possibilities Rocke uses a variety of sources including private correspondence diagrams and illustrations scientific papers and public statements to investigate their ability to not only imagine the invisibly tiny atoms and molecules upon which they operated daily but to build detailed and empirically based pictures of how all of the atoms in complicated molecules were interconnected These portrayals of chemical structures both as mental images and as paper tools gradually became an accepted part of science during these years and are now regarded as one of the central defining features of chemistry In telling this fascinating story in a manner accessible to the lay reader Rocke also suggests that imagistic thinking is often at the heart of creative thinking in all fields Image and Reality is the first book in the Synthesis series a series in the history of chemistry broadly construed edited by Angela N H Creager John E Lesch Stuart W Leslie Lawrence M Principe Alan Rocke E C Spary and Audra J Wolfe in partnership with the Chemical Heritage Foundation Philosophical Transactions of the Royal Society of London Royal Society (Great Britain),1833 Proceedings of the Royal Society of London ,1913 **Index to the Proceedings of the Royal Society of London (old Series)** ,1913 **Proceedings of the Royal Society of London** Royal Society (Great Britain),1864 **Index to the Proceedings of the Royal Society of London** ,1913 *Abstracts of the Papers Printed in the Philosophical Transactions of the Royal Society of London* Royal Society (Great Britain),1913 *Catalogue of the Library of the School of Mines of Columbia College, New York.
