Our Wild Niche Laurie Cookson,1999 Wouldn't it be great to be wild To be so natural and free that we could do whatever we want But we can't If our species went wild the results could be very unpleasant We might lose control Our species has allowed itself to become artificial in its efforts to be

careful and considerate But what if we have made a mistake and miss the real value of wildness In nature not all animals are evolving but all of them are wild Why Evolution is survival of the wildest not survival of the fittest Being wild allows an animal to become efficient in its niche Wild species flourish in natural diversity and harmony How do they do it Our Wild Niche explores what it is to be wild the obstacles that stand in the way of our being wild and the human traits that will come forward when we finally do reach our wild niche It also shows how the wildness links everything together into a sensible and complete package that will give new insight into the role of our human emotions feelings instincts adaptations and desires
