Balgos,2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy All chapters follow a common framework for policy analysis While

most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992 2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world

Managing the Ocean Resources of the United States Daniel P. Finn,2012-12-06 Federal programs applicable to the oceans and coastal zone have evolved incrementally in response to perceived needs to expedite emerging marine development while conserving valuable marine resources As a result the current federal marine effort is divided among a plethora of programs administered by a number of agencies within different Departments The programs themselves are conducted under the authority of multiple statutes with varying reaches and objectives as a result they often overlap and conflict There is no assurance moreover that the coverage of federal programs is complete in scope or comprehensive in conception No single institutional device can ensure that these programs will manage the marine resources of the United States consistently and comprehensively so as to derive maximum public benefit While the present maze of statutes regulations and executive directives may in theory provide opportunities for a wide ranging consideration of all relevant factors prior to making specific decisions there can be no guarantee that this objective is realized either systematically or reasonably effectively Recent political developments indicate that the structure of federal marine programs will continue to be subject to scrutiny for some time President Reagan's emphases on economic deregulation and development of outer continental shelf OCS oil and gas resources may lead to streamlining the OCS leasing and permitting process and altering the execution of the federal multiple use policy for marine areas
