Hope, 2008-12-11 Debra A Hope The Nebraska Symposium on Motivation is steeped in history and tradition Over the years the series editors have striven to maintain the highest standards of a demic excellence and to highlight some of the most important trends in psychology Perusing the chapter titles in the first 53 volumes shows the shifting emphasis as the science of psychology developed in the latter half of the twentieth century All of the most important topics are there drive theory social learning the cognitive revolution developing perspectives on understanding individual differences and the role of culture and the increasing role of neuroscience The key figures are there as well Harry Harlow Kenneth Spence Raymond Cattell George Kelly Albert Bandura Carl Rogers Carroll Izard Walter Mischel Sandra Bem Sandra Spence Herbert Simon David Barlow and many others In late 2004 I met with a group of interested graduate students and together we developed a proposal to join this long and proud tradition with a volume on sexual orientation Our motivation stemmed in part from the events around us The same sex m riage debate was covered extensively in the media reflecting a rapid and important discussion about sexual orientation that we were having and are still having as a society Psychology and related fields have much to offer on many of the issues raised in this debate *Patterns of Sexual Arousal* Raymond Rosen, J. Gayle Beck, 1988 For much of this century sexual science has been preoccupied with the definition of sexual normality and with the question of sexual determinism What behaviors and sexual needs are to be accepted as healthy What are the relative impacts of biological factors life events and social circumstances in shaping our sexual identities And to what extent can sexual choices be modified While definitive answers are yet to be determined this volume lays the necessary groundwork for researchers to begin to address these complex issues adequately *The Psychophysiology of Sex* Erick Janssen, 2007-09-27 Although sexual psychophysiology has made great strides over the past few decades the progress made has not been accompanied by much effort to integrate research findings or to stimulate methodological and theoretical discussions among researchers Yet this new research area has the potential to make substantial contributions to understanding a wide range of phenomena including the spread of HIV STIs sexual addiction or compulsivity the use or nonuse of birth control methods sexual infidelity and aggressive sexual

behaviors Psychophysiological methods can assist in the exploration of the underlying psychological physiological and affective processes and perhaps more importantly how they interact In this volume editor Erick Janssen brings together wide ranging essays written by an authoritative group of researchers representing the cutting edge of sexual psychophysiology

Gender Resilience, Integration and Transformation

Tierney Lorenz, Deb Hope, Kathryn Holland, 2024-06-28 There has been a surge in research on gender and sexuality in the last decade which has predominantly focused on discrimination dysphoria and disparities And much of what we hear in the news about issues relating to gender and sexuality is deeply negative with seemingly endless attacks on people who are marginalized by their gender and or sexuality attacks that are both physical and political While such issues are extremely important this one sided focus casts the experience of minoritized people as intrinsically negative A deficit model implies the best one can hope for is to avoid negative outcomes which limits the possibilities of authentic gender and sexual identity and expression intimate connection and personal and professional success We need more nuanced and methodologically rigorous approaches to understanding resiliency and wellbeing within minoritized groups including women queer e g lesbian gay bisexual pansexual asexual demisexual and transgender and gender diverse people If all we ever hear about the experiences of minoritized people is pain we diminish the strength of these communities and the richness of their humanity When we expand our view to include the positive we reclaim humanity not to mention strengthen our science by developing theories and conducting research that address the incredible range of human experience around gender and sexuality The 70th Annual Nebraska Symposium on Motivation focused on understanding resiliency joy pleasure and well being in women queer folks and gender diverse people In bringing together a diverse international and interdisciplinary group of scholars and scientists we created a space to explore joy to break with narratives of deficiency and honor wellbeing with the same scientific vigor and rigor as we give to pain The chapters of this volume represent this effort all centered on the question What would it look like if your field of study the study of gender and sexuality truly centered wellbeing and resilience as the foundation of theory and research
