Jie-Hyun Lim, 2022-07-05 South Korean historian Jie Hyun Lim raised under an anticommunist dictatorship turned to Marxian thought to explain his country's development even as he came to struggle with its Eurocentrism. As a transnational scholar working in postcommunist Poland, Lim recognized striking similarities between Korean and Polish history and politics. One realization stood out: Both Korea and Poland at once the West for Asia yet Eastern Europe had been assigned the role of East. This book explores entangled Easts to reconsider global history from the margins. Examining the politics of history and memory, Lim reveals the affinities linking Eastern Europe and East Asia. He draws out commonalities in their experiences of modernity in their transitions from dictatorship to democracy and in the shaping of collective memory. Ranging across Poland, Germany, Israel, Japan, and Korea, Lim traces the global history of how notions of victimhood have become central to nationalism. He criticizes mass dictatorships of right and left in the Global Easts, considering Nazi jurist Carl Schmitt's notion of sovereign dictatorship and the concept of decisionist democracy. Lim argues that nationalism is inherently transnational, critiquing how the nationalist imagination of the Global East has influenced countries across borders. Theoretically sophisticated and conceptually innovative, this book sheds new light on the transnational complexity of historical memory and imagination, the boundaries between democracy and mass dictatorship, and the fluidity of East and West. **The Soviet**

Concept of 'Limited Sovereignty' from Lenin to Gorbachev Robert A. Jones, 2016-07-27 The book examines the origins, development, and contemporary significance of the Soviet doctrine of limited sovereignty, the Brezhnev Doctrine, with particular reference to the doctrine's implications for the Soviet Union's relations with Eastern Europe. The author identifies and considers the multiple functions served by the Soviet Union's essentially dualistic or bi-axial approach to sovereignty, which embraces notions derived from both general international law and from Soviet Marxist-Leninist doctrine. The book also includes a comparative analysis of the US Monroe Doctrine. The author argues that although in the Gorbachev era of new thinking the Soviet doctrine of sovereignty may be developing a third axis, Western predictions of the imminent or actual demise of the Brezhnev Doctrine are premature. *Translations on Sub-Saharan Africa* United States. Joint Publications Research Service, 1978 **From Allies to Enemies** Simei Qing, 2007-02-28 Simei Qing offers a new perspective on relations between the US and China after World War II. Based on American, Russian, and newly declassified Chinese sources, this book reveals rarely examined assumptions entrenched in mainstream policy debates on both sides and sheds light on the origins and development of US-China confrontations. **Security Implications Of Nationalism In Eastern Europe** Jeffrey

Simon, Trond Gilberg, 2019-06-26 Suggesting that events in Poland during 1980-1981 represent the tip of an iceberg, the contributors examine the rise of nationalism in Eastern Europe and its potential consequences for European security. They analyze developing problems and trends in the region, including the cooling of relations between the USSR and individual countries in Eastern Europe, the continuing economic crisis, changing social structures, the influence of the intelligentsia, and the eroding importance of ideology as a key part of Eastern Europe's political culture. The second half of the book focuses on

the impact of these shifts on political and military relations between the USSR and Eastern European countries and on the efficient functioning of the Warsaw Pact **Translations from Hoc Tap (studies) North Vietnam** United States.
