Andrew J. B. Cameron, 2022-12-29 Overviewing what makes the intersection between emotion and ethics so confusing this book surveys an older wisdom in how to manage it using a range of Christian theologians and sources More important even than managing we begin to see a vision for a better set of affections to grow within and among us In this vision emerges a practical and nuanced account of what the Christian tradition sometime summarises as love How may we recover a deep affection for what matters both within ourselves and together in groups This book also dialogues with a new movement in moral psychology social intuitionism Cameron argues that researchers in this discipline have interests and conclusions that sometimes overlap with Christian sources even where their respective lenses differ In this way the book overviews recent trends in moral psychology against a recent historical and contemporary cultural backdrop whilst assaying major sources in Christian theology that offer guidance on moral psychology

[The Nature of Desire](#) Federico Lauria, Julien A. Deonna, 2017-06-01 Desires matter What are desires Many believe that desire is a motivational state desiring is being disposed to act This conception aligns with the functionalist approach to desire and the standard account of desire's role in explaining action According to a second influential approach however desire is first and foremost an evaluation desiring is representing something as good After all we seem to desire things under the guise of the good Which understanding of desire is more accurate Is the guise of the good even right to assume Should we adopt an alternative picture that emphasizes desire's deontic nature What do neuroscientific studies suggest Essays in the first section of the volume are devoted to these questions and to the puzzle of desire's essence In the second part of the volume essays investigate some implications that the various conceptions of desire have on a number of fundamental issues For example why are inconsistent desires problematic What is desire's role in practical deliberation How do we know what we want This volume will contribute to the emergence of a fruitful debate on a neglected albeit crucial dimension of the mind

to the type of work they do While the best predictor of current levels of participation is prior participation this factor was not confirmed with respect to the desire to increase participation in the future Seven tables and 24 figures are included JHP

The Normative and the Evaluative Richard Rowland,2019-02-07 Many have been attracted to the idea that for something to be good there just have to be reasons to favour it This view has come to be known as the buck passing account of value According to this account for pleasure to be good there need to be reasons for us to desire and pursue it Likewise for liberty and equality to be values there have to be reasons for us to promote and preserve them Extensive discussion has focussed on some of the problems that the buck passing account faces such as the wrong kind of reason problem Less attention however has been paid as to why we should accept the buck passing account or what the theoretical pay offs and other implications of accepting it are The Normative and the Evaluative provides the first comprehensive motivation and defence of the buck passing account of value Richard Rowland argues that the buck passing account explains several important features of the relationship between reasons and value as well as the relationship between the different varieties of value in a way that its competitors do not He shows that alternatives to the buck passing account are inconsistent with important views in normative ethics uninformative and at odds with the way in which we should see practical and epistemic normativity as related In addition he extends the buck passing account to provide an account of moral properties as well as all other normative and deontic properties and concepts such as fittingness and ought in terms of reasons
