The Beijing Olympics: Promoting China Kevin Caffrey, 2013-09-13 The Beijing 2008 Olympic ceremonies were spectacular performances and technological accomplishments by the People's

Republic of China However the audience in Beijing was only the most overt element of a global audience receiving the message of the Games For this global audience the Beijing performances were a harbinger of wider regional and international ambitions a message of intent that pointed to a larger Chinese plan to a degree not seen since the Ming dynasty New Chinese ambitions embrace both soft power and hard power The actor in this political drama of international scope is the Chinese state and its political ambitions on the world stage The Beijing Olympics can be seen as its opening act and the audience as global Rather than the kind of morality play that is typically used in China to educate the people in politics this new production a production on many levels was one aimed at audiences all around the world and one that was a calculated expression of realpolitik This book was previously published as a special issue of the International Journal of the History of Sport

Here Comes the Sun Ken Worpole, 2000-12-01 Here Comes the Sun looks at how social reformers planners and architects in the early twentieth century tried to remake the city in the image of a sunlit ordered utopia While much has been written about architectural modernism Worpole concentrates less on buildings and more on the planning of the spaces in between the parks public squares open air museums promenades public pools and other public leisure facilities Life in the open was of particular concern to early urban planners and reformers with their dreams of release from the confines of overcrowded unsanitary slums Picturing youthful working class bodies made healthy by exercise and tanned by the sun they imagined an escape route from cities Worpole demonstrates how open air public spaces became sought after commissions for many early modernist architects in the early 1900s resulting in the transformation of the European cityscape a fascinating account of the political idealism that informed urban planning for the first two thirds of the twentieth century full of insights into how public space influences a sense of belonging and ownership The Guardian This is one of those books you stroke lovingly Open it and there is page after page of beautiful photographs this book combines history society politics environment and place in a well written and emotive text The strength of the book is the way it crosses these traditional boundaries and disciplines Town and Country Planning Drawing on architectural theories philosophy literature and even film making Worpole's book is wide ranging and erudite and should be of interest to the layperson as well as to the urban planner It is also elegantly written and complemented by a mixture of black and white and colour photographs to provide a visual emphasis to the points he raises N16 Magazine

Tidball, Marianne E. Krasny, 2013-07-22 Creation and access to green spaces promotes individual human health especially in therapeutic contexts among those suffering traumatic events But what of the role of access to green space and the act of creating and caring for such places in promoting social health and well being Greening in the Red Zone asserts that creation and access to green spaces confers resilience and recovery in systems disrupted by violent conflict or disaster This edited volume provides evidence for this assertion through cases and examples The contributors to this volume use a variety of research and policy frameworks to explore how creation and access to green spaces in extreme situations might contribute to resistance recovery and resilience of social ecological systems **Common Ground?** Anthony M. Orum, Zachary Neal, 2009-09-10 Public spaces have long been the focus of urban social activity but investigations of how public space works often adopt only one of several possible perspectives which restricts the questions that can be asked and the answers that can be considered In this volume Anthony Orum and Zachary Neal explore how public space can be a facilitator of civil order a site for power and resistance and a stage for art theatre and performance They bring together these frequently unconnected models for understanding public space collecting classic and contemporary readings that illustrate each and synthesizing them in a series of original essays Throughout they offer questions to provoke discussion and conclude with thoughts on how these models can be combined by future scholars of public space to yield more comprehensive understanding of how public space works *Tremé* Michael E. Crutcher, Jr., 2010-12-01 Across Rampart Street from the French Quarter the Faubourg Trem neighborhood is arguably the most important location for African American culture in New Orleans Closely associated with traditional jazz and second line parading Trem is now the setting for an eponymous television series created by David Simon best known for his work on *The Wire* Michael Crutcher argues that Trem s story is essentially spatial a story of how neighborhood boundaries are drawn and take on meaning and of how places within neighborhoods are made and unmade by people and politics Trem has long been sealed off from more prominent parts of the city originally by the fortified walls that gave Rampart Street its name and so has become a refuge for less powerful New Orleanians This notion of Trem as a safe haven the flipside of its reputation as a neglected place has been essential to its role as a cultural incubator Crutcher argues from the antebellum slave dances in Congo Square to jazz pickup sessions at Joe s Cozy Corner Trem takes up a wide range of issues in urban life including highway construction gentrification and the role of public architecture in sustaining collective memory Equally sensitive both to black white relations and to differences within the African American community it is a vivid evocation of one of America s most distinctive places Place/Culture/Representation James S. Duncan, David Ley, 2013-04-15 Spatial and cultural analysis

have recently found much common ground focusing in particular on the nature of the city Place Culture Representation brings together new and established voices involved in the reshaping of cultural geography The authors argue that as we write our geographies we are not just representing some reality we are creating meaning Writing becomes as much about the author as it is about purported geographical reality The issue becomes not scientific truth as the end but the interpretation of cultural constructions as the means Discussing authorial power discourses of the other texts and textuality landscape metaphor the sites of power knowledge relations and notions of community and the sense of place the authors explore the ways in which a more fluid and sensitive geographer's art can help us make sense of ourselves and the landscapes and places we inhabit and think about
