Oil Gas Databook For Developing Countries:

Oil & Gas Databook for Developing Countries Derek Fee,2012-12-06 In order to alleviate their problems many less developed countries LDCs are endeavoring to develop to the full their energy resources and in particular their hydrocarbon resources However the development of these resources is hindered by many factors among which are the following badly established estimates of indigenous resources under exploration lack of competent Government institutions to monitor the hydrocarbon sector lack of local markets to exploit non oil hydrocarbon finds refineries which are outdated producing the wrong product mix and where economies of scale make upgrading difficult The purpose of this work is to examine the hydrocarbon sector in the African Caribbean and Pacific ACP group of countries An examination of such a diverse group of nations on a global scale is difficult since the group includes relatively rich countries such as Trinidad and Tobago with a GNP per capita of 4000 to the sub Saharan countries such as Mali with a GNP per capita of 120 No easy solutions will be presented to improve the present energy situation in these countries but the reasons for the lack of hydrocarbon development will be examined The work of the World Bank and similar international financial institutions will be assessed and a potted review of the hydrocarbon sector in each country will be presented

Oil & Gas Databook for Developing Countries Derek Fee,2014-10-05 The oil crises of 1973 and 1979 have had a profound effect on the economies of the less developed countries LDCs The African Carib bean and Pacific ACP countries associated with the European Com munity as joint signatories of the Lome conventions have suffered in equal measure with other LDCs Energy because of its contribution to national development is of primary importance to the ACP countries and since oil forms the basis of the energy sector in these countries any increase in price leads to considerable economic knock on effects The majority over 90% of the ACP countries are energy importers that means oil importers Their economies are based in the main on agriculture which normally contributes most to total GDP Exports from these countries are mainly primary commodities such as coffee cotton tea cereals tobacco copper zinc lead cobalt etc In most of the ACP nations exports of commodities comprise over four fifths of total merchandise exports Imports meanwhile consist mainly of capital goods including transport equipment manufactures petroleum and food stuffs As a result of the international recession falling commodity prices and the increase in crude oil prices the balance of payments position of these countries has deteriorated sharply over the past few years The resulting shortage of foreign exchange prevents many nations from importing sufficient raw materials and capital equipment for their industries Consequently plant utilisation rates are running at very low levels

Upstream Oil and Gas in Ghana Thomas Kojo Stephens,2023-05-12 This book explores the myriad issues that play out in the upstream petroleum industry of Ghana from a legal perspective Focusing on Ghana as an emerging petroleum country Thomas Kojo Stephens begins by examining whether the existing constitutional framework will be effective in governing the expanding oil and gas sector Drawing on various approaches proffered by other experts in the field Stephens looks at

possible institutional structures that could be put in place and juxtaposes these ideas with the experience of Ghana to test the efficacy of these proposals He also explores the types of contractual frameworks currently implemented in Ghana for comparison with other emerging petroleum economies examining the barriers to effectiveness novel provisions that must be incorporated and lessons learned from other regions Finally the book highlights how vital it is for the Ghanaian State to monitor the use of petroleum revenue and make ethical investment decisions that prioritize the interests of Ghanaian citizens Upstream Oil and Gas in Ghana will be of great interest to students and scholars of energy law and policy oil and gas management and African Studies more broadly as well as those working in the upstream petroleum industry Petroleum and Marine Technology Information Guide J.
