

Our History

In the spring of 1997 we were contacted by Old Colonial Williamsburg to help solve a problem. The pathways at this venerable site consisted of loose pea gravel. They were attractive and upheld the historical theme. However, the American Disabilities Act mandated that the pathways be wheelchair friendly. Our chemists modified one of our existing, below grade, soil stabilizers for a topical application. The stones were then permanently glued together. Williamsburg's pathways retained their natural look and wheelchairs rolled smoothly over them. That's how Klingstone came to be.

Paths Of History:

The Paths of History Igor' Mikhaïlovich D'iākonov, 1999 The Paths of History provides an overview of the entire history of humanity and the laws governing it This study takes as its point of departure Marx's theory of social evolution Igor M Diakonoff has expanded Marx's five stages of development to eight In addition and in contrast to Marx Diakonoff denies that our transition from one stage to the next is marked by social conflict and revolution and demonstrates that these transitions are sometimes achieved peacefully and gracefully Professor Diakonoff's focus is not limited solely to the economic and socio economic aspects of our development rather he examines in detail the ethnic cultural religious and military technological factors which have been brought to bear over the centuries He also denies that social evolution necessarily implies progress and shows how each progress is simultaneously a regress Finally the book concludes with a prognosis for the future of humanity Jacket

Tracks Across Continents, Paths Through History Douglas J. Puffert, 2009-04 A standard track gauge the distance between the two rails enables connecting railway lines to exchange traffic But despite the benefits of standardization early North American railways used six different gauges extensively and even today breaks of gauge at national borders and within such countries as India and Australia are expensive burdens on commerce In Tracks across Continents Paths through History Douglas J Puffert offers a global history of railway track gauge examining early choices and the dynamic process of diversity and standardization that resulted Drawing on the economic theory of path dependence and grounded in economic technical and institutional realities this innovative volume traces how early historical events and even idiosyncratic personalities have affected choices of gauge ever since despite changing technology and understandings of what gauge is optimal Puffert also uses this history to develop new insights in the theory of path dependence Tracks across Continents Paths through History will be essential reading for anyone interested in how history and economics inform each other

The Ten Most Influential Buildings in History Simon Unwin, 2016-07-07 Even the most inventive and revolutionary architects of today owe debts to the past often to the distant past when architecture really was being invented for the first time Architects depend on their own imaginations for personal insights and originality but their ideas may be stimulated consciously or subliminally by particularly powerful buildings from history The Ten Most Influential Buildings in History Architecture s Archetypes identifies ten architectural archetypes that have been sources of inspiration for architects through the centuries Each archetype is analysed through distinctive examples following the methodology established by the author in his previous books The variety of lines of enquiry each archetype has provoked in latter day architects are then explored by analysing their work to reveal ideas inspired by those earlier buildings Archetypes have a timeless relevance In adopting this approach The Ten Most Influential Buildings in History is as pertinent to contemporary practice as it is to understanding buildings from antiquity and offers insights into the bridges of influence that can operate between the two
