African American Education Andrea D. Lewis, Nicole A. Taylor, 2019-01-07 This book describes the contributions of twenty two educators and events that have shaped the field of education often receiving little to no public recognition including Edmonia Godelle Highgate Nannie Helen Burroughs Selena Sloan Butler Alonzo Aristotle Crim Sabbath Schools and African American Boarding Schools These individuals and events have established and sustained education in communities across the United States This book will help foster a renewed sense of importance both for those considering teaching and for teachers in classrooms across the country **Patterson's American Education** Educational Directories Inc, 2004-10

The Oxford Handbook of African American Citizenship, 1865-Present Henry Louis Gates, Jr., 2012-05-24 Collection of essays tracing the historical evolution of African American experiences from the dawn of Reconstruction onward through the perspectives of sociology political science law economics education and psychology As a whole the book is a systematic study of the gap between promise and performance of African Americans since 1865 Over the course of thirty four chapters contributors present a portrait of the particular hurdles faced by African Americans and the distinctive contributions African Americans have made to the development of U S institutions and culture From publisher description *U.S.- China Educational Exchange* Hongshan Li, 2007-12-01 U S China relations became increasingly important and complex in the twentieth century While economic political and military interactions all grew over time the most dramatic expansion took place in educational exchange turning it into the strongest tie between the two nations By the end of the 1940s tens of thousands of Chinese and American students and scholars had crisscrossed the Pacific leaving indelible marks on both societies Although all exchange programs were terminated during the cold war the two nations reemerged as top partners within a decade after the reestablishment of diplomatic relations Approaching U S China relations from a unique and usually overlooked perspective Hongshan Li reveals that both the drastic expansion and complete termination of educational ties between the two nations in the first half of the twentieth century were largely the results of direct and deep intervention from the American and Chinese governments Benefiting from government support and collaboration educational exchange succeeded in diffusing knowledge and improving mutual understanding between the two peoples across the divide of civilizations However the visible hand of government also proved to be most destructive to the development of healthy intercultural relations when educational interactions were treated merely as an instrument for crisis management

Cadets on Campus John A. Coulter,2017-03-24 Since the founding of the United States Military Academy at West Point in 1802 more than eight hundred military schools have existed in this country The vast majority have closed their doors been absorbed into other educational institutions or otherwise faded away but others soldier on adapting to changing times and changing educational needs While many individual institutions have had their histories written or their stories told to date no single book has attempted to explore the full scope of the military school in American history Cadets on Campus is the first book to cover the origin history and culture of the nation s military schools secondary and collegiate and this breadth of coverage will appeal to historians and alumni alike Author John Alfred Coulter identifies several key figures who were pivotal to the formation of military education including Sylvanus Thayer the father of West Point and Alden Partridge the founder of the school later known as Norwich University the first private military school in the country He also reveals that military schools were present across the nation despite the conventional wisdom that most military schools and indeed the culture that surrounds them were limited to the South Coulter addresses the shuttering of military schools in the era after the Vietnam War and then notes a curious resurgence of interest in military education since the turn of the century

Social Networks

and the Life Course Duane F. Alwin, Diane H. Felmlee, Derek A. Kreager, 2018-03-06 This volume engages the interface between the development of human lives and social relational networks It focuses on the integration of two subfields of sociology social science the life course and social networks Research practitioners studying social networks typically focus on social structure or social organization ignoring the complex lives of the people in those networks At the same time life course researchers tend to focus on individual lives without necessarily studying the contexts of social relationships in which lives are embedded and linked to one another through social networks These patterns are changing and this book creates an audience of researchers who will better integrate the two subfields It covers the role of social networks across the life span from childhood and adolescence to midlife through old age [Handbook of Research in the Social Foundations of Education](#)
