**Managing Chronic Pain in an Age of Addiction** Akhtar Purvez, 2018-10-15 As a nation we are facing an unprecedented opioid crisis that is killing more than 65,000 people a year. It is destroying our families and decimating our neighborhoods. And it is costing us billions. As more and more people are dealing with chronic pain and as the opioid crisis reaches epic proportions, alternative approaches to understanding pain and its management are necessary. Here Dr. Akhtar Purvez, a seasoned researcher, pain specialist, and pain advocate, offers basic information about pain and pain conditions and considers how we approach pain from cultural, biological, and medical perspectives. He discusses the latest minimally invasive interventional approaches like nerve blocks and ablation procedures and neuromodulation techniques like peripheral nerve, spinal cord, and brain stimulation. The uses of marijuana and associated interventions are reviewed, and Purvez walks readers through the process of assessing pain, finding a doctor who can treat it, and methods for coping with pain through non-medical approaches like meditation. Anyone coping with pain or helping someone who is will find here a ready resource that offers hope and understanding.

**Pastoral Virtues for Artificial Intelligence** Jaco J. Hamman, 2022-10-03 Pastoral Virtues for Artificial Intelligence. AI acknowledges that human destiny is intimately tied to artificial intelligence. AI already outperforms a person on most tasks. Our ever-deepening relationship with an AI that is increasingly autonomous mirrors our relationship to what is perceived as Sacred or Divine. Like God, AI awakens hope and fear in people while giving life to some and taking livelihood, especially in the form of jobs, from others. AI built around values of convenience, productivity, speed, efficiency, and cost reduction serve humanity poorly, especially in moments that demand care and wisdom. This book explores the pastoral virtues of hope, patience, play, wisdom, and compassion as foundational to personal flourishing, communal thriving, and building a robust AI. Biases of determinism, speed, objectivity, ignorance, and apathy within AI's algorithms are identified. These biases can be minimized through the incorporation of pastoral virtues as values guiding AI.

**Waiting in Christian Traditions** Joanne Robinson, 2015-12-17 Christians wait for prayers to be answered, for an afterlife in heaven, for the Virgin Mary to appear, and for God to speak. They wait to be liberated from oppression, to be saved, or born again, for Easter morning to dawn, for healing, for conversion, and for baptism. Waiting and the disappointment and hope that often accompany it are explained in terms that are at first glance remarkably invariant across Christian traditions. What will happen will happen on God's time. A study of sources from across Christian traditions shows

that there is considerable complexity beneath this surface claim Understandings of free will and personal agency alongside shifts in institutional and theological commitments change the ways waiting is understood and valued Waiting is often considered a positive state to be endured as long as God wills and that fundamental understanding helps keep the promises at the heart of Christianity alive Scholars have long overlooked the problem and promise of waiting despite or perhaps because of its prevalence Indeed there are relatively few mystics few who have undergone sudden conversion and few who have attained saintly status Many however have waited and that problem remains prominent and its solutions remain influential in Christian traditions today
