Footprints of Fallen Giants - Pathways to Extinction in North American History Clay Sherrod, 2016-08-26 Footprints is about an evolution revolution the non living world to the living tiny organisms of earliest Earth each striving to have enough precious time to evolve so they might survive long enough to resist the effects of a changing world And yes it is a story about Dinosaurs But the story being about evolution has an unhappy ending for the great Dinosaurs of the Cretaceous For what is surely natural reasons as well as self imposed doom by the creatures themselves they fell fate to Extinction just had many plants and animals had almost 200 million years earlier This is not just the story of Dinosaurs and their extinction all of the biological world is subject to and ultimately succumbs to demise through the processes of environment and nature Today the possibilities of extinction are greatest because of the introduction of the newest form of life on Earth humans who have the capability of altering an otherwise natural progression of this world we live on

Thomas, 2023-08-21 The Path to a Modern South Walter L. Buenger, 2010-06-28 The forces that turned Northeast Texas from a poverty stricken region into a more economically prosperous area Winner Texas State

Historical Association Coral H Tullis Memorial Award for best book on Texas history 2001 Federal New Deal programs of the 1930s and World War II are often credited for transforming the South including Texas from a poverty stricken region mired in Confederate mythology into a more modern and economically prosperous part of the United States By contrast this history of Northeast Texas one of the most culturally southern areas of the state offers persuasive evidence that political economic and social modernization began long before the 1930s and prepared Texans to take advantage of the opportunities presented by the New Deal and World War II Walter L Buenger draws on extensive primary research to tell the story of change in Northeast Texas from 1887 to 1930 Moving beyond previous more narrowly focused studies of the South he traces and interconnects the significant changes that occurred in politics race relations business and the economy and women s roles He also reveals how altered memories of the past and the emergence of a stronger identification with Texas history affected all facets of life in Northeast Texas

Presidents and Presidencies in American History Jolyon P. Girard, 2019-10-07

This innovative encyclopedia explores the life and times of America's forty-five presidents from the first administration to that of Donald Trump. Forty-five men have served as President of the United States since George Washington swore the oath of office in 1789 in New York City. Some have proved exceptional leaders, and others have not. Some have faced serious crises, both foreign and domestic. Franklin Roosevelt was elected to four terms, leading the country through a major economic depression and a world war, while one held the office for only a single month. Each, however, played a key role in the evolution of United States history. Each of their histories, therefore, remains a critical civics lesson to consider. This four-volume encyclopedia provides an expansive analysis of the life and times of each United States president in chronological order, from George Washington to Donald Trump. Each chapter includes a timeline, a biographical sketch, a historical overview, and an analytical essay concerning the president and his presidency. Each also includes a substantial selection of related primary documents, presenting important presidential speeches and correspondence. A suggested reading list for further study of each president rounds out each entry.

Pathways to Exploration National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Division on Engineering and Physical Sciences, Space Studies Board, Aeronautics and Space Engineering Board, Committee on Human Spaceflight, 2014-09-30

The United States has publicly funded its human spaceflight program on a continuous basis for more than a half century, through three wars and a half dozen recessions, from the early Mercury and Gemini suborbital and Earth orbital missions to the lunar landings and thence to the first reusable winged crewed spaceplane that the United States operated for three decades. Today the United States is the major partner in a massive orbital facility, the International Space Station, that is becoming the focal point for the first tentative steps in commercial cargo and crewed orbital space flights. And yet the long-term future of human spaceflight beyond this project is unclear. Pronouncements by multiple presidents of bold new ventures by Americans to the Moon, to Mars, and to an asteroid in its native orbit have not been matched by the same commitment that accompanied President Kennedy's now-fabled 1961 speech, namely the substantial increase in NASA funding needed to make it happen. Are we still committed to advancing human spaceflight? What should a long-term goal be, and what does the United States need to do to achieve it? *Pathways to Exploration* explores the case for advancing this endeavor, drawing on the history of rationales for human spaceflight, examining the attitudes of stakeholders and the public, and carefully assessing the technical and fiscal

realities This report recommends maintaining the long term focus on Mars as the horizon goal for human space exploration With this goal in mind the report considers funding levels necessary to maintain a robust tempo of execution current research and exploration projects and the time resources needed to continue them and international cooperation that could contribute to the achievement of spaceflight to Mars According to Pathways to Exploration a successful U S program would require sustained national commitment and a budget that increases by more than the rate of inflation In reviving a U S human exploration program capable of answering the enduring questions about humanity s destiny beyond our tiny blue planet the nation will need to grapple with the attitudinal and fiscal realities of the nation today while staying true to a small but crucial set of fundamental principles for the conduct of exploration of the endless frontier The recommendations of Pathways to Exploration provide a clear map toward a human spaceflight program that inspires students and citizens by furthering human exploration and discovery while taking into account the long term commitment necessary to achieve this goal

American/Medieval Goes North Gillian R. Overing,Ulrike Wiethaus,2019-10-07 One of the great virtues of *American Medieval Goes North* is its wide range of contributors with fascinatingly diverse relationships to the main terms of analysis There are academic scholars poets filmmakers tribal elders teachers at various levels there are Indigenous people people from settler colonial cultures expats immigrants Their analytic and imaginative encounters with the North catch at the intensely symbolic and political charge of that locus At a time when Medieval Studies cannot afford to ignore the period s popular uptake cannot continue with business as usual in the face of white supremacists brazen appropriations of the Middle Ages this volume points to new possibilities for grappling with the uneasy relationships between the American and the medieval Prof Carolyn Dinshaw New York University

Professor David Bebbington is a highly regarded historian. He holds a chair at the University of Stirling, has been President of the Ecclesiastical History Society and has delivered numerous endowed lecture series as well as being deeply involved in the Dr Williams's Dissenting Academies Project. He is both a popular and influential academic historian whose writings have significantly shaped our thinking about the history of evangelicalism, Baptist life and political developments. In *Pathways and Patterns*, colleagues, former research students and friends who are indebted to Professor Bebbington and value his contribution to scholarship join together to pay tribute to his outstanding work. Not only has he stimulated academic endeavour, he has also given much personal support, not least to those in the Baptist Historical Society and in Colleges among them Spurgeon's College and Baylor University USA where he is a Distinguished Visiting Professor. This volume reflects his wide involvements and the grateful esteem in which he is held. Among Professor Bebbington's achievements has been both instituting and masterminding the very important International Conference on Baptist Studies (ICOBBS) held every three years in different parts of the world. It is appropriate then that this volume was presented to him at the Seventh ICOBBS Conference held in Manchester July 2015. **Forever in the Path** Pero G Dagbovie, 2025-02-01

Forever in the Path: The Black Experience at Michigan State University offers a sweeping overview of the Black experience at America's first agricultural college from the 1890s through the late twentieth century. In exploring the personalities, important events and key turning points of Black life at the university, this book deftly blends intellectual history, social history, educational history, institutional history and the African American biographical tradition. Pero G Dagbovie depicts and imagines how his numerous subjects' upbringings and experiences at the institution informed their futures and how they benefitted from and contributed to MSU's vision, mission and transformative role in the history of higher education. Michigan State University, founded in 1855 as the Agricultural College of the State of Michigan, has a fascinating past, a history shaped by vacillating local and national contexts as well as by people from different walks of life. The first Black students arrived on campus during the late nineteenth and early twentieth centuries and the first full-time Black faculty member was hired in the late 1940s. Before and after the modern Civil Rights Movement, African Americans from various backgrounds were transformed by MSU while also profoundly contributing in vital ways to the institution's growth and evolving identity.
