Corporate Control Nora Loreto, 2025-05-06 How deep does corporate dominance go in Canada The second book in Nora Loreto's landmark series dives into the corporate web spun around Canada's economy society and politics The joke goes that Canada is three mining companies in a trench coat Or three oil companies in a trench coat Or three telecom companies in a trench coat It's funny because it's almost true a handful of corporations exert a disproportionate amount of power over Canadian democracy Corporate profits are at a record high and the divide between the rich and the poor has never been wider Canadians are struggling with affordability the housing crisis and wages that don't cover basic needs The combination of these forces is a pressure cooker that politicians have promised to tackle except they can't they are too restricted by corporate power to confront the roots of the problems Canadians face The first book in the Canada in Decline series examines the rise and fall of Canada's social safety net In this next volume Loreto goes further identifying why Canadian politicians seem impotent in the face of corporate Canada

Adaptation Or Expiration in Family Firms Andrés Hatum,2007-01-01 The author explores determinants of organisational flexibility in this examination of four family owned companies two flexible and two less flexible from the edible oil and pharmaceutical industries By means of an innovative analysis including longitudinal analysis coding analysis statistical analysis and the use of original display charts he illustrates the determinants of organisational flexibility and sheds light on the process of transformation and adaptation of family firms an area that has not yet been the subject of extensive empirical inquiry The management literature has claimed that the complexity of business contexts has forced firms to confront hypercompetitive or high velocity environments Behind such claims lies a new interest in the dynamics of adaptation and in particular a firm s flexibility as a way of adjusting under conditions of uncertainty The businesses studied here have had to contend with the environmental volatility that characterized Argentina for some years The author identifies five determinants of flexibility as a set of organisational and managerial capabilities that enabled some firms to adapt quickly in a highly competitive environment heterogeneity of the dominant coalition centralisation and formalisation of decision making low macroculture embeddedness environmental scanning and a strong organisational identity These findings were analyzed and interpreted by developing theoretical ideas from three areas between which historically there has been no interface organisational flexibility organisational innovativeness and institutional embeddedness This insightful examination into what enables some family owned businesses to survive and thrive and causes others to fail will be of interest to academics concerned with business flexibility and adaptation as well as to managers and owners of family businesses

Morck,2007-11-01 For many Americans capitalism is a dynamic engine of prosperity that rewards the bold the daring and the hardworking But to many outside the United States capitalism seems like an initiative that serves only to concentrate power and wealth in the hands of a few hereditary oligarchies As A History of Corporate Governance around the World shows neither conception is wrong In this volume some of the brightest minds in the field of economics present new empirical research that suggests that each side of the debate has something to offer the other Free enterprise and well developed financial systems are proven to produce growth in those countries that have them But research also suggests that in some other capitalist countries arrangements truly do concentrate corporate ownership in the hands of a few wealthy families A History of Corporate Governance around the World provides historical studies of the patterns of corporate governance in several countries including the large industrial economies of Canada France Germany Italy Japan the United Kingdom and the United States larger developing economies like China and India and alternative models like those of the Netherlands and Sweden Catalog of Copyright Entries.
