World Report on Child Injury Prevention M. M. Peden, 2008 Child injuries are largely absent from child survival initiatives presently on the global agenda Through this report the World Health Organization the United Nations Children s Fund and many partners have set out to elevate child injury to a priority for the global public health and development communities It should be seen as a complement to the UN Secretary General s study on violence against children released in late 2006 that report addressed violence related or intentional injuries Both reports suggest that child injury and violence prevention programs need to be integrated into child survival and other broad strategies focused on improving the lives of children Evidence demonstrates the dramatic successes in child injury prevention in countries which have made a concerted effort These results make a case for increasing investments in human resources and institutional capacities Implementing proven interventions could save more than a thousand children s lives a day p vii *PC Mag*, 1997-06-24 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology
