*Sex and Money* Eileen R. Meehan, Ellen Riordan, 2002      **When Information Came of Age** Daniel R. Headrick, 2000-12-28 The book provides a concise and readable survey of the many conceptual developments between 1700 and 1850 and draws connections to leading technologies of today It documents three breakthroughs in information systems that date to the period the classification and nomenclature of Linnaeus the chemical system devised by Lavoisier and the metric system It shows how eighteenth century political arithmeticians and demographers pioneered statistics and graphs as a means for presenting data succinctly and visually It describes the transformation of cartography from art to science as it incorporated new methods for determining longitude at sea and new data on the measure of the arc of the meridian on land Finally it looks at the early steps in codifying and transmitting information including the development of dictionaries the invention of semaphore telegraphs and naval flag signaling and the conceptual changes in the use and purpose of postal services      Television and the Public Sphere Peter Dahlgren, 1995-10-01 In this broad ranging text Peter Dahlgren clarifies the underlying theoretical concepts of civil society and the public sphere and relates these to a critical analysis of the practice of television as journalism as information and as entertainment He demonstrates the limits and the possibilities of the television medium and the formats of popular journalism These issues are linked to the potential of the audience to interpret or resist messages and to construct its own meanings What does a realistic understanding of the functioning and the capabilities of television imply for citizenship and democracy in a mediated age      **Public Opinion** Slavko Splichal, 1999 A survey of the historical roots theoretical foundations and normative claims of 20th century conceptualizations of public opinion It examines research strategies such as polling the spiral of silence model and the role of the media in the formation and expression of public opinion      *Reproductive Rights in Modern France* Maud Anne Bracke, 2025-07-09 The introduction

of the principle of women's reproductive liberty in France tentatively by the family planning movement after 1960 and explicitly by the women's liberation movement after 1970 marked a deep shift transforming public discourses. Yet this principle remained fiercely contested and moderate and conservative actors responded by foregrounding notions of reproductive responsibility or the expectation that individuals perform the right sexual and family making behaviour benefiting not only themselves and their families but the nation at large. Such responsabilisation underpinned the legal reforms of the 1960s-70s framing a notion of reproductive citizenship based on a tension between individual rights and social norms. This book breaks new ground by taking an intersectional approach to the defining moments of this period: the legalisation of contraception the laws of 1967 and 1974 and the liberalisation of abortion 1975-1979. Drawing on a wide range of sources and actors including feminist and family planning movements government actors demographers medical professional organisations disability rights groups and key actors in the overseas departments Maud Bracke demonstrates how the discourse of responsabilisation allowed actors to distinguish between citizens worthy of reproductive rights and those seen as less worthy. Bracke analyses the distinct regulations regarding contraception in the overseas departments of Guadeloupe and Martinique framed by racialised anti natalism. The book also demonstrates that disability rights organisations contributed to the discrediting of the notion of eugenic abortion used among experts and policy makers until the early 1970s. Furthermore Bracke goes on to highlight the silence in the feminist movement around both disability rights and race as part of its universalisation of women's conditions of oppression and analyses the emergence of Black Feminism in late 1970s France. In so doing the book offers a major contribution to the history of sex gender family life healthcare demography and political debate in post war France and more generally.

**Theories of Communication** Armand Mattelart, Professor Armand Mattelart, Michèle Mattelart, 1998-07. future of the field     Machines That Become Us James E. Katz, 2017-07-28 Social critics and artificial intelligence experts have long prophesized that computers and robots would soon relegate humans to the dustbin of history. Many among the general population seem to have shared this fear of a dehumanized future. But how are people in the twenty-first century actually reacting to the ever-expanding array of gadgets and networks at their disposal? Is computer anxiety a significant problem paralyzing and terrorizing millions, or are ever-proliferating numbers of gadgets being enthusiastically embraced? *Machines that Become Us* explores the increasingly intimate relationship between people and their personal communication technologies. In the first book of its kind, internationally recognized scholars from the United States and Europe explore this topic. Among the technologies analyzed include the Internet, personal digital assistants (PDAs), mobile phones, networked homes, smart fabrics, and wearable computers, interactive location badges, and implanted monitoring devices. The authors discuss critical policy issues such as the problems of information resource access and equity and the recently discovered digital dropouts phenomenon. The use of the word *become* in the book's title has three different meanings. The first suggests how people use these technologies to broaden their abilities to communicate and to represent themselves to others. Thus the technologies become extensions and representatives of the communicators. A second sense of *become* applies to analysis of the way these technologies become physically integrated with the user's clothing and even their bodies. Finally, contributors examine fashion aspects and uses of these technologies that is how they are used in ways becoming to the wearer. The conclusions of many chapters are supported by data including ethnographic observations, attitude surveys, and case studies from the United States, Britain, France, Italy, Finland, and Norway. This approach is especially valuable.
