Forces of Change Henry Hobhouse, 2005-10-25 There are few books that have the insight and power to change the way we think *Forces of Change* is one In this updated edition Henry Hobhouse argues provocatively and most convincingly that modern history has been shaped less by the actions of human beings than by three natural forces population growth food supply and disease Together they form a self balancing triangle any change in the dimension of one side Hobhouse shows is and must be matched by changes in one or both of the other sides Using key examples from the history of the past five hundred years the author opens our eyes to new possibilities so that history as learned from our textbooks takes on a whole new light As original as it is ambitious *Forces of Change* examines history from the time of the Black Plague to the present day observing in each period and historical situation the relative roles of the three sides of the triangle The result is a work that is revealing eloquent and despite the seriousness of the subject always witty and eminently readable **Never Out of**

Season Rob Dunn, 2017-03-14 The bananas we eat today aren't your parents' bananas We eat a recognizable consistent breakfast fruit that was standardized in the 1960s from dozens into one basic banana But because of that the banana we love is dangerously susceptible to a pathogen that might wipe them out That's the story of our food today Modern science has brought us produce in perpetual abundance once rare fruits are seemingly never out of season and we breed and clone the hardiest best tasting varieties of the crops we rely on most As a result a smaller proportion of people on earth go hungry today than at any other moment in the last thousand years and the streamlining of our food supply guarantees that the food we buy from bananas to coffee to wheat tastes the same every single time Our corporate food system has nearly perfected the process of turning sunlight water and nutrients into food But our crops themselves remain susceptible to the nature's fury And nature always wins Authoritative urgent and filled with fascinating heroes and villains from around the world *Never Out of Season* is the story of the crops we depend on most and the scientists racing to preserve the diversity of life in order to save our food supply and us **A History of World Societies, Combined Volume** John P.
