*Philosophy of the Family* Teresa Baron,Christopher Cowley,2024-02-22 Almost everyone grows up in a family and family ties play an important role in daily life But what exactly is a family What is a family tie We use the general concept of family

in many contexts in fiction in talk shows in law in politics and yet one person's family may be strikingly different from another's. This introductory guide sets out to examine the multiple meanings of the family and related concepts. It explores the different roles played by these concepts in our attempts to understand who we are, where we belong and what we owe to whom and the relationships between individual family and society. Grounded in philosophy and ethics, the book also draws extensively from other disciplines such as law and sociology, discussing the concrete implications of these ideas for issues such as parental love, marriage and divorce, family autonomy and assisted reproduction.

Leading a Family Business Justin B. Craig Ph.D., Ken Moores Ph.D., 2017-07-20. Based on insights from executives across the globe, this planning guide captures the unique challenges faced by leaders of a family business and presents an approach to help these operations survive and thrive across generations. Leading a company is a much different experience for those in a family-run business than for their contemporaries in nonfamilial environments. This book provides a comprehensive overview of the skill set and mindset required to lead family enterprises and introduces the four critical areas in which family businesses differ from traditional companies: management structures, governance mechanisms, entrepreneurial advantages and stewardship practices. In a fascinating convergence of entrepreneurship, family relations and corporate principles, the authors present two frameworks to better understand the best practices of leading a family business: a firm-level frame focused on these four critical areas of difference, architecture, governance, entrepreneurship and stewardship, and an individual one that mirrors these in terms of the skill set and mindset successful leaders need to develop. Craig and Moores consider the differences between leadership in family enterprises and non-family enterprises, the entrepreneurial capabilities needed by executives in family-based firms and the use of power, identification and motivation in managing their responsibilities both at home and in the workplace. Case studies provide a real-life look at the inner workings of family operations across the globe.
