## **Resources Population And The Philippines Future A Case Study:**

**Resources, Population, and the Philippines' Future** Gareth Porter, Delfin J. Ganapin, 1988      **The Social Dynamics of Deforestation in the Philippines** Gerhard van den Top, 2003 This work offers a detailed case study on the dynamics of forest use degradation and loss in Northeast Luzon Philippines Following an interdisciplinary approach the study charts the degradation and loss of forest in this area between 1950 and 1990 as it relates to the social and political context of logging forest migration and changes in upland agriculture Based on ten years of research the author introduces us to the actions livelihood options and motives of all the principal group of actors      The New Pacific Community in the 1990s Young Jeh Kim, 2016-09-16 With the end of the Cold War and the subsequent new regional alignments American foreign policy and influence in the Asia Pacific region face a major turning point In this book ten North American specialists from various disciplines reconceptualize the forces shaping the New Pacific Community international politics as a by product of peaceful cooperation the changing role of the military the political economy as a determinant of human rights environmental and demographic issues and culture as an evolutionary and dynamic phenomenon in the lives of new immigrants as they make their way in American society      **The Political Economy of the Environment** James K. Boyce, 2002-01-01 Professor Boyce's work is an excellent example of how ecological economics can be done in an objective evidence based approach that can put issues on the agenda in a manner where they will be taken seriously by other scholars This is a well written and provocative book that should encourage further research on all these important issues David I Stern International Journal of Social Economics This succinct and sometimes provocative book sets out to document quantify and explain the ways in which inequalities of wealth and power create an uneven apportionment of environmental costs across the world It offers a combination of theoretical analysis and empirical evidence to support the author's central contention that greater democratisation and changes in society's relationship with nature are paramount for achieving the dual goals of environmental protection and sustainable development This book is immensely well written makes for a fascinating read Ian Bailey European Spatial Research and Policy Economic activities that degrade the environment do not simply pit humans against nature They also pit some humans against others Some benefit from these activities others bear net costs from pollution and resource depletion In a provocative and original analysis James K Boyce examines the dynamics of environmental degradation in terms of the balances of power between the winners and the losers He provides evidence that inequalities of power and wealth affect not only the distribution of environmental costs but also their overall magnitude greater inequalities result in more environmental degradation Democratization movement toward a more equitable distribution of power therefore is not only a worthwhile objective in its own right but also an important means toward the social goals of environmental protection and sustainable development Combining theoretical analysis with empirical evidence from around the world James K Boyce demonstrates that changes in our relationship with nature ultimately require changes

in our relationships with each other He maintains that a more democratic and environmentally sustainable future is possible but warns that it is not inevitable This book will appeal to students scholars policymakers and other readers interested in the environment economics and public policy     *The State and the Advocate* Teresita Rosario,2014-07-11 This book seeks to demonstrate the role of public policy in support of equitable and inclusive development The achievement of this overarching goal rests on an assumption that development does not happen by chance or by accident but rather through the deliberate application of analytical tools which public policy is able to provide Set within an Asian context the book emphasizes the role of public policy in reducing poverty eliminating deprivation promoting equity and ensuring social justice The book likewise aims to provide an argument for the developmental role of the state one which has been the subject of a long standing debate among development scholars In addition the book accounts for the role of civil society organizations particularly their involvement in multi stakeholder participation Through different case studies this book explains the outcome of public policy decisions as combinations of efforts among government and civil society actors to ensure the creation of the most optimal public good Finally the book takes a comparative perspective i e there are cases that directly or indirectly implicate the regional character of public policies that result in the creation and distribution of regional public goods     **Modern Philippines** Patricio N. Abinales,2022-07-08 Choice Outstanding Academic Title 2023 This comprehensive thematic encyclopedia focuses on the Philippines exploring this important island nation from a variety of perspectives The Philippines is a nation that has experience being ruled by two separate colonial powers is home to a people who have had strong attachments to democratic politics and possesses a culture that is a rich mix of Chinese Spanish and American influences What are some important characteristics of contemporary daily life and culture in the Philippines Thematic chapters examine topics such as government and politics history food etiquette education gender marriage and sexuality media and popular culture music art and more Each chapter opens with a general overview of the topic and is followed by alphabetically arranged entries that home in even closer on the topic Sidebars and illustrations appear throughout the text and appendixes cover a glossary facts and figures holidays chart and vignettes that paint a picture of a typical Day in the Life     *Managing Information in the Public Sector* Jay D. White,2007 Covers both the basics of information technology and the managerial and political issues surrounding the use of these technologies     *Theories of War and Peace* Michael E. Brown,Owen R. Cote, Jr.,Sean M. Lynn-Jones,Steven E. Miller,1998-09-15 New approaches to understanding war and peace in the changing international system What causes war How can wars be prevented Scholars and policymakers have sought the answers to these questions for centuries Although wars continue to occur recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and prevention of war This volume includes essays by leading scholars on contemporary approaches to understanding war and peace The essays include expositions analyses and critiques of some of the more prominent and enduring explanations of war Several authors discuss realist theories of war which focus

on the distribution of power and the potential for offensive war Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace In light of the apparent increase in nationalism and ethnic conflict several authors present hypotheses on how nationalism causes war and how such wars can be controlled Contributors also engage in a vigorous debate on whether international institutions can promote peace In a section on war and peace in the changing international system several authors consider whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war

**The Philippine Archipelago** Yves Boquet, 2017-04-19 This book presents an updated view of the Philippines focusing on thematic issues rather than a description region by region Topics include typhoons population growth economic difficulties agrarian reform migration as an economic strategy the growth of Manila the Muslim question in Mindanao the South China Sea tensions with China and the challenges of risk vulnerability and sustainable development

**Sustainable Forestry Challenges for Developing Countries** Matti Palo, G. Mery, 2012-12-06 This book is an outcome of a research project on Sustainable Forestry and the Environment in Developing Countries The project has been run by Metsantutki muslaitos METLA the Finnish Forest Research Institute since 1987 and will be completed this year A major output by this project has so far been a report in three volumes on Deforestation or development in the Third World The purpose of our multidisciplinary research project is to generate new knowledge about the causes of deforestation its scenarios and consequences More knowledge is needed for more effective efficient and equitable public policy both at the national and international levels in supporting sustainable forestry in developing countries Our project has specifically focused on 90 tropical countries as one group and on three subgroups by continents as well as the three case study countries the Philippines Ethiopia and Chile The University of Joensuu has been our active partner in the Philippine study We have complemented the three cases by the analyses of Brazil and Indonesia the two largest tropical forest owning countries Some other interesting country studies were annexed to complement our book both by geography and expertise The United Nations University World Institute for Development Economics Research UNU-IWIDER in Helsinki Finland has also been partly engaged Most of the results from its project on The Forest in the South and North in Context of Global Warming will however be published later in a separate book

**Contested Grounds** Daniel Deudney, Richard Anthony Matthew, 1999-01-01 Presents diverse views on the relationship between environmental politics and international security

**Timber Booms and Institutional Breakdown in Southeast Asia** Michael L. Ross, 2001-01-08 Scholars have long studied how institutions emerge and become stable But why do institutions sometimes break down In this book Michael L Ross explores the breakdown of the institutions that govern natural resource exports in developing states He shows that these institutions often break down when states receive positive trade shocks unanticipated windfalls Drawing on the theory of rent seeking he suggests that these institutions succumb to a problem he calls rent seizing the predatory behavior of politicians who seek to supply rent to others and who purposefully dismantle institutions that restrain them Using case studies of timber

booms in Indonesia Malaysia and the Philippines he shows how windfalls tend to trigger rent seizing activities that may have disastrous consequences for state institutions and for the government of natural resources More generally he shows how institutions can collapse when they have become endogenous to any rent seeking process *In The U.S. Interest* Janet Welsh Brown,2021-11-28 In the U S interest explores the implications this growing interdependence holds for US foreign policy in the developing world It links US jobs trade and geopolitical interests to the environmental economic and political health of key developing nations Case studies of Mexico Egypt Kenya and the Philippines analyze Third World resource environmental and population problems revealing the need for US policymakers to recognize US national interest in international environmental cooperation Environment, Scarcity, and Violence Thomas F. Homer-Dixon,2010-07-01 The Earth s human population is expected to pass eight billion by the year 2025 while rapid growth in the global economy will spur ever increasing demands for natural resources The world will consequently face growing scarcities of such vital renewable resources as cropland fresh water and forests Thomas Homer Dixon argues in this sobering book that these environmental scarcities will have profound social consequences contributing to insurrections ethnic clashes urban unrest and other forms of civil violence especially in the developing world Homer Dixon synthesizes work from a wide range of international research projects to develop a detailed model of the sources of environmental scarcity He refers to water shortages in China population growth in sub Saharan Africa and land distribution in Mexico for example to show that scarcities stem from the degradation and depletion of renewable resources the increased demand for these resources and or their unequal distribution He shows that these scarcities can lead to deepened poverty large scale migrations sharpened social cleavages and weakened institutions And he describes the kinds of violence that can result from these social effects arguing that conflicts in Chiapas Mexico and ongoing turmoil in many African and Asian countries for instance are already partly a consequence of scarcity Homer Dixon is careful to point out that the effects of environmental scarcity are indirect and act in combination with other social political and economic stresses He also acknowledges that human ingenuity can reduce the likelihood of conflict particularly in countries with efficient markets capable states and an educated populace But he argues that the violent consequences of scarcity should not be underestimated especially when about half the world s population depends directly on local renewables for their day to day well being In the next decades he writes growing scarcities will affect billions of people with unprecedented severity and at an unparalleled scale and pace Clearly written and forcefully argued this book will become the standard work on the complex relationship between environmental scarcities and human violence Surviving Natural Resource Decline Gladys Buenavista,Cornelia Butler Flora,Alison Meares,1994

*One Century of Forest Rehabilitation in the Philippines* Unna Chokkalingam,2006-01-01 Historical Dictionary of the Philippines Artemio R. **Asian Economic Miracle** Young Kim, 2018-04-17 There is widespread agreement that the world's most successful developing countries in the 1980s were those in Southeast Asia. Following in the footsteps of postwar Japan and more recently Korea, the populations of Thailand, Malaysia, Indonesia, Singapore, Hong Kong, and the Philippines have made enormous strides in income, industrial and agricultural production, exports, education, health, nutrition, consumption, and other development indicators. This book brings together political scientists, economists, officials of Asian governments, the United States, and representatives of the multilateral banks to analyze and explain Southeast Asia's extraordinary growth. Chapters and contributors to *The Southeast Asian Economic Miracle* include *Recent Developments and Future Prospects of Indonesia* by Anwar Nasution, *The Economic Experience and Prospects of Thailand* by Sukhumbhand Paribatra, *The Development of the Former Indochina States* by Frederick Brown, *Trade and Investment in Southeast Asian Development* by Stephen Parker, and *Managing Renewable Resources in Southeast Asia: The Problem of Deforestation* by Gareth Porter. Among the critical questions that the contributors address are: Is the success of the 1980s and early 1990s a permanent part of the world's economic landscape? How will this region react to the growth of China's vast productive capacity and to the faltering of Japan's economy? What will be the effect of U.S. military disengagement caused by domestic budgetary concerns and the end of the cold war? *The Southeast Asian Economic Miracle* is an important study of the shifting winds of the political economy of growth in our time, the movement away from a command to a free market environment. It will be an essential resource for political scientists, Asia area scholars, economists, and policymakers. **AEZ in Asia** Food and Agriculture Organization of the United Nations, 1994-01-01 **Capital, Coercion, and Crime** John Thayer Sidel, 1999 Drawing on in-depth research in the Philippines, this book reveals how local forms of political and economic monopoly may thrive under conditions of democracy and capitalist development.
