Patterns of Social Functioning in Families with Marital and Parent-Child Problems Gerson David, 1967-12-15 The work reported in this book represents the first attempt to study a sample of client families with marital and parent child problems using a systematic framework based on role theory The findings of the study are important and made more so by the consistency of the framework the dimensions of family behaviour can be accurately studied because the techniques of observation used are constant This work conducted under the auspices of the Toronto Family Diagnosis Project School of Social Work at the University of Toronto is an impressive contribution to two areas of social work it offers new observations regarding family life that will be of particular interest to professionals and researchers in the field of family and child welfare and its technical framework will be of interest to all social workers Patterns of Social Functioning in Families with Marital and Parents-child Problems G. David, 1967 Young Families in Transition Ludwig l Geismar, 1973-01-01 Social Functioning Framework Ruth M. Butler, 1970 Patterns of Change in Problem Families Ludwig L. Russ, Thomas H. Eugene Larson, 1976 Ollendick, 2013-11-11 The aim of this book on psychotherapies with children and families is to present a comprehensive overview of the current array of intervention approaches in the child mental health field There is a focus on the integration of theory research and practice throughout the book The book proceeds from the more global pre sentations of basic theoretical approaches to applications of these approaches with specific problems and populations It then presents more integrated intervention approaches and overviews of the research literature. One of the unique features of this book is its focus on future directions for each approach both in clinical practice and in research A second unique feature is its structured format across di verse approaches with a focus on empirical validation of approaches Another innovation is the presentation of interventions that integrate major components of different theoretical approaches Thus the book reflects the current trends in the field of interventions with specific problems and populations empirical validation of the approach and the integration of treatment approaches There are five major sections in this book Part I consists of four chapters that address a variety of issues related to child psychotherapy Chapter 1 by the editors examines the historical roots of child psychotherapy and explores current trends in the treatment of diverse child disorders It emphasizes the movement to treat ments that work and *Exploring Family Relationships With Other Social Contexts* Ross D. sets the stage for the chapters that follow Parke, Sheppard G. Kellam, 2013-07-04 In the 1990s it is no longer news that families do not operate independently from other social organizations and institutions Instead it is generally recognized that families are embedded in a complex set of relationships with other institutions and contexts outside the family In spite of this recognition a great deal remains to be discovered about the ways in which families are influenced by these outside agencies or how families influence the

functioning of children and adults in these extra familial settings school work day care or peer group contexts Moreover little is known about the nature of the processes that account for this mutual influence between families and other societal institutions and settings The goal of this volume is to present examples from a series of ongoing research programs that are beginning to provide some tentative answers to these questions The result of a summer workshop characterized by lively exchanges not only between speakers and the audience but among participants in small group discussions as well this volume attempts to communicate some of the dynamism and excitement that was evident at the conference In the final analysis this book should stimulate further theoretical and empirical advances in understanding how families relate to other Advances in Family Intervention, Assessment and Theory, 1981 Impact of Divorce, Single Parenting and Stepparenting on Children E. Mavis Hetherington, 2014-01-02 This book a result of a conference sponsored by the National Institute of Child Health and Human Development explores developmental and clinical evidence of how divorce and the transition to single parenting and stepparenting affects children Many of the articles collected here look at the legal measures being used to make such transitions easier for families International bibliography of research in marriage and the family Joan Aldous, 1967 Handbook of Marriage and the Family Marvin B. Sussman, Suzanne K. Steinmetz, Gary W.
