Nawruz New Day A Compilation:

Weekly Compilation of Presidential Documents ,2000-07-03 *Forgotten Experts* A. Tunç Şen,2025-05-20

Forgotten Experts offers a history of Ottoman court astrologers and traces their shifting authority and prestige over the long sixteenth century These individuals served the Ottoman court with their expertise in mathematical astronomical and astrological sciences distinguishing themselves from other occult practitioners and esoteric specialists While both prophecy and prognostication are attempts to map the terrain of the future the astrologers work did not claim spiritual weight as a prophecy but relied instead on methods of prediction developed from data and patterns elaborated through technical and scientific writings Drawing on extensive manuscript and archival records written in Ottoman Turkish Persian and Arabic A Tun en writes a history of science state formation and bureaucracy within the overarching tale of Ottoman imperial formation and protocols He invites readers to follow Ottoman court astrologers fluctuating careers as practitioners of a contentious science and shows how this class of learned individuals constructed its scientific authority despite numerous cultural societal and epistemic challenges In understanding the expertise of court astrologers we gain insight into the intricate social relations established and maintained between the men of knowledge and the men of rule between expertise and statecraft in the early modern Ottoman imperial context SSC MTS GK Previous Papers - 50 Papers - General Awareness Setwise Junior

Observations and Predictions of Eclipse Times by Early Astronomers J.M. Steele,2013-04-17 Eclipses have long been seen as important celestial phenomena whether as omens affecting the future of kingdoms or as useful astronomical events to help

in deriving essential parameters for theories of the motion of the moon and sun This is the first book to collect together all presently known records of timed eclipse observations and predictions from antiquity to the time of the invention of the telescope In addition to cataloguing and assessing the accuracy of the various records which come from regions as diverse as Ancient Mesopotamia China and Europe the sources in which they are found are described in detail Related questions such as what type of clocks were used to time the observations how the eclipse predictions were made and how these prediction schemes were derived from the available observations are also considered The results of this investigation have important consequences for how we understand the relationship between observation and theory in early science and the role of astronomy in early cultures and will be of interest to historians of science astronomers and ancient and medieval historians
