

GAIA HYPOTHESIS

- A Biosphere might be self-regulating (controversial)
- Doesn't require any mystical belief – could be an emergent property of interactions among species
- Some examples:
 - Energy provided by the sun has increased 25%-30% since life started on earth, but temperatures have remained habitable
 - Balances achieved in carbon and oxygen
 - Predator/prey cycles
 - An extremely simple example of how this could happen: Daisyworld simulation

Restless Biosphere An Introduction To The Chemistry Of Gaia:

The Restless Biosphere Donald R. Eaton,1992 *Whitaker's Books in Print* ,1998 *The Greening* Larry Abraham, Franklin Sanders,1993 **The world book encyclopedia** ,1997 **Gaia's Body** Tyler Volk,2012-12-06 If the biosphere really is a single coherent system then it must have something like a physiology It must have systems and processes that perform living functions In *Gaia's Body* Tyler Volk describes the environment that enables the biosphere to exist various ways of looking at its anatomy and physiology the major biogeographical regions such as rainforests deserts and tundra the major substances the biosphere is made of and the chemical cycles that keep it in balance He then looks at the question of whether there are any long term trends in the earth's evolution and examines the role of humanity in Gaia's past and future Both adherents and sceptics have often been concerned that Gaia theory contains too much goddess and too few verifiable hypotheses This is the book that describes for scientists students and lay readers alike the theory's firm basis in science Gaia James Lovelock,2016 *Gaia* in which James Lovelock puts forward his inspirational and controversial idea that the Earth functions as a single organism with life influencing planetary processes to form a self regulating system aiding its own survival is now a classic work that continues to provoke heated scientific debate Gaia in Turmoil Eileen Crist,H. Bruce Rinker,2009-10-16 *Essays link Gaian science to such global environmental quandaries as climate change and biodiversity destruction providing perspectives from science philosophy politics and technology Gaian theory which holds that Earth's physical and biological processes are inextricably bound to form a self regulating system is more relevant than ever in light of increasing concerns about global climate change The Gaian paradigm of Earth as a living system first articulated by James Lovelock and Lynn Margulis in the 1970s has inspired a burgeoning body of researchers working across disciplines that range from physics and biology to philosophy and politics Gaia in Turmoil reflects this disciplinary richness and intellectual diversity with contributions including essays by both Lovelock and Margulis that approach the topic from a wide variety of perspectives discussing not only Gaian science but also global environmental problems and Gaian ethics and education Contributors focus first on the science of Gaia considering such topics as the workings of the biosphere the planet's water supply and evolution then discuss Gaian perspectives on global environmental change including biodiversity destruction and global warming and finally explore the influence of Gaia on environmental policy ethics politics technology economics and education Gaia in Turmoil breaks new ground by focusing on global ecological problems from the perspectives of Gaian science and knowledge focusing especially on the challenges of climate change and biodiversity destruction Contributors David Abram Donald Aitken Connie Barlow J Baird Callicott Bruce Clarke Eileen Crist Tim Foresman Stephan Harding Barbara Harwood Tim Lenton Eugene Linden Karen Litfin James Lovelock Lynn Margulis Bill McKibben Martin Ogle H Bruce Rinker Mitchell Thomashow Tyler Volk Hywel Williams *Healing Gaia* James Lovelock,J. E. Lovelock,1991 The creator of the Gaia theory that the Earth is a living organism applies the traditional medical disciplines to*

ecological problems and solutions here are anatomy biochemistry metabolism etc Brightly illustrated with color mostly stylized drawings on nearly every page to appeal to the general reader armchair ecoterrorist and science fiction fan No bibliography Annotation copyrighted by Book News Inc Portland OR *Gaia* James E. Lovelock, James Lovelock, 2000-09-28 This classic work is reissued with a new preface by the author Written for non scientists the idea is put forward that life on Earth functions as a single organism The Ages of Gaia James Lovelock, J. E. Lovelock, 1995 James Lovelock proposes that all living species are components of that organism as cells are components of the human body *Gaia's Body* Tyler Volk, 2003 An engagingly readable introduction to the budding new field of Earth physiology *Gaia's Body* blends real science with evocative imagery in describing the biosphere The book explores how every important chemical in the atmosphere is regulated by living processes and examines long term trends in Earth's evolution and humanity's role in Gaia's past and present *A Guide to Gaia* Michael Allaby, 1990 A technical primer for lay people about the Gaia hypothesis a hypothesis that's rapidly turning into a full scale scientific theory and may have critical import for worldwide environmental policies in the decades to come The Ages of Gaia James Lovelock, 1995 In his first book *Gaia A New Look at Life on Earth* Jim Lovelock proposed a startling new theory of life the Earth its rocks oceans atmosphere and all living things are part of one great organism evolving over the vast span of geological time In this sequel he examines environmental and scientific issues in detail including the greenhouse effect acid rain the depletion of the ozone layer and the destruction of tropical forests

James Lovelock John Gribbin, Mary Gribbin, 2021-07-13 In 1972 when James Lovelock first proposed the Gaia hypothesis the idea that the Earth is a living organism that maintains conditions suitable for life he was ridiculed by the scientific establishment Today Lovelock's revolutionary insight though still extremely controversial is recognized as one of the most creative provocative and captivating scientific ideas of our time James Lovelock tells for the first time the whole story of this maverick scientist's life and how it served as a unique preparation for the idea of Gaia Drawing on in depth interviews with Lovelock himself and unprecedented access to his private papers John and Mary Gribbin paint an intimate and fascinating portrait of a restless uniquely gifted freethinker In a lifetime spanning almost a century Lovelock has followed a career path that led him from chemistry to medicine to engineering to space science He worked for the British secret service and contributed to the success of the D Day landings in World War II He was a medical experimenter and an accomplished inventor And he was working with NASA on methods for finding possible life on Mars when he struck upon the idea of Gaia conceiving of the Earth as a vast living self regulating system Deftly framed within the context of today's mounting global warming crisis James Lovelock traces the intertwining trajectories of Lovelock's life and the famous idea it brought forth which continues to provoke passionate debate about the nature and future of life on our planet *Scientists Debate Gaia* Stephen Henry Schneider, 2004 Leading scientists bring the controversy over Gaia up to date by exploring a broad range of recent thinking on Gaia theory The Ages of Gaia James Lovelock, J. E. Lovelock, 1988 Explains the symbiotic relationship

between life forms and Earth showing how the geophysical interaction of atmosphere oceans climate and Earth s crust regulated by living organisms using the sun s energy Gaia James Lovelock,2000 The Sweet One Hundred Philip G. Simpson,New Zealand. Department of Conservation. Science and Research Directorate,1989
