as knowledge spheres This new book offers a systematic study of FX markets from a knowledge sociological perspective empirically focussing on analysts within these markets It makes the argument that market structures are reflected in and become stabilised by distinct cultures of financial expertise These cultures connect the actions and perceptions of loosely coupled globally distributed market players and establish shared sets of strategies of how to observe value and invest This highly original book will be of interest to scholars of economics sociology and political science and in particular to all those with an interest in the sociology of finance and the role of finance in the contemporary world      *KES'2000: Fourth International Conference on Knowledge-Based Intelligent Information Engineering Systems & Allied Technologies* R.
