Natures Web Rethinking Our Place On Earth:

Nature's Web Peter Marshall, 2015-02-12 This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement from ancient religions and philosophies to modern science and ethics and synthesizes them into a new philosophy of nature in which to ground our moral values and social action. It traces the origins and evolution of the dominant worldview that has built our industrial technocratic man centered civilization and brought us to the current ecological crisis. At the same time it uncovers an alternative cultural tradition in the world's different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the inter relatedness of all living things. Finally this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an organic and sustainable society in harmony with nature. As ecological disasters continue to threaten our planet becoming worse with every passing moment of indifference it has become clear that we must take action. We must change our relationship with nature and return to the days when our lives were intimately connected to and dependent upon the natural world. *Nature's Web* lays the foundations for that change by explaining where our complex ideas about nature come from why they are wrong and what we can do to change them.

economies Addressing law's relationship to land and natural resources through its property regime Lawscape engages the abstract philosophy of property law with the material environments of place Whilst most accounts of land law have contributed cultural analyses of historical and political value predominantly through the lens of property rights few have contributed analyses of the natural consequences of property law through the lens of property responsibilities Lawscape does this by addressing the relationship between the commodification of land instituted in and by property law and ecological and economic histories Its synthesis of property law and environmental law provides a genuinely transdisciplinary analysis of the particular cultural concepts and practices of land tenure that have been created and exported across the globe

Johansen, 1996-05-14 For more than a decade scholars have debated the question of whether American Indian confederacies primarily the Iroquois helped influence the formation of U S basic law The idea has sparked lively debate in the public arena as well with Canadian diplomat Durling Voyce Jones contending it shows a paradigm shift in our thinking Patrick Buchanan calling it idiocy and George Will saying it's fiction For the first time this bibliography brings together some 450 citations on the debate The work describes the debate in the words of one of its major participants Bruce E Johansen author of three other books on the subject The bibliography also takes the reader back to suggestions of the idea long before the contemporary debate Lakota author Charles Eastman brought up the subject in 1919 Mohawk teacher Ray Fadden developed it in the 1940s and John F Kennedy touched on it in 1960 Bringing the debate to its full flower in the present day the bibliography illustrates both fervent support and equally emphatic denial in the academy and the public press The book is both a scholarly tool and a lively exploration of issues bearing on the study of history and multiculturalism

Anarcho-primitivism , Environmental Stewardship Robert James Berry, 2006-03-13 Is stewardship a useful way of regarding our relationship with our environment or is it a dangerous excuse for plunder Is it possible for us to be effective stewards This book gathers together expositions of stewardship with criticisms of the concept and adds other contributions written especially for this collection **The Future of Post-Human Waste** Peter Baofu, 2013-01-03 Is waste or trash really

so useless that as William Faulkner once wrote read everything trash classics good and bad and see how they do it If it is good you ll find out If it s not throw it out the window TE 2012 Interestingly this critical view of waste or trash can be contrasted with an opposing observation by Isaac Bashevis Singer who once famously said that the waste basket is the writer s best friend TE 2012a Contrary to these opposing views and other ones as will be discussed in the book waste in relation to both uselessness and usefulness is neither possible or impossible nor desirable or undesirable to the extent that the respective ideologues on different sides would like us to believe Of course this challenge to the opposing views of waste does not imply that waste has no practical value or that those interdisciplinary fields related to waste like epidemiology global warming waste management low carbon economics ethical consumerism resource recovery freeganism environmental justice space debris and so on are unimportant Of course neither of these extreme views is reasonable Rather this book offers an alternative better way to understand the future of waste especially in the dialectic context of uselessness and usefulness while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other More specifically this book offers a new theory that is the transfigurative theory of waste to go beyond the existing approaches in a novel way If successful this seminal project is to fundamentally change the way that we think about waste in relation to uselessness and usefulness from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate

In Search of Consistency: Ethics and Animals Lisa Kemmerer, 2006-08-01 In Search of Consistency is the most comprehensive examination to date of moral theories and animal ethics This large volume unveils and explores the work of Tom Regan rights theory Peter Singer utilitarian Paul Taylor environmental ethics and Andrew Linzey theology not only digging deep into critical analysis of extant theories but feeding the flames of a now flourishing dialogue at the intersections of animal ethics environmental ethics and religious ethics This book ultimately presents a new approach the Minimize Harm Maxim which exposes through real and hypothetical scenarios common practices as patently irrational and raises questions few authors are willing to entertain about the way we value life and our attitudes toward death At every turn In Search of Consistency reminds that ethics carry an expectation of action that ethics are intended to guide how we live

Ecology and Environment in European Drama Downing Cless, 2010-05-11 Looking at European drama through an ecological lens this book chronicles nature and the environment as primary topics in major plays from ancient to recent times Cless focuses on the few yet well known plays in which nature is at stake in the action or the environment is a dramatic force Though theater predominantly explores human and cultural themes these plays fully display the power of the other than human world and its endangerment during the history of Europe While offering a broad overview the book features extensive case studies of several playwrights plays and eco theater productions Aristophanes The Birds Marlowe s Doctor Faustus Shakespeare s A Midsummer Night s Dream and The Tempest and Giraudoux s The Madwoman of Chaillot In each case Cless

connects nature in the play to nature in the life of the playwright based on biographical research into the understanding of natural philosophy and awareness of the immediate environment that influenced the specific play The book is one of the first of its kind in a growing field of ecocriticism and emerging eco studies of theater

Trees in Anglo-Saxon England Della Hooke, 2010 Trees played a particularly important part in the rural economy of Anglo Saxon England both for wood and timber and as a wood pasture resource with hunting gaining a growing cultural role But they are also powerful icons in many pre Christian religions with a degree of tree symbolism found in Christian scripture too This wide ranging book explores both the real historical and archaeological evidence of trees and woodland and as they are depicted in Anglo Saxon literature and legend Place name and charter references cast light upon the distribution of particular tree species mapped here in detail for the first time and also reflect upon regional character in a period that was fundamental for the evolution of the present landscape Della Hooke is Honorary Fellow of the Institute for Advanced Research in Arts and Social Sciences at the University of Birmingham

The Environmental Crunch in Africa Jon Abbink, 2018-05-31 This book discusses the problems and challenges of environmental ecological conditions in Africa amidst the current craze of economic growth and development Africa s significant economic dynamics and growth trajectories are marked by neglect of the environment reinforcing ecological crises Unless environmental ecological and population growth problems are addressed as an integral part of developmental strategies and growth models the crises will accelerate and lead to huge costs in later years Chapters examine multiple emerging tension points all across the continent including the potential benefits and harm of growing urban based ecotourism the trajectory of labour saving technologies and the problems facing agro pastoralism Although environmental management and sustainability features of African rural societies should not be idealized functional traditional economies interests and management practices are often bypassed seen by state elites as inefficient and inhibiting growth In many regions the seeds are now sown for lasting environmental crises that will affect local societies that have rarely been given opportunity to claim accountability from the state regimes and donors driving these changes

Animals and World Religions Lisa Kemmerer, 2012-01-19 Despite increasing public attention to animal suffering human beings continue to exploit billions of animals in factory farms medical laboratories and elsewhere This wide ranging study shows how spiritual teachings in seven major religious traditions can help people consider their ethical obligations towards other creatures

River Pollution A.k.jain, 2009 Cities have been known by the rivers that flow nearby Landon and Thames Rome and the Traverse Paris and Seince Banaras and Ganga The Delhi and Yamuna sound unfamiliar although the river is the main source of water supply to the city and plays most crucial role in its growth The increase of population and activity in the Yamuna watershed is placing increasingly exigent demands upon its ecology

Malthus Godwin has been recently recognized however as the most capable exponent of philosophical anarchism an original moral thinker a pioneer in socialist economics and progressive education and a novelist of great skill His long life straddled two centuries Not only did he live at the center of radical and intellectual London during the French Revolution he also commented on some of the most significant changes in British history Shaped by the Enlightenment he became a key figure in English Romanticism Basing his work on extensive published and unpublished materials Peter Marshall has written a comprehensive study of this flamboyant and fascinating figure Marshall places Godwin firmly in his social political and historical context he traces chronologically the origin and development of Godwin s ideas and themes and he offers a critical estimate of his works recognizing the equal value of his philosophy and literature and their mutual illumination The picture of Godwin that emerges is one of a complex man and a subtle and revolutionary thinker one whose influence was far greater than is usually assumed In the final analysis Godwin stands forth not only as a rare example of a man who excelled in both philosophy and literature but as one of the great humanists in the Western tradition
