Directive in order to assess whether the Habitats Directive is resilient enough to tackle biodiversity loss in the twenty first century Particular emphasis is put on the legal regime attached to the Natura 2000 network and its possible impact on land development and the relationship between the Habitats Directive and other topics including liability for ecological damage and transboundary nature conservation

The Farm as Natural Habitat Dana L. Jackson, Laura Jackson, 2002-04 The Farm as Natural Habitat is a vital new contribution to the debate about agriculture and its impacts on the land Arising from the conviction that the agricultural landscape as a whole could be restored to a healthy diversity the book challenges the

notion that the dominant agricultural landscape bereft of its original vegetation and wildlife and despoiled by chemical runoff is inevitable if we are to feed ourselves Contributors bring together insights and practices from the fields of conservation biology sustainable agriculture and environmental restoration to link agriculture and biodiversity farming and nature in celebrating a unique alternative to conventional agriculture Rejecting the idea that ecological sacrifice zones are a necessary part of feeding a hungry world the book offers compelling examples of an alternative agriculture that can produce not only healthful food but fully functioning ecosystems and abundant populations of native species Contributors include Collin Bode George Boody Brian DeVore Arthur Tex Hawkins Buddy Huffaker Rhonda Janke Richard Jefferson Nick Jordan Cheryl Miller Heather Robertson Carol Shennan Judith Soule Beth Waterhouse and others The Farm as Natural Habitat is both hopeful and visionary grounded in real examples and guided by a commitment to healthy land and thriving communities It is the first book to offer a viable approach to addressing the challenges of protecting and restoring biodiversity on private agricultural land and is essential reading for anyone concerned with issues of land or biodiversity conservation farming and agriculture ecological restoration or the health of rural communities and landscapes
