## **Patient Not The Cure The Challenge Of Homeopathy:**

**The Role of Homeopathy in the Patient's Disease** Dr. Saran Zeb, 2022-01-25 This book contains 18 chapters The first chapter contains the life of Dr Hahnemann The second chapter contains different methods of homeopathic treatment In chapter third I discuss case taking Chapter four contains a case analysis Chapter five consists of homeopathic repertorisation and in chapter six I discuss the minimum doses Chapter seven onward consists of various health issues and mentioned the cases which I treated last 25 years I mentioned a few hundred cases in this book and contains different types of methods Each chapter is divided into three parts therapeutic method classical method and revolutionised method Chapter 18 contains Materia Medica I include 15 remedies which can be used daily bases in homeopathic practice **The Patient, Not the Cure** Margery G. Blackie, 1978 Explores the history and basic concepts of medicine and describes the effectiveness of various remedies against a wide range of ailments **The Healing Enigma** Vinton McCabe, 2007-01-01 In his twenty five years as a homoeopathic lecturer Vinton McCabe has taught thousands of medical professionals and laypersons alike both the philosophy and practice of homoeopathic medicine Through his books on the subject he has reached many more giving his readers both the tenets of homoeopathy as put forth originally by Samuel Hahnemann more than two hundred years ago and his own unique viewpoint on the subject of homoeopathic healing With The Healing Enigma McCabe makes use of his full experience of homoeopathy to give a fully rounded assessment of the principles of homoeopathy and the manner in which it is practised today **The Healing Enigma (Volume 2 of 2) (Easyread Super Large 20pt Edition)** , **The Patient as Agent of Health and Health Care** Mark Sullivan, MD, PhD, 2016-12-15 Patient centered care for chronic illness is founded upon the informed and activated patient but we are not clear what this means We must understand patients as subjects who know things and as agents who do things Bioethics has urged us to respect patient autonomy but it has understood this autonomy narrowly in terms of informed consent for treatment choice In chronic illness care the ethical and clinical challenge is to not just respect but to promote patient autonomy understood broadly as the patients overall agency or capacity for action The primary barrier to patient action in chronic illness is not clinicians dictating treatment choice but clinicians dictating the nature of the clinical problem The patient s perspective on clinical problems is now often added to the objective disease perspective of clinicians as health related quality of life HRQL But HRQL is merely a hybrid transitional concept between disease focused and health focused goals for clinical care Truly patient centered care requires a sense of patient centered health that is perceived by the patient and defined in terms of the patient s vital goals Patient action is an essential means to this patient centered health as well as an essential component of this health This action is not extrinsically motivated adherence but intrinsically motivated striving for vital goals Modern pathophysiological medicine has trouble understanding both patient action and health The self moving and self healing capacities of patients can be understood only if we understand their roots in the biological autonomy of organisms Taking the patient as the primary perceiver and

producer of health has the following policy implications 1 Care will become patient centered only when the patient is the primary customer of care 2 Professional health services are not the principal source of population health and may lead to clinical social and cultural iatrogenic injury 3 Social justice demands equity in health capability more than equal access to health services
