Restitution And European Community Law:

The Outer Limits of European Union Law Catherine Barnard, Okeoghene Odudu, 2009-03-05 A commonly expressed view is that the citizens and the Member States are destined to be overcome by the European Union. There is a sense that the Union of today is not what was intended to be created or acceded to by the Member States or its citizens. *The Outer Limits of European Union Law* brings together a diverse group of legal scholars to consider aspects of EU substantive constitutional and procedural law in a manner highlighting the many senses in which the European Union is or can be limited and so demonstrating that the fear of being overcome is largely a false fear. By exploring the mechanisms and devices used to limit the European Union, the contributors also reveal not only the strengths of the various limits but also and more crucially the weakness of the limits thereby demonstrating that the prospect of being overcome may be a genuine risk to be guarded against. By considering general themes eg legitimacy and core subject areas eg policing free movement of goods remedies the book reveals the various techniques used by the Court of Justice, Community institutions and Member States to define and modify the outer limits of the European Union and European Union Law. *Collected Courses of the Academy of European Law: 1997 European Community Law* Academy of European Law, 2001-05-23 The Academy of European Law was established by the European University Institute in 1990 and extends the Institute's current programmes into a larger field of interest. It has as its main activity the holding of annual Summer Courses in the law of the European Community and the protection of human rights in Europe. In addition to General Courses, shorter courses are held on subjects of special academic and practical interest in both fields. Finally, special guest lectures on topical issues are given by policy makers, judges and persons who have held or currently hold the highest position in these fields. The courses are published in the language in which they were delivered: English and French.

EC Private Antitrust Enforcement Assimakis Komninos, 2008-02-22 This book written by an academic cum practitioner with substantial experience in the field of antitrust enforcement presents the rise of private enforcement of competition law in Europe especially in the context of the recent modernisation and decentralisation of EC competition law enforcement. In particular, the study examines the role of courts in the application of the EC competition rules and views that role in the broader system of antitrust enforcement. The author starts from the premise of private enforcement's independence of public enforcement and after examining the new

institutional position of national courts and their relationship with the Court of Justice the Commission and public enforcement in general proceeds to deal with the detailed substantive and procedural law framework of private antitrust actions in Europe The author describes the current post decentralisation state of affairs but also refers to the latest proposals to enhance private antitrust enforcement in Europe both at the Community level where reference is made to the December 2005 Commission Green Paper on Damages Actions and its aftermath and at the national level where reference is made to recent and forthcoming relevant initiatives

Standing to Enforce European Union Law before National Courts Hilde K Ellingsen, 2021-03-25 Access to court has long been recognised as an essential element of a Union based on the rule of law This book asks how can Member States ensure that their rules on standing guarantee that right The book answers this question by analysing the requirements of EU law from two angles first the effective protection of Union rights second the effectiveness of Union law per se With detailed case law examination the book formulates an autonomous Union law doctrine of standing based on the principle of effective judicial protection It then goes further setting out an effectiveness test of Member States enforcement mechanisms to ensure that EU law is rendered operative in practice This is a rigorous study on a question of immense importance

Restitution and European Community Law Alison Jones, 2020-11-26 The growth in prominence of the law of restitution and European Community law has resulted in the creation of a body of case law which is contained within this work This book examines the Community rules that affect restitutionary claims commenced in the English courts This book considers the affect that EC rules may have on the development of specific areas of the English law of restitution it sets out the circumstances in which the development of English rules governing restitutionary claims might be affected by the requirements of Community law and examines in detail the Community rules which affect restitutionary claims commenced before the national courts and attempts to rationalise and to explain them within the framework of the principle of unjust enrichment It is essential reading for practitioners as well as academics and postgraduate students

Unjust Enrichment and Public Law Rebecca Williams, 2010-06-30 This book examines claims involving unjust enrichment and public bodies in France England and the EU Part 1 explores the law as it now stands in England and Wales as a result of cases such as Woolwich EBS v IRC those resulting from the decision of the European Court of Justice ECJ in Metallgesellschaft and Hoechst v IRC and those involving Local Authority swaps transactions So far these cases have been viewed from either a public or a private law perspective whereas in fact both branches of the law are relevant and the author argues that the courts ought not to lose sight of the public law issues when a claim is brought under the private law of unjust enrichment or vice versa In order to achieve this a hybrid approach is outlined which would allow the law access to both the public and private law aspects of such cases Since there has been much discussion particularly in the context of public body cases of the relationship between the common law and civilian approaches to unjust enrichment or enrichment without cause Part 2 considers the French approach in order to ascertain what lessons it holds for England and Wales And finally as the Metallgesellschaft case itself makes clear no understanding of such cases can be complete without an examination of the relevant EU law Thus Part 3 investigates the principle of unjust enrichment in the European Union and the division of labour between the European and the domestic courts in the ECJ s so called remedies jurisprudence In particular it examines the extent to which the two relevant issues public law and unjust enrichment are defined in EU law and to what extent this remains a task for the domestic courts Cited with approval in the Court of Appeal by Beatson LJ in Hemming and others v The Lord Mayor and Citizens of Westminster 2013 EWCA Civ 5912 Cited with approval in the Supreme Court by Lord Walker in Test Claimants in the Franked Investment Income Group Litigation Appellants v Commissioners of Inland Revenue and another 2012 UKSC 19

Restitution and European community law, 2015 **Judicial Enforcement and Implementation of European Union Law** Ami Barav, 2017-11-08 The potency of the law in fostering the process of gradual European integration is easily discernable and widely acknowledged It is largely and conspicuously revealed by the litigation before the courts of both the European Union and its Member States The concern faithfully to give the European treaty the authentic meaning and scope as intended by its authors permeates the European courts judgments and the constant theme of the entitlement of those vested with rights conferred by the law of the European Union to effective judicial protection is omnipresent in their decisions The law of European integration has been uncharted territory The novelty of various issues which have arisen and on which the courts have had to pronounce springs from the originality of the integration venture and is commensurate with its uniqueness distinctive nature and specific exigencies The writings here assembled allow to trace the starting point since the inceptive formative years of the growth of a legal doctrine and an evolving jurisprudential edifice in several areas to appraise their direction and constancy and to assay adjustments and adaptations *The Foundations of European Union Law* Trevor Hartley, 2010-08-05 Rev ed of *The foundations of European Community law* by T C Hartley 6th ed c2007
