Olasky, 1992 Aims to show that American corporations are giving too much financial support to left leaning organizations      *Japanese Corporate Philanthropy* Nancy R. London, 1991 Over the past decade Japanese corporations have made a series of large news generating gifts to a variety of United States universities museums and research institutions Many of these gifts have differed in both nature and magnitude from the contributions made by Japanese companies domestically The stir generated by such corporate grants is evidenced on the one hand by the influx into Japan of American European and Asian fundraisers seeking grants for their organizations and on the other hand by the intensifying debate within Japan about the appropriate role for Japanese institutions as international corporate philanthropists and citizens As with every facet of the complex United States Japan relationship cultural disparities make the American and Japanese approaches to philanthropy quite different creating the potential for friction and disappointment in this realm as surely as in the realm of trade and international business This book examines major legal and functional aspects of Japanese corporate philanthropy and attempts to place them in their cultural setting Drawing on her experience as an attorney and five years in Japan Ms London aims to make Japanese corporate grantmaking more comprehensible not only to Americans but also to Japanese as they begin to focus more attention on the role and meaning of corporate philanthropy      **Economic Factors in the Growth of Corporate Giving** Ralph Lowell Nelson, 1970-12-31 Examines the dramatic changes in the philanthropic behavior of business corporations in their support of education health welfare and the arts This analysis shows how traditional patterns of corporate philanthropy have undergone changes across the years and how presently a favorable attitude exists toward giving The author traces these shifts through periods of depression war and peace He examines economic and non economic reasons for the growth of corporate giving and treats the innovative role of company sponsored foundations      **Corporate Philanthropy at the Crossroads** Dwight F. Burlingame, Dennis R. Young, 1996-11-22 A guide for

fund raisers to the current thinking in the boardrooms about getting the biggest bang for the company's charity and to the research corporations are doing to that end. The eight perspectives include why research is crucial to the new corporate philanthropy, corporate volunteerism, business performance, the ethical framework, and firm size. **National Directory of Corporate Giving**, 2004. Corporation Giving. Frank Emerson Andrews, Giving for the benefit of others is so highly valued in the American tradition that philanthropy has become one of the largest classes of enterprise in the United States. A prominent feature of modern philanthropy has been the seemingly contradictory notion of corporation giving: the search for profits and the evolution of a humane civilization. Clearly, the scope and volume of corporate philanthropy has expanded greatly in this century. Frank Emerson Andrews' *Corporation Giving* sympathetically focuses on this paradoxical function of the corporation and its attendant contexts and consequences. First published in 1952, *Corporation Giving* charts the historical development of corporate giving, analyzes problems of choosing beneficiaries, and illustrates the legal and tax factors involved. Andrews' approach pinpoints the key issues that managers then and now must address in operating any giving program. The book offers a practical and useful model for the creative combination of theoretical and practical knowledge. For the academic investigator, Andrews' book meets the canons of scientific inquiry. Information is carefully integrated and judiciously interpreted. For the corporate actor, it meets the standards of applied analysis. Policy implications are systematically extracted and cautiously proposed. For the prospective fund raiser, it meets the test of direct utility. The inner workings of corporate giving are well revealed for those who would turn them to their own advantage. As a result, for a wide range of readers, this is a book that well withstands the test of time. Michael Useem's brilliant introduction places Andrews' work in the context of the postwar expansion of philanthropic enterprise and traces subsequent developments up to the present.

Provides information on 125 Chinese, 40 Japanese foundations with combined assets of 263 million dollars, 14 million dollars in grants. Enhances cross cultural understanding.
