Paul Ricoeur's Moral Anthropology Geoffrey Dierckxsens,2017-12-20 Paul Ricoeur's Moral Anthropology is a guide for readers who are interested in Paul Ricoeur's thoughts on morals in general bringing together the different aspects of what Geoffrey Dierckxsens understands as Ricoeur's moral anthropology This anthropology addresses the question what it means to be human capable of participating in moral life Dierckxsens argues that Ricoeur shows that this participation implies being a self living a singular lived existence with others and being responsible in institutions of justice Through experiencing life one comes to learn taking moral decisions and the reasons for moral life The wager of Ricoeur's hermeneutical approach to moral anthropology is so Dierckxsens argues to understand moral life on the basis of the interpretation of lived existence rather than on the basis of cultural or natural patterns only like many contemporary moral theories in analytical philosophy Ricoeur's moral anthropology is thus particularly timely in that it offers a critical argument against contemporary moral relativism and reductionism By bringing together Ricoeur's moral anthropology and recent moral theories this book offers a novel perspective on Ricoeur's already well established moral theory Dierckxsens moreover offers a critical perspective by arguing that we should revisit certain moral concepts in Ricoeur's moral anthropology and in contemporary moral theories in analytical philosophy He evaluates certain concepts in Ricoeur's work such as the concept of universal moral norms and how it stands against cultural differences in morals He moreover interrogates certain ideas of contemporary analytical philosophy such as the idea of cultural moral relativism and whether we can find a common morality across the cultural differences By placing Ricoeur's ideas on moral life within the context of the contemporary scene of moral theory this book contributes well to Studies in the Thought of Paul Ricoeur

On Moral Personhood Richard Eldridge,1989-12-15 In this remarkable blend of sophisticated philosophical analysis and close reading of literary texts Richard Eldridge presents a convincing argument that literature is the most important and richest source of insights in favor of a historicized Kantian moral philosophy He effectively demonstrates that only through the interpretation of narratives can we test our capacities as persons for acknowledging the moral laws as a formula of value and for acting according to it Eldridge presents an extensive new interpretation of Kantian ethics that is deeply informed by Kant s aesthetics He defends a revised version of Kantian universalism and a Kantian

conception of the content of morality Eldridge then turns to literature armed not with any a priori theory but with an interpretive stance inspired by Hegel's phenomenology of self understanding more or less naturalized and by Wittgenstein's work on self understanding as ongoing narrative interpretive activity a stance that yields Kantian results about the universal demands our nature places on itself Eldridge goes on to present readings of novels by Conrad and Austen and poetry by Wordsworth and Coleridge In each text protagonists are seen to be struggling with moral conflicts and for self understanding as moral persons The route toward partial resolution of their conflicts is seen to involve multiple and ongoing activities of reading and interpreting The result of this kind of interpretation is that such literature literature that portrays protagonists as themselves readers and interpreters of human capacities for morality is a primary source for the development of morally significant self understanding We see in the careers of these protagonists that there can be genuine and fruitful moral deliberation and valuable action while also seeing how situated and partial any understanding and achievement of value must remain On Moral Personhood at once delineates the moral nature of persons shows various conditions of the ongoing contextualized partial acknowledgment of that nature and of the exercise of the capacities that define it and enacts an important way of reading literature in relation to moral problems Eldridge's work will be important reading for moral philosophers especially those concerned with Kant Hegel and issues dividing moral particularists from moral universalists literary theorists especially those concerned with the value of literature and its relation to philosophy and to moral problems and readers and critics of Conrad Wordsworth Coleridge and Austen
