Patients View Their Psychotherapy By Strupp Hans Ronald:

Experiences of Counselling in Action Dave Mearns, Windy Dryden, 1989-12-06 How hard it is to find a book to recommend to trainees which will give them an insight into what counselling and psychotherapy too for that matter is really like This book does exactly that This is a book which would be equally useful to the humanistic practitioner and the more orthodox one The breadth of sympathy is admirable in dealing with what is common to all orientations This is one of those rare books which does justice both to the human experiences involved in counselling and psychotherapy and to the theory which might explain those experiences Changes What is the experience of counselling from the perspectives of both client and counsellor What can be learned for the practice of counselling from an understanding of how it feels to be a client or a counsellor Addressing these questions central to this book are the personal accounts of individual clients and counsellors who each relate their own very different experiences of counselling They explore such issues as identity expectations trust power and boundaries in the client counsellor relationship And each examines the intense personal meanings of success or failure in the client or counsellor role An analysis of the implications for the counselling relationship concludes the volume

The Social Work Interview Alfred Kadushin, Goldie Kadushin, 1997-03-04 For twenty five years The Social Work Interview has been the textbook of choice in social work and other human service courses as well as an essential professional resource for practitioners This new edition the first in seven years is thoroughly updated revised expanded and reorganized for more thorough coverage and for more effective teaching and learning New to this edition Thoroughly reorganized chapters and sections for greater coherence and clarity More extensive literature review Greater emphasis on the process of communication and its role in interviewing New or greatly expanded coverage of interviewing short term involuntary and other special clients Expanded coverage of techniques for bridging racial and ethnic differences Greater coverage of interviewer interviewee differences related to class race and gender Chapter end summaries throughout

On Being a Client David Howe, 1993-07-20 This book explores what clients have to say about their experience of the psychotherapeutic process David Howe observes that regardless of the therapist's theoretical orientation clients say similar things about their experience of being helped and not being helped It is the non specifics of genuineness a secure trusting atmosphere empathy and warmth that offer the vehicle for encouraging a dialogue of personal intimate material and of making sense and understanding when we are in pain puzzled or worried This is an easy and gentle read For those interested in Attachment Theory this would be a useful addition to their bookshelf Clinical Psychology Forum There is a growing interest in what clients have to say about their experiences of counselling and psychotherapy In a powerful analysis of this subject David Howe identifies a number of clear and potent messages He explores such questions as why clients say the things they say and why the therapeutic alliance holds out such promise and using the client's experience as a platform seeks to create a general theory of counselling and psychotherapy The author draws on a number of new and exciting ideas emerging in

developmental psychology sociology and the brain sciences to discuss the process by which the human infant becomes an individual as well as a competent social being From the basis that the social and psychological structures which generate the client's experience underlie all psychotherapeutic encounters the book then explores how the self forms and then re-forms in social relationships including those established during counselling and psychotherapy In conclusion the reader is invited to consider a number of thought provoking claims about the universal qualities that characterize good and bad practice in all schools of counselling therapy and the helping process

American Therapy Jonathan Engel,2008-10-30 From Freud to Zoloft the first comprehensive history of American Psychotherapy Fifty percent of Americans will undergo some form of psychotherapy in their lifetimes but the origins of the field are rarely known to patients Yet the story of psychotherapy in America brims with colorful characters intriguing experimental treatments and intense debates within this community of healers American Therapy begins as psychotherapy itself does with the monumental figure of Sigmund Freud The book outlines the basics of Freudian theory and discusses the peculiarly powerful influence of Freud on the world of American mental health The book moves through the emergence of group therapy the rise of psychosurgery the evolution of uniquely American therapies such as Gestalt rebirthing and primal scream therapy and concludes with the modern world of psychopharmacology cognitive behavioral therapy and highly targeted short term therapies For a counseled nation that freely uses terms such as emotional baggage and no longer stigmatizes mental health care American Therapy is a remarkable history of an extraordinary enterprise

Client and Agency John Mayer,2017-07-12 It is a startling and somewhat disturbing fact that social work researchers as well as research psychiatrists and psychologists have rarely explored the treatment situation from the standpoint of the client

Client and Agency first published in the 1960s explores by means of free flowing interviews a close up picture of the client's experiences at a social work agency There has been a growing awareness of the importance of consumer opinion in the social services following the wide spread impact of consumer groups particularly those concerned with educational and medical services Social work agencies have hesitated uncertain about the researchers and their methods and fearful of the outcome But it is desirable that they incorporate the views of consumer groups because client opinion is one way of checking the effectiveness of their work The practice of social work requires the application of knowledge derived from a variety of sources and academic disciplines It is frequently difficult to relate conflicting evidence and diverse theories about human behavior for use in day to day work with acutely troubled and deprived people It points to the need for more extensive studies of both consumers and suppliers of social work services because it raises many pertinent questions In Client and Agency clients of a Family Welfare Association discuss the kind of help they expect to receive their impressions of the social worker and the treatment process and the ways they felt they were helped or not helped
