Boston Confucianism Robert C. Neville, 2000-09-28 Argues that Confucianism can be important to the contemporary global conversation of philosophy and should not be confined to an East Asian context **Expanding Process** John H. Berthrong, 2008-10-23 Expanding Process explores how comparative philosophy expands our understanding of the critical themes of process change and transformation John H Berthrong examines how notions of process manifest and shape the classical Confucianism of Xunzi the early medieval Daosim of the Liezi and Zhu Xi s Song Dynasty daoXue Teaching of The Way Berthrong links these various Chinese views of process and transformation to contemporary debates in the American process pragmatic and naturalist philosophical movements Stressing how our pluralistic world calls for comparing and even appropriating insights from diverse cultural traditions Berthrong contends that comparative philosophy and theology can broaden the intellectual frontiers and foundations of any serious student of contemporary global thought **Signs in the Dust** Nathan Lyons, 2019-02-28 Modern thought is characterized by a dichotomy of meaningful culture and unmeaning nature Signs in the Dust uses medieval semiotics to develop a new theory of nature and culture that resists this familiar picture of things Through readings of Thomas Aquinas Nicholas of Cusa and John Poinsett John of St Thomas it offers a semiotic analysis of human culture in both its anthropological breadth as an enterprise of creaturely sign making and its theological height as a finite participation in the Trinity which can be understood as an absolute cultural nature Signs in the Dust then extends this account of human culture backwards into the natural depth of biological and physical nature It puts the biosemiotics of its medieval sources along with Felix Ravaisson s philosophy of habit into dialogue with the Extended Evolutionary Synthesis that is emerging in contemporary biology to show how all living things participate in semiosis so that that a cultural dimension is present through the whole order of nature and the whole of natural history It also retrieves Aquinas doctrine of intentions in the medium to show how signification can be attributed in a diminished way to even inanimate nature with the ontological implication that being as such should be reconceived in semiotic terms The phenomena of human culture are therefore to be understood not as breaks with a meaningless nature but instead as heightenings and deepenings of natural movements of meaning that long precede and far exceed us Against the modern divorce of nature and culture Signs in the Dust argues that culture is natural and nature is cultural through and through *Wilhelm Reich* Robert S. Corrington, 2003-07-14 Publisher Description *Nature's Religion* Robert S. A Semiotic Theory of Theology and Philosophy Robert S. Corrington, 2000-11-09 The concern of this work is with developing an alternative to standard categories in theology and philosophy especially in terms of how they deal with nature Avoiding the polemics of much contemporary reflection on nature it shows how we are connected to nature through the unconscious and its unique way of reading and processing signs Spinoza's key distinction between *natura naturans* and *natura naturata* serves as the governing framework for the treatise Suggestions are made for a post Christian way of understanding religion Robert S Corrington's work represents the first sustained attempt to bring together the fields of semiotics depth psychology pragmatism and a post Monotheistic theology of nature Its focus is on how signification functions in human and non human orders of infinite nature Our connection with the infinite is described in detail especially as it relates to the use of sign systems

recognize nature's self-transforming potential Ecstatic naturalism is a philosophical theological perspective deeply seated in a semiotic cosmology and psychosemiosis and it radically and profoundly probes into the mystery of nature's perennial self-fissuring of nature natured and nature naturing Edited by Leon Niemoczynski and Nam T. Nguyen this collection aims to allow readers to see what can be done with ecstatic naturalism and what directions interpretations and creative uses that doing can take A thorough exploration of the prospects of ecstatic naturalism this book will appeal to scholars of Continental philosophy religious naturalism and American pragmatism **Riding the Windhorse** Robert S. Brown, Nancey C. Murphy, H. Newton Malony, 1997-12-01 As science crafts detailed accounts of human nature what has become of the soul This collaborative project strives for greater consonance between contemporary science and Christian faith Outstanding scholars in biology genetics neuroscience cognitive science philosophy theology biblical studies and ethics join here to offer contemporary accounts of human nature consistent with Christian teaching Their central theme is a nondualistic account of the human person that does not consider the soul an entity separable from the body scientific statements about the physical nature of human beings are about exactly the same entity as are theological statements concerning the spiritual nature of human beings For all those interested in fundamental questions of human identity posed by the present context this volume will provide a fascinating and authoritative resource **Nature's Transcendence and Immanence** Jea Sophia Oh, Marilyn Lawrence, 2017-12-22 What does it mean for nature to be sacred Is anything supernatural or even unnatural Nature's Transcendence and Immanence A Comparative Interdisciplinary Ecstatic

Naturalism discusses nature's divinizing process of unfolding and folding through East West dialogues and interdisciplinary methodologies. Nature's selfing god-ing processes are the sacred that is revealed as nature's transcendent and immanent dimensions. Each chapter of *Nature's Transcendence and Immanence: A Comparative Interdisciplinary Ecstatic Naturalism* shares a part of nature's sacred folds that are complexes within nature that have unusual semiotic density. These discussions serve to help restore a better relationship to nature as a whole through an innovative combination of research and ideas from a variety of traditions and disciplines. This collection not only introduces ecstatic naturalism and deep pantheism as sacred practices of philosophy and theology but also invites a broader audience from a wide range of academic disciplines such as neuro psychoanalysis, aesthetics, mythology, neuroscience, and artificial intelligence (AI). *Nature's Sublime* Robert S. Corrington, 2013-03-14. In this book, the author argues that the concept and experience of beauty and the sublime are meant to replace that of religious experience and revelation. Deep Pantheism Robert S. Corrington, 2015-12-09. This book is a study in a new form of religious naturalism called Deep Pantheism, which has roots in American Transcendentalism but also in phenomenology and Asian thought. It argues that the great divide within nature is that between nature naturing and nature natured; the former term defined as Nature creating itself out of itself alone, while the latter term defined as The innumerable orders of the World. Explorations are made of the connections among the unconscious of nature, the archetypes, and the various layers of the human psyche. The Selfing process is analyzed using the work of C. G. Jung and Otto Rank. Evolution and involution are compared as they relate to the Encompassing, and the priority of art over most forms of religion is argued for.

The Blackwell Companion to Modern Theology Gareth Jones, 2008-04-15. In this major reference work, a team of the world's leading theologians provides a powerful overview of modern theology. Covers theology's relation to other disciplines, the history of theology, major themes, key figures, and contemporary issues. Can be used as the basis for an introductory course or as an essential reference source. **Existence** Robert Cummings Neville, 2014-06-05. The second volume in a trilogy advancing a systematic philosophical theology, this book explores the realities of human existence articulated by religion. Religion writes Robert Cummings Neville articulates existential predicaments and provides venues for ecstatic fulfillment. Like its companion volumes treating ultimacy and religion, *Existence* advances a systematic philosophical theology to address first-order questions found in the array of Axial Age religions. Issues arising in the major religious traditions are explored through a complex array of philosophical approaches. This second volume shows religion to be the engagement of ultimate realities common to all human beings. Neville finds five problematics relative to ultimate boundary conditions of the human world: the contingency of existence, living under obligation, the quest for wholeness, engagement with others, and the meaning or value in life. Common to all human beings and hence religion, the engagement with realities is also historically and culturally bound, becoming simultaneously socially constructed religions. Readers will find Neville's philosophical theology both bold and enlightening, running counter to dominant intellectual trends while richly informed by a long and fruitful

engagement with theology philosophy and religion East and West **Pandemonium Tremendum** James E. Huchingson,2010-02-01 James E Huchingson takes computer and information science seriously in this constructive theology Central to his reflection is an understanding of the primordial chaos Pandemonium Tremendum not as destructive but as the source out of which God creates sustains and empowers creatures to become co creators **Holistic Nursing** Barbara Montgomery Dossey,Lynn Keegan,Mary A. Wildman,2016-04-01 Science and Religious Anthropology explores the convergence of the biological sciences human sciences and humanities around a spiritually evocative

naturalistic vision of human life The disciplinary contributions are at different levels of complexity from evolution of brains to existential longings and from embodied sociality to ecosystem habitat The resulting interpretation of the human condition supports some aspects of traditional theological thinking in the world's religious traditions while seriously challenging other aspects Wesley Wildman draws out these implications for philosophical and religious anthropology and argues that the modern secular interpretation of humanity is most compatible with a religious form of naturalistic humanism This book resists the reduction of meaning and value questions while taking scientific theories about human life with full seriousness It argues for a religious interpretation of human beings as bodily creatures emerging within a natural environment that permits engagement with the valuational potentials of reality This engagement promotes socially borne spiritual quests to realize and harmonize values in everything human beings do from the forging of cultures to the crafting of personal convictions
