Pauperising Agriculture Studies In Agrarian Change And Demographic Structure:

Pauperising Agriculture N. Krishnaji, 1992 There are two sets of essays in this volume The first set discusses the changes in the Indian agrarian scene since the mid sixties following the introduction of modern technology in the irrigated tracts of the country The second is on the variation in the demographic structure of agrarian households Paths of Development in Arunachal Pradesh Ravi S. to generate longterm growth and reduce poverty in many developing and transition economies As dramatically demonstrated in the collapse of the WTO s Seattle talks there is increasing dissatisfaction in both developing and developed countries with the emerging neoliberal global economic order The resignations of Joseph Stiglitz and Ravi Kanbur from the World Bank emphasize that this disillusionment with the orthodoxy now exists at the very heart of the establishment Yet the increasing demand for an alternative to this orthodoxy is not being met Over the last few decades the older generation of development economists have been edged out of most major universities particularly in the USA The situation in most developing countries is even worse although there is more demand for alternatives to orthodox development economics these countries have even less capability to generate such alternatives Rethinking Development Economics is intended to fill this gap It addresses key issues in development economics ranging from macroeconomics finance and governance to trade industry agriculture and poverty Bringing together some of the foremost names in the field this comprehensive and timely collection constitutes a critical staging post in the future of development economics *Shaping India* D. Narayana,Raman Mahadevan,2020-11-29 This volume seeks to unravel and contextualize the so called dichotomy of old and new India and what binds them together To understand this complex process it attempts to apply a long term historical perspective a different conception of the economy and cross disciplinary approaches The exceptional feature of this volume is the large historical canvas of essays and its sensitivity to the regional dimension in a country as large and diverse as India They deal with issues ranging from land and agriculture entrepreneurship industry and demographic trends to a critical anatomy of modern Indian economic historiography Together these essays contribute in providing significantly new and enriching insights into the complex process of transition from colonial to post colonial economic development There has been a conscious effort in most cases to capture the influence of the colonial economic structures and processes in shaping the trajectory of growth and development in the post independence period Drawing upon a large amount of extremely rich and varied data and information on the socio economic trends the book is lucid well crafted and reader friendly **The Indian Journal of Agricultural Economics** ,1946 Vols include Proceedings of the conference of the Indian Society of Agricultural Economics Class, Caste, Gender Manoranjan Mohanty,2004-05-24 Annotation This volume of essays looks into the dynamic interconnection of class caste and gender in the Indian political process The focus is on interconnection that is a relationship involving more than one category while at the same time trying to understand each category by itself The complex issues of caste gender and class have been studied through a collection of essays that look into the people s struggle for social equality Social oppression has been analyzed in the context of protests against such exploitation Anti caste movements and women s movements have been studied in much detail The volume is divided into five sections and well known specialists have contributed pertinent essays This important book will contribute immensely in the understanding of the contemporary Indian political process **India** Jean Drèze,Amartya Sen,2002 This book explores the role of public

action in eliminating deprivation and expanding human freedoms in India The analysis is based on a broad and integrated view of development which focuses on well being and freedom rather than the standard indicators of economic growth The authors place human agency at the centerstage and stress the complementary roles of different institutions economic social and political in enhancing effective freedoms
