## **Patriarchy At Work Patriarchal And Capitalist Relations In Employment:**

**Patriarchy at Work** Sylvia Walby, 2013-05-20 The concept of patriarchy is one which signals a sharp divide between traditions of feminist thought Sylvia Walby attempts to conceptualize patriarchy in a way that takes account not only of the complexity of relationships of gender but also of the subtleties of the interconnections of patriarchy and capitalism She rejects those accounts which treat patriarchy as a unified set of relations or which confine the site of patriarchy to any one privileged sphere such as the family Instead she elaborates a novel view of patriarchy as a set of relatively autonomous relations the connections between which are spelled out through a variety of detailed case studies In contrast to many other views of capitalist patriarchy Sylvia Walby characterizes the relationship between capitalism and patriarchy as a relationship not of harmony and mutual accommodation but of tension and conflict This thesis is substantiated through a comparative historical analysis of three contrasting areas of employment cotton textiles engineering and clerical work These analyses show the shortcomings of much conventional literature in sociology history and economics on women s employment which pays insufficient attention to the independence of patriarchal relations The book draws upon sociological historical economic and geographic materials to argue for an understanding of gender relations in terms of the specific tensions and compromises between patriarchal and capitalist relations Exploring the impact of the state on patterns of employment and unemployment completes a book rich in theoretical and empirical analysis *Patriarchy at Work* will be recognized as a major contribution to feminist thought and the social sciences

Fraser, 2019-05-23 First published in 1999 this volume responds to the 1968 sewing worker strikes at the Ford Motor Company asking how the worker demands made by women are to be heard and understood in workplace negotiations At the time of original writing in the late 1990s there remained many women workers whose needs and concerns remained hidden behind a workplace agenda dominated by male interests Kay M Fraser utilises some of the insights offered by post structuralist feminist theorists to interrogate the competing debates about women workers as they were discursively constructed by the organisations institutions and individuals interested and involved in the employment of women during the 1960s Fraser further explores notions of sameness and difference how these were used to formulate a view of women workers and highlights the need for women to be seen particularly by those involved in the workplace negotiations of the future as both the same as and different from men workers

Morgan, 2013-10-18 *Women Workers and Gender Identities 1835 1913* examines the experiences of women workers in the cotton and small metals industries and the discourses surrounding their labour It demonstrates how ideas of womanhood often clashed with the harsh realities of working class life that forced women into such unfeminine trades as chain making and brass polishing Thus discourses constructing women as wives and mothers or associating women s work with distinctly feminine attributes were often undercut and subverted

*A Halfway House for Women* Gail A. Caputo, 2014-07-01 Although halfway houses have been touted for years as affirmative rehabilitation locations that ready women for life in the outside world in this remarkable case study Gail Caputo shows how these places reinforce patterns of control and abuse that reaffirm the dependency and victimization of the inmates Based on observations made while living and working alongside women at a halfway house within the prison system in a city in the Northeast Caputo s analysis is anchored in the words and experiences of over a dozen women Organized according to the progression of levels residents traverse during their time in the house and the rules and behaviors associated with each level Caputo offers a riveting look at what passes for rehabilitation and reintegration in such places and delineates the many ways these women retain agency by resisting regulations designed to keep them in their place

**Capitalism and the Political Economy of Work Time** Christoph Hermann, 2014-10-17 John Maynard Keynes expected that around the year 2030 people would only work 15 hours a week In the mid 1960s Jean Fourasti still anticipated the introduction of the 30 hour week in the year 2000 when productivity would continue to grow at an established pace Productivity growth slowed down somewhat in the 1970s and 1980s but rebounded in the 1990s with the spread of new information and communication technologies The knowledge economy however did not bring about a jobless future or a world without work as some scholars had predicted With few exceptions work hours of full time employees have hardly fallen

in the advanced capitalist countries in the last three decades while in a number of countries they have actually increased since the 1980s This book takes the persistence of long work hours as starting point to investigate the relationship between capitalism and work time It does so by discussing major theoretical schools and their explanations for the length and distribution of work hours as well as tracing major changes in production and reproduction systems and analyzing their consequences for work hours Furthermore this volume explores the struggle for shorter work hours starting from the introduction of the ten hour work day in the nineteenth century to the introduction of the 35 hour week in France and Germany at the end of the twentieth century However the book also shows how neoliberalism has eroded collective work time regulations and resulted in an increase and polarization of work hours since the 1980s Finally the book argues that shorter work hours not only means more free time for workers but also reduces inequality and improves human and ecological sustainability
