Naval Review 1985:

Inadvertent Escalation Barry R. Posen, 2014-01-13 In this sobering book Barry R Posen demonstrates how the interplay between conventional military operations and nuclear forces could in conflicts among states armed with both conventional and nuclear weaponry inadvertently produce pressures for nuclear escalation Knowledge of these hidden pressures he believes may help some future decision maker avoid catastrophe Building a formidable argument that moves with cumulative force he details the way in which escalation could occur not by mindless accident or by deliberate preference for nuclear escalation but rather as a natural accompaniment of land naval or air warfare at the conventional level Posen bases his analysis on an empirical study of the east west military competition in Europe during the 1980s using a conceptual framework drawn from international relations theory organization theory and strategic theory The lessons of his book however go well beyond the east west competition Since his observations are relevant to all military competitions between states armed with both conventional and nuclear weaponry his book speaks to some of the problems that attend the proliferation of nuclear weapons in longstanding regional conflicts Optimism that small and medium nuclear powers can easily achieve stable nuclear balances is he believes unwarranted **The Gulf Tanker War** Nadia El-Sayed

El-Shazly, 2016-07-27 In the 1984 Tanker War Iraq used its superiority in airpower as an instrument in naval warfare in a strategy designed to end combat Iraq hoped to weaken Iran's economy and internationalize the war to force it to cease fighting or remove the government negotiations would follow with Baghdad in a position of strength Although the Iran Iraq War was first and foremost a ground war an argument can be made that the Tanker War contributed to the 1988 ceasefire

A. M. Rodger, Jeremiah Ross Dancy, Benjamin Darnell, Evan Wilson, 2016 An important book presenting the latest insights by the leading world authorities on naval history This book

presents a wide range of new research on many aspects of naval strategy in the early modern and modern periods. Among the themes covered are the problems of naval manpower, the nature of naval leadership and naval officers' intelligence, naval training and education and strategic thinking and planning. The book is notable for giving extensive consideration to navies other than those of Britain, its empire and the United States. It explores a number of fascinating subjects including how financial difficulties frustrated the attempts by Louis XIV's ministers to build a strong navy, how the absence of centralised power in the Dutch Republic had important consequences for Dutch naval power, how Hitler's relationship with his admirals severely affected German naval strategy during the Second World War and many more besides. The book is a Festschrift in honour of John B. Hattendorf for more than thirty years. Ernest J. King, Professor of Maritime History at the US Naval War College and an influential figure in naval affairs worldwide. N. A. M. Rodger is Senior Research Fellow at All Souls College, Oxford. J. The Falklands War Daniel K. Griban, 2015-08-01

The Falklands War is an ideal showcase for how British policy evolved in the 1970s and 1980s. The background of the dispute over the island group in the remote South Atlantic, called Las Malvinas by the Argentines, is given first, then the events that precipitated the 1982 conflict and extensive examination of the military aspects of the war are provided. An overview follows of the many hypotheses offered for the British motivation to recapture the Falklands, showing that only those theories pertaining to the British perception of their national honor and the defense of democratic principles are significant. The Falklands War did not result in a dramatic shift in British defense policy but did show the importance of external developments and political realism in policy formation and these considerations are fully detailed here.

The Pursuit of Peace: Science, Law, and Art

Anthony R. Wells, 2024-03-21. 2022-2023 witnessed tragedies on a huge scale precipitated by human weakness, folly and wickedness exacerbated by nature that caused catastrophic earthquakes, hurricanes, floods and destruction and loss of life on enormous scales. Dominating this era of destruction was the February 2022 Russian invasion of Ukraine followed in October 2023 by a Middle East crisis and war of enormous proportions. These events brought into sharp focus the precipitous, reckless and thoroughly evil actions of a relatively very small number of human beings that led and instigated actions that have caused the deaths of hundreds of thousands of innocent human beings caught up in events not of their choosing. The sum of the parts make the whole and each of us, each individual, can make a difference. We can collectively change the world for the

better countering the evil worst intentions and actions of those who precipitate death destruction and human suffering on enormous scales History is replete with those who made a difference and showed and led the way to peace and harmony This story is about how two individuals in totally widely different ways can make a difference To these two lives is added the dimension of a crucial human endeavor that has marked our progress and development since the earliest times the role of art as a human virtue a creative life form that underlies humankind s ability to come to terms with our existence and our progress through time The art aspect is very different seen through the lens of good and bad and unified in the theme of achieving peace and that which is right after turmoil and downright evil The story challenges us to review our world and what each of us may do to enhance peace to look beyond the daily routine that most of us follow by the sheer nature of our circumstances and find ways and means by which we may all contribute albeit perhaps in small maybe insignificant ways in the greater scheme of things though nonetheless significant The reason is simple Each of us can make a difference in our own individual way and together collectively the sum of us all can truly make a huge difference The pursuit of peace is not an imagery ideal It is a fundamental necessity that behooves us all to help maintain for the sake of our world children grandchildren and all those whom we love and care about This story is about hope and how peace can be shaped by positive and courageous human endeavor

The Role of the Royal Navy in South America, 1920-1970 Jon Wise,2014-01-30

This book demonstrates the importance of the presence of the Royal Navy in South America Historically there have been no treaty obligations and few strategic considerations in the region yet it is frequently referred to as forming part of Britain s unofficial empire The role of the Navy in supporting foreign relations and promoting commerce is examined during a period of the twentieth century which is often associated with the decline of the British Empire The Role of the Royal Navy in South America 1920 1970 shows how the Royal Navy reacted to changing circumstances during the post war decades by adopting a more pro active attitude towards the imperative of supporting naval exports It provides a scholarly investigation of this important peacetime role for the service and offers the first book length study of the Navy s involvement in the region during this period

The Royal Navy and the Capital Ship in the Interwar Period Joseph Moretz,2012-12-06 Joseph Moretz s innovative work focuses on what battleships actually did in the inter war years and what its designed war role in fact was In doing so the book tells us much about British naval policy and planning of the time Drawing heavily on official Admiralty records and private papers of leading officers the author examines the navy s operational experience and the evolution of its tactical doctrine during the interwar period He argues that operational experience combined with assumptions about the nature of a future naval war were more important in keeping the battleship afloat than conservatism in Navy

Defending The Fringe Jed C Snyder,2019-08-26 *Defending the Fringe* assesses the importance of the southern flank of NATO to the Western Alliance It discusses Western strategy toward the Persian Gulf and includes a brief historical sketch of U S regional security doctrines

Guarding Against Extremism in the 21st Century Anthony R. Wells, 2023-04-04 Anthony Wells shows in graphic terms how extremism can develop in a democratic and educated society with strong cultural and religious traditions and values A wide range of critical factors are examined that show how extremism can take root grow recruit all ages and take total control of society Dr Wells reveals how extremism can take root by devious and nefarious means in an era of electronic communications and an Internet that connects the world and therefore outside influences on those whose intent is to create and pursue extremism Media controls and influences are shown as means to absolutist ends and demagoguery as the means to evil ends We are graphically reminded that controlling public opinion by controlling media and all democratic outlets across all aspects of societal domains can deny the freedom of speech that is the sacred right of American society Extremism can grow like a cancer suddenly without warning in some cases and is there unchallenged because of the very nature of a free society protected by the First Amendment This is a must read book to ensure that we are all aware of the present dangers and how we may successfully anticipate and guard against extremism *Rickover: The Struggle for Excellence* Francis Duncan, 2021-06-17 Admiral Hyman G Rickover 1900-1986 the Father of the Nuclear Navy was born Chaim Godalia Rickover in eastern Poland to Jewish parents Fleeing Russian antisemitic pogroms in 1906 with his mother and sister he joined his father who had traveled to America since 1897 in New York City The family soon moved to Chicago where Rickover's father worked as a tailor Congressman Adolph Sabath a Czech Jewish immigrant nominated Rickover for appointment to the US Naval Academy Rickover passed the entrance exams and entered the Academy in 1918 After sea duty on several ships and submarines he served as head of the Electrical Section in the Bureau of Ships and in 1946 was sent to Oak Ridge to start working on nuclear naval propulsion reactors a program he would lead for the rest of his career He became a four star
