Pathways Through Adolescence:

Pathways Through Adolescence Lisa J. Crockett, Ann C. Crouter, 2014-03-05 Adolescent researchers are increasingly aware that they must examine development both across time and across context To do so however requires new conceptualizations and methodological approaches to the study of development including attention to the pathways young people choose in adolescence and follow into adulthood This volume assembles work by key researchers in the field who are struggling to understand how developmental trajectories are constructed and maintained throughout the adolescent period A complete understanding of developmental pathways requires the recognition that adolescents social contexts family school neighborhood and or peer group are important influences on the choices they make at this developmental period Researchers have traditionally studied contexts in isolation rather than examining the interrelationships among contexts and their implications for adolescent development The present volume seeks to address this gap in the literature with attention given not only to the interrelationships among contexts for white middle class youth but also to these issues for minority adolescents in neighborhoods that vary in terms of access to resources It concludes with an examination of researcher community collaboration as a strategy to move communities toward a greater awareness of adolescent development and the problems facing youth in their community and as a means to promote potential avenues for policy change and intervention

Pathways to Sexual Aggression Jean Proulx, Eric Beauregard, Patrick Lussier, Benoit Leclerc, 2014-03-14 Most people who read an article in the newspaper about the brutal rape of a woman by a stranger or the long standing sexual abuse of a young boy by his step father have a strong visceral reaction which is a mix of anger fear and incomprehension Apart from

these aversive reactions several questions also come to people's minds: Was this offender crazy or sexually obsessed? What is the purpose of such outrageous acts? To answer these questions, the authors of this book review theoretical and empirical models of the processes that lead men to sexually assault children or women whilst also presenting new results and models on this topic. In particular, this book focuses on empirical analyses of the pathways of six types of sexual aggressors, three of which—marital rapists, hebephilic sexual aggressors, and polymorphic sexual aggressors—have never been investigated before. Drawing on a large dataset on the offending processes of sexual aggressors, this book analyzes the influence of personality factors and lifestyle factors on offending pathways and brings together key researchers in the field of sexual aggression. This book will be of interest to psychologists, psychiatrists, criminologists, and social workers involved in the study, assessment, and treatment of sexual aggressors. In addition, this information will be crucial for practitioners involved in the follow-up of these offenders in the community and will interest researchers and graduate students in the field of sexual aggression.

Developmental Pathways Through Middle Childhood Catherine R. Cooper, Cynthia T. Garcia Coll, W. Todd Bartko, Helen M. Davis, Celina Chatman, 2006-04-21 When can contexts and diversity be resources rather than risks for children's developmental pathways? Scholars, policy makers, and practitioners increasingly realize that middle childhood matters as a time when children's pathways diverge as they meet new and overlapping contexts they must navigate on their way to adolescence and adulthood. This volume shines new light on this important transition by tracing how these contexts—cultural, economic, historical, political, and social—can support or undermine children's pathways and how children's own actions and the actions of those around them shape these pathways. With a focus on demographic changes taking place in the U.S., the volume also maps how experiences of diversity reflecting culture, ethnicity, gender, and social class matter for children's life contexts and options. Chapters by a team of social scientists in the MacArthur Foundation Research Network on Successful Pathways through Middle Childhood present the fruits of ten years of research on these issues with diverse cultural and ethnic communities across the U.S. These include a set of models and measures that trace how contexts and diversity evolve and interact over time, with an epilogue that aligns and compares them, surprising new findings, quantitative and qualitative, with cases showing how children and families shape and are affected by their individual, recreational, institutional, and cultural experiences, and applications to policy and practice for diverse children and families. The importance of these new models, methods, findings, and applications is the topic of commentaries by distinguished scholars with both U.S. and international perspectives. The book is intended for researchers, practitioners, and policy makers as well as students in psychology, sociology, and education.

Unraveling inflammaging : A pathway to Prevent Age-related Disease in Animals Toshiro Arai, Takahiro Teshima, Osamu Yamato, Jose Ceron, 2025-01-13 The field of age related diseases in animals particularly focusing on the concept of inflammaging forms the basis of this research topic Inflammaging a term coined to describe the chronic proinflammatory state often associated with aging has been linked to a variety of degenerative diseases This low grade chronic inflammatory state is believed to result from an accumulation of damaged macromolecules and cellular debris due to increased production and inhibited damage surveillance

and repair functions in multiple tissues The secretion of proinflammatory cytokines from senescent cells known as the senescence associated secretory phenotype SASP is thought to contribute to the onset of inflammaging In animals such as dogs and cats the longer they live the more diseases they develop similar to humans with inflammaging being a potential cause of various age related diseases The primary aim of this research topic is to delve deeper into the mechanisms of inflammaging in animals and its role in age related diseases The goal is to develop new diagnostic biomarkers for inflammaging which could potentially lead to early diagnosis and prevention of age related diseases In an aging society the increase in age related diseases is inevitable However the extension of healthy life years and the ability to stay healthy until old age are standard medical requirements Therefore the early diagnosis of inflammaging could be a significant step towards preventing various age related diseases in animals

Narrative Development in Adolescence Kate C. McLean, Monisha Pasupathi, 2009-11-11 Monisha Pasupathi and Kate C McLean Where Have You Been Where Are You Going Narrative Identity in Adolescence How can we help youth move from childhood to adulthood in the most effective and positive way possible This is a question that parents educators researchers and policy makers engage with every day In this book we explore the potential power of the stories that youth construct as one route for such movement Our emphasis is on how those stories serve to build a sense of identity for youth and how the kinds of stories youth tell are informed by their broader contexts from parents and friends to nationalities and history Identity development and in particular narrative identity development concerns the ways in which adolescents must integrate their past and present and articulate and anticipate their futures Erikson 1968 Viewed in this way identity development is not only unique to adolescence and emergent adulthood but also intimately linked to childhood and to adulthood The title for this chapter borrowed from the Joyce Carol Oates story highlights the precarious position of adolescence in relation to the construction of identity In this story the protagonist poised between childhood and adulthood navigates a series of encounters with relatively little awareness of either her childhood past or her potential adult futures Her choices are risky and her future at the end looks dark

Gender Differences at Puberty Chris

Hayward, 2003-07-31 Puberty is one of the most important life transitions. There is no other period in the life cycle in which there is such significant rapid and simultaneous transformation in biology and social and psychological development. Change at puberty is both dramatic and universal, yet there are few researchers who study this important stage in the lifecourse. Indeed, the study of the biological and psychosocial changes at puberty is relatively recent. One of the most interesting aspects of puberty is that it marks a significant separation between the genders physically, psychologically, and socially. This book focuses on the emergence of gender difference and provides an up-to-date summary of interdisciplinary research in the area, with contributions from an international team of leading experts in the field. Topics covered include biological aspects of puberty, body image, aggression, sexual abuse, opposite sex relationships, and the psychopathology of puberty.
