which has been reflected in the publication of several guidelines and consensus reports over the last few years. Most research efforts have focused on pancreatic cancer which have led and will further lead to a significant increase in the therapeutic armamentarium against this devastating disease. Finally many newly published studies have changed the concept, causes, clinical relevance, diagnosis and treatment of exocrine pancreatic insufficiency. This new edition of *Clinical Pancreatology for Practising Gastroenterologists and Surgeons* has enjoyed the collaboration of the world's leading experts in each of the areas of clinical pancreatology with the aim of facilitating gastroenterologists, surgeons, oncologists, internists, nutritionists, diabetologists, paediatricians, radiologists, pathologists and other specialists in their decision making when facing patients with pancreatic diseases in their daily clinical practice. All in all this book supplies an indispensable update of the relevant aspects of clinical pancreatology.
